Owen D. Gutfreund

Imperialism Vladimir Lenin, 1939 The pamphlet here presented to the reader was written in the spring of 1916, in Zurich. In the conditions in which I was obliged to work there I naturally suffered somewhat from a shortage of French and English literature and from a serious dearth of Russian literature. However, I made use of the principal English work on imperialism, the book by J. A. Hobson, with all the care that, in my opinion, work deserves. This pamphlet was written with an eye to the tsarist censorship. Hence, I was not only forced to confine myself strictly to an exclusively theoretical, specifically economic analysis of facts, but to formulate the few necessary observations on politics with extreme caution, by hints, in an allegorical language—in that accursed Aesopian language—to which tsarism compelled all revolutionaries to have recourse whenever they took up the pen to write a “legal” work. It is painful, in these days of liberty, to re-read the passages of the pamphlet which have been distorted, cramped, compressed in an iron vice on account of the censor. That the period of imperialism is the eve of the socialist revolution; that social-chauvinism (socialism in words, chauvinism in deeds) is the utter betrayal of socialism, complete desertion to the side of the bourgeoisie; that this split in the working-class movement is bound up with the objective conditions of imperialism, etc.—on these matters I had to speak in a “slavish” tongue, and I must refer the reader who is interested in the subject to the articles I wrote abroad in 1914-17, a new edition of which is soon to appear. In order to show the reader, in a guise acceptable to the censors, how shamelessly untruthful the capitalists and the social-chauvinists who have deserted to their side (and whom Kautsky opposes so inconsistently) are on the question of annexations; in order to show how shamelessly they screen the annexations of their capitalists, I was forced to quote as an example—Japan! The careful reader will easily substitute Russia for Japan, and Finland,

Poland, Courland, the Ukraine, Khiva, Bokhara, Estonia or other regions peopled by non-Great Russians, for Korea. I trust that this pamphlet will help the reader to understand the fundamental economic question, that of the economic essence of imperialism, for unless this is studied, it will be impossible to understand and appraise modern war and modern politics.

Design for Transport Mike Tovey, 2016-04-15 The central premise of Design for Transport is that the designer's role is to approach design for transport from the point of view of the user. People have a collection of wants and needs and a significant proportion of them are to do with their requirements for mobility. The authors show how creative designers can take a user-focused approach for a wide range of types of transport products and systems. In so doing their starting point is one of creative dissatisfaction with what is currently available, and their specialist capability is in imagining and developing new solutions which respond to that opportunity. How this is tackled varies depending on the context, and the variety of solutions produced reflects the different aspirations and needs of the people they are designing for. The chapters cover user needs and transport, design and the transport system, transport design case studies, and the case for the automobile. A conclusion briefly signals what the future for transport design might be. Lavishly illustrated throughout in four-colour, Design for Transport, is an imaginative and rigorous guide to how designers can take a user-centred and socially responsible approach to tackling a range of types of transport, from systems to products and from bicycles to automobiles, demonstrating a rich array of solutions through case studies.

Twentieth-Century Sprawl Owen D. Gutfreund, 2004-05-01

Here, Owen Gutfreund offers a fascinating look at how highways have dramatically transformed American communities nationwide, aiding growth and development in unsettled areas and undermining existing urban centers. Gutfreund uses a follow the money approach, showing how government policies subsidized suburban development and fueled a chronic nationwide dependence on cars and roadbuilding, with little regard for expense, efficiency, ecological damage, or social equity. The consequence was a combination of unstoppable suburban sprawl, along with ballooning municipal debt burdens, deteriorating center cities, and profound changes in American society and culture. Gutfreund tells the story via case studies of three communities--Denver, Colorado; Middlebury, Vermont; and Smyrna, Tennessee. Different as these places are, they all show the ways that government-sponsored highway development radically transformed America's cities and towns. Based on original research and vividly written, *Twentieth-Century Sprawl* brings to light the benefits and consequences of the spread of American highways and makes a major contribution to our understanding of issues that still plague our cities and suburbs today.

Electric Traction for Railway Trains Edward Parris

Burch, 1911 *Electric Traction for Railway Trains: A Book for Students, Electrical and Mechanical Engineers, Superintendents of Motive Power and Others* by Edward Parris Burch, first published in 1911, is a rare manuscript, the original residing in one of the great libraries of the world. This book is a reproduction of that original, which has been scanned and cleaned by state-of-the-art publishing tools for better readability and enhanced appreciation. Restoration Editors' mission is to bring long out of print manuscripts back to life. Some smudges, annotations or unclear text may still exist, due to permanent damage to the original work. We believe the literary significance of the text

justifies offering this reproduction, allowing a new generation to appreciate it.

General Purpose Adhesives Harold Moore,1961 Various failures resulting from attempts to bond rubber to metal are discussed. Experimental bonding techniques using various rubber base adhesives are described. Also included with the most impressive bonding techniques and test results are proposed specifications that describe both the necessary preparation of rubber surfaces and the methods of applying adhesives which proved the most satisfactory as a result of experimental testing.
