In This House, We Will Giggle Courtney DeFeo, 2014-10-07 What do indoor picnics and funny face contests have to do with loving Jesus? More than you realize! As a mom in the throes of parenting, Courtney DeFeo believes that instilling virtues in children starts with laughter, not lecture. That perspective propelled her to create this idea-packed book, in which she offers motivating reflections, real-life stories, and a sandbox full of inventive ways to help you turn your

kids' hearts toward God. Each chapter focuses on one virtue that is key for developing your child's character. Along with insights into how this virtue plays out in the nitty-gritty of life, Courtney includes a memory verse, activity ideas, and discussion questions to reinforce that virtue throughout the month. Here you'll find a full year of ways to draw your children closer to God through delightful antics like Family Olympics, One Fancy Feast, and Light 'Em Up. In *This House, We Will Giggle* shows you how to capture the hearts of your children through fun—so that they experience the goodness of Christ, the joy of following Him, and the difference they can make in the lives of others. Engineering in K-12 Education National Research Council, National Academy of Engineering, Committee on K-12 Engineering Education, 2009-09-08 Engineering education in K-12 classrooms is a small but growing phenomenon that may have implications for engineering and also for the other STEM subjects—science, technology, and mathematics. Specifically, engineering education may improve student learning and achievement in science and mathematics, increase awareness of engineering and the work of engineers, boost youth interest in pursuing engineering as a career, and increase the technological literacy of all students. The teaching of STEM subjects in U.S. schools must be improved in order to retain U.S. competitiveness in the global economy and to develop a workforce with the knowledge and skills to address technical and technological issues. *Engineering in K-12 Education* reviews the scope and impact of engineering education today and makes several recommendations to address curriculum, policy, and funding issues. The book also analyzes a number of K-12 engineering curricula in depth and discusses what is known from the cognitive sciences about how children learn engineering-related concepts and skills. *Engineering in K-12 Education* will serve as a reference for science, technology, engineering, and math educators, policy makers, employers, and others concerned about the development of the country's technical workforce. The book will also prove useful to educational researchers, cognitive scientists, advocates for greater public understanding of engineering, and those working to boost technological and scientific literacy.
