Who bought these cars? Featuring 150 of the cars we love (and love to hate), this text celebrates the world's worst cars in all their flawed glory.

**De arte poetica** Horace,1989-12-07 This volume fulfills the need for a student edition of Horace's literary epistles, which have recently been the subject of renewed scholarly interest. Professor Rudd provides a clear introduction to each of the three poems: the Epistles to Augustus, to Florus, and to the Pisones (the so-called Ars Poetica). He sketches the historical context in which the poems were written and comments on their structure and purpose. He also discusses their literary preoccupations: the relations of poet and patron and the role of poetry in the state (Augustus), the problems of a professedly tiring poet (Florus), and the presentation of classical poetic theory (Ars Poetica). He notes Horace's influence on later criticism, drawing attention in one section to one of Alexander Pope's Imitations. He also addresses problems of grammar and style, focusing on linguistic difficulties and the subtle movement of the poet's thought.

**Report on Procurement** United States. Department of Defense. Advisory Committee on Fiscal Organization and Procedures,1954

Western Technology and Soviet Economic Development 1930 to 1945 Antony C Sutton,1973-10 THIS is the second volume of an empirical study of the relationship between Western technology and entrepreneurship and the economic growth of the Soviet Union. The continuing transfer of skills and technology to the Soviet Union through the medium of foreign firms and engineers in the period 1930 to 1945 can only be characterized as extraordinary. A thorough and systematic search unearthed only two major items--SK-B synthetic rubber and the Ramzin 'once-through' boiler--and little more than a handful of lesser designs (several aircraft, a machine gun, and a motorless combine) which could accurately be called the result of Soviet technology; the balance was transferred from the West.

**Moon-face and Other Stories** Jack London,1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

*Iran and the International System* Anoushiravan Ehteshami,Reza Molavi,2012-03-29 Much attention in the West has focused on Iran as a problem country. This book challenges the representations of Iran as a hostile regional power led by ideologues, and goes further by discussing how international relations are viewed from inside Iran itself, outlining the factors which underpin Iranian thinking on international relations and considering what role Iran, as a large and significant country in the Middle East, ought to play in a fairly constructed international system. The book is written by leading scholars and policy makers from inside, as well as from outside, Iran and includes academics with unparalleled access and insights into the world-views of the Iranian leadership. Subjects covered include: the rationale of Iran's Islamic constitution, including its electoral system, and the impact this has on international relations; Iran's view of the ideal international system, including the place therein of ethics, justice, and security; Iran's international interests, including energy needs; and relations with the West, including the clash between Iranian and Western views of the world order.

The Rejection of Consequentialism Samuel Scheffler,1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

Theft of the Nation Donald Cressey,2017-09-08 Organized crime in America today is not the tough hoodlums familiar to moviegoers and TV watchers. It is more sophisticated, with many college graduates, gifted with organizational genius, all belonging to twenty-four tightly knit families, who have corrupted legitimate business and infiltrated some of the highest levels of local, state, and federal government. Their power reaches into Congress, into the executive and judicial branches, police agencies, and labor unions, and into such business enterprises as real estate, retail stores, restaurants, hotels, linen-supply houses, and garbage-collection routes.How does organized crime operate? How dangerous is it? What are the implications for American society? How may we cope with it? In answering these questions, Cressey asserts that because organized crime provides illicit goods and services demanded by legitimate society, it has become part of legitimate society. This fascinating account reveals the parallels: the growth of specialization, big-business practices (pooling of capital and reinvestment of profits; fringe benefits like bail money), and government practices (negotiated settlements and peace treaties, defined territories, fair-trade agreements).For too long we have, as a society, concerned ourselves only with superficial questions about organized crime. Theft of the Nation focuses on to a more profound and searching level. Of course, organized crime exists. Cressey not only establishes this fact, but proceeds to explore it rigorously and with penetration. One need not agree with everything Cressey writes to conclude that no one, after the publication of Theft of the Nation, can be knowledgeable about organized crime without having read this book.

Creating and Digitizing Language Corpora J. Beal,K. Corrigan,H. Moisl,2007-07-12 A range of electronic corpora has become accessible via the WWW and CD-ROM. This coincides with improvements in standards governing the collecting, encoding and archiving of such data. This book develops similar standards for enriching and preserving 'unconventional' data': the fragmentary texts and voices left to us as accidents of history.

Iran And Iraq Anthony H Cordesman,1994-09-04 In this volume, Anthony Cordesman provides the depth of analysis needed to fully comprehend the military capabilities of these two volatile countries - recently highlighted by the U.S. secretary of state as the two most serious threats to U.S. interests in the coming decade. In addition to providing a comprehensive assessment of Iran's and Iraq's armed forces and weapons systems, Cordesman evaluates their internal political tensions and civil wars, examining the paramilitary and rebel forces in the region. He concludes with realistic forecasts of possible future conflicts and a cogent strategy for deterring those conflicts or effectively subduing them.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
