Modern Girls on the Go Alisa Freedman,Laura Miller,Christine R. Yano,2013-04-17 This spirited and engaging multidisciplinary volume pins its focus on the lived experiences and cultural depictions of women's mobility and labor in Japan. The theme of modern girls continues to offer a captivating window into the changes that women's roles have undergone during the course of the last century. Here we encounter Japanese women inhabiting the most modern of spaces, in newly created professions, moving upward and outward, claiming the public life as their own: shop girls, elevator girls, dance hall dancers, tour bus guides, airline stewardesses, international beauty queens, overseas teachers, corporate soccer players, and even female members of the Self-Defense Forces. Directly linking gender, mobility, and labor in 20th and 21st century Japan, this collection brings to life the ways in which these modern girls—historically and contemporaneously—have influenced social roles, patterns of daily life, and Japan's global image. It is an ideal guidebook for students, scholars, and general readers alike.

*The Anime Machine* Thomas Lamarre,2013-11-30 Despite the longevity of animation and its significance within the history of cinema, film theorists have focused on live-action motion pictures and largely ignored hand-drawn and computer-generated movies. Thomas Lamarre contends that the history, techniques, and complex visual language of animation, particularly Japanese animation, demands serious and sustained engagement, and in *The Anime Machine* he lays the foundation for a new critical theory for reading Japanese animation, showing how anime fundamentally differs from other visual media. *The Anime Machine* defines the visual characteristics of anime and the meanings generated by those specifically “animetic” effects—the multiplanar image, the distributive field of vision, exploded projection, modulation, and other techniques of character animation—through close analysis of major films and television series, studios, animators, and directors, as well as Japanese theories of animation. Lamarre first addresses the technology of anime: the cells on which the images are drawn, the animation stand at which the animator works, the layers of drawings in a frame, the techniques of drawing and blurring lines, how characters are made to move. He then examines foundational works of anime, including the films and television series of Miyazaki Hayao and Anno Hideaki, the multimedia art of Murakami Takashi, and CLAMP’s manga and anime adaptations, to illuminate the profound connections between animators, characters, spectators, and technology. Working at the intersection of the philosophy of technology and the history of thought, Lamarre explores how anime and its related media entail material orientations and demonstrates concretely how the “animetic machine” encourages a specific approach to thinking about technology and opens new ways for understanding our place in the technologized world around us.

**Anime's Identity** Stevie Suan,2021-11-09 A formal approach to anime rethinks globalization and transnationality under neoliberalism Anime has become synonymous with Japanese culture, but its global reach raises a perplexing question—what happens when anime is produced outside of Japan? Who actually makes anime, and how can this help us rethink notions of cultural production? In *Anime's Identity*, Stevie Suan examines how anime's recognizable media-form—no matter where it is produced—reflects the problematics of globalization. The result is an incisive look at not only anime but also the tensions of transnationality. Far from valorizing the individualistic “originality” so often touted in national creative industries, anime reveals an alternate type of creativity based in repetition and variation. In exploring this alternative creativity and its accompanying aesthetics, Suan examines anime from fresh angles, including considerations of how anime operates like a brand of media, the intricacies of anime production occurring across national borders, inquiries into the selfhood involved in anime's character acting, and analyses of various anime works that present differing modes of transnationality. *Anime's Identity* deftly merges theories from media studies and performance studies, introducing innovative formal concepts that connect anime to questions of dislocation on a global scale, creating a transformative new lens for analyzing popular media.

**On the Mode of Existence of Technical Objects** Gilbert Simondon,2017 For Gilbert Simondon, the human/machine distinction is perhaps not a simple dichotomy and there is much to learn from technical objects. He takes up the task of a true thinker who sees the potential for humanity to uncover life-affirming modes of technical objects whereby we can discover potentiality for novel, healthful, and dis-alienating rapports with them.

*Anti-Oedipus* Gilles Deleuze,Felix Guattari,2009-05-26 An introduction to the nonfascist life (Michel Foucault, from the Preface) When it first appeared in France, *Anti-Oedipus* was hailed as a masterpiece by some and a work of heretical madness by others. In it, Gilles Deleuze and Félix

Guattari set forth the following theory: Western society's innate herd instinct has allowed the government, the media, and even the principles of economics to take advantage of each person's unwillingness to be cut off from the group. What's more, those who suffer from mental disorders may not be insane, but could be individuals in the purest sense, because they are by nature isolated from society. More than twenty-five years after its original publication, *Anti-Oedipus* still stands as a controversial contribution to a much-needed dialogue on the nature of free thinking.

*Difference and Repetition* Gilles Deleuze,Paul Patton,2004-11-12  src=<http://www.continuumbooks.com/pub/images/impactslogo.gif> align=left Since its publication in 1968, *Difference and Repetition*, an exposition of the critique of identity, has come to be considered a contemporary classic in philosophy and one of Deleuze's most important works. The text follows the development of two central concepts, those of pure difference and complex repetition. It shows how the two concepts are related, difference implying divergence and decentring, repetition being associated with displacement and disguising. The work moves deftly between Hegel, Kierkegaard, Freud, Althusser and Nietzsche to establish a fundamental critique of Western metaphysics, and has been a central text in initiating the shift in French thought - away from Hegel and Marx, towards Nietzsche and Freud.
