F-16 A and B Versions Frederic Lert, 2010-10-01 At a time when other planes retire to museums, General Dynamics' fighter-bomber is still a formidable foe in international competitions against so-called fifth generation planes. The first prototype flew for the first time in 1974 and the operational career of the last aircraft built will continue well into the 2040s. Almost seventy years and still going strong! Meanwhile, this light fighter was optimized for daytime missions and became a formidable fighter-bomber; more than 4,400 were built and used by more than 25 countries.

F-35 Alternate Engine Program Jeremiah Gertler, Library of Congress. Congressional Research Service, 2010 Provides background on debate surrounding development of General Electric/Rolls-Royce F136 engine as an alternative to the Pratt & Whitney F135 engine that currently powers the F-35 joint strike fighter. Examines current status of alternative engine program, including

cost, relations with allies, and engine development issues. Covers FY2011 legislative actions, and reviews issues for Congress.

Falcon Air Combat Pete Bonanni, 1989 Captain Pete Boomer Bonanni flew F-16 Fighter planes and is now bringing his inside tactics to the Falcon flight simulator. This teaches the basics of how to fly and fight, yet more advanced users desiring to learn real tactics from a pro will also want this book.

General Dynamics F-16 Fighting Falcon Manual Steve Davies, 2014-02-06 Officially called the Fighting Falcon by the USAF (a name loathed by pilots and ground crews), the F-16 is popularly referred to as the Viper. First introduced into service with the USAF in 1978, the F-16 is a successful all-weather multi-role jet fighter of which more than 4,500 have been built and exported to 25 countries worldwide. It remains in service more than 30 years later. The Viper incorporates a number of innovative design features that include a frameless bubble canopy for better visibility, pilot's side-mounted control stick for ease of control when manoeuvring, a seat reclined 30 degrees to reduce the effect of g-forces on the pilot, and the first use of a relaxed static stability/fly-by-wire flight control system that makes the Viper a highly agile aircraft. At the 'business end' the F-16 has an internal M61 Vulcan cannon and eleven weapon-mounting stations.

A Case Study on the F-16 Fly-by-wire Flight Control System Carl S. Droste, James E. Walker, 1985

The Next Generation Attack Fighter Donald Stevens, 1997 Analyzes inventory

levels, affordability, and mission needs for the new Joint Strike Fighter aircraft.

The General Dynamics Case Study on the F-16 Fly-By-Wire Flight Control System Carl S. Droste, James Walker, 2001-11 This case study provides insight into the F-16 FBW FCS design, including discussion of the F-16 design philosophy, the implementation of the flight control system, and unique flight control system functional features.

Uncovering the Lockheed Martin F-16 A/B/C/D Danny Coremans, Nico Deboeck, 2001 There are superdetail books on the F16 available, but there is nothing close to matching Uncovering the Lockheed Martin F-16 for sheer detail and ultra sharp photos. The authors have produced a stunning visual part by part plan in photographs of one of the most popular and successful aircraft in service. The addition of two enormous foldout schematic diagrams at the back of the book, make this probably one of the very best modeling books you will ever see.

The General Dynamics F-16 Fighting Falcon Jay Miller, 1982

The Next Generation Attack Fighter: Affordability and Mission Needs , 1997 The Air Force has embarked on a course to replace the most numerous fighter aircraft in its inventory, the F-16. The Joint Strike Fighter (JSF) may evolve from the tri-service Joint Advanced Strike Technology (JAST) program to replace the F-16 (and perhaps other Air Force ground-attack aircraft) as well as other air-to-ground fighters used by the Navy and Marine Corps. As

the JAST program proceeds to a hardware demonstration phase, the Air Force is drafting statements of mission needs and operational requirements for the new aircraft. The Air Force asked RAND's Project AIR FORCE to analyze inventory levels, affordability, and mission needs for the new fighter, to augment Air Force and contractor studies. The study, documented in this report, found that the constraints of future budgets will severely circumscribe Air Force options for the JSF. Without a sharp reversal in defense budget trends or the allocation of a higher share of the Air Force budget to fighter modernization, the JSF will need to be a relatively low-cost, moderate-performance aircraft to fit within Air Force budget constraints. The good news is that an aircraft with a combat radius of 650 nm, moderate stealth, and a turn rate comparable to that of today's multirole aircraft can probably meet most of the services' needs in future regional conflicts.
