The Dragon and the Dazzle Marco Pellitteri, Jean-Marie Bouissou, Gianluca Di Fratta, Cristiano Martorella, Bounthavy Suvilay, 2010 In the worldwide circulation of the products of cultural industries, an important role is played by Japanese popular culture in European contexts. Marco Pellitteri shows that the contact between Japanese pop culture and European youth publics occurred during two phases. By use of metaphor, the author calls them the Dragon and the Dazzle. The first took place between 1975 and 1995, the second from 1996 to today. They can be distinguished by the modalities of circulation and consumption/re-elaboration of Japanese themes and products in the most receptive countries: Italy, France, Spain, Germany and, across the ocean, the United States. During these two phases, several themes have been perceived, in Europe, as rising from Japan's social and mediatic systems. Among them, this book examines the most apparent from a European point of view: the author names them machine, infant, and mutation, visible mostly through manga, anime, videogames, and toys. Together with France, Italy is the European country that in this respect has had the most central role. There, Japanese imagination has been acknowledged not only by young people, but also by politicians, television programmers, the general public, educators, comics and cartoons authors. The growing influence of Japanese pop culture, connected to the appreciation of its manga, anime, toys, and videogames, also urges political and mediologic questions linked to the identity/ies of Japan as they are understood--wrongly or rightly--in Europe and the West, and to the increasingly important role of Japan in international relations.--Back cover

The Anime Machine Thomas Lamarre, 2013-11-30 Despite the longevity of animation and its significance within the history of cinema, film theorists have focused on live-action motion pictures and largely ignored hand-drawn and computer-generated movies. Thomas Lamarre contends that the history, techniques, and complex visual language of animation, particularly Japanese animation, demands serious and sustained engagement, and in *The Anime Machine* he lays the foundation for a new critical theory for reading Japanese animation, showing how anime fundamentally differs from other visual media. *The Anime Machine* defines the visual characteristics of anime and the meanings generated by those specifically "animetic" effects--the multiplanar image, the distributive field of vision, exploded projection, modulation, and other techniques of character animation--through close analysis of major films and television series, studios, animators, and directors, as well as Japanese theories of animation. Lamarre first addresses the technology of anime: the cells on which the images are drawn, the animation stand at which the animator works, the layers of drawings in a frame, the techniques of drawing and blurring lines, how characters are made to move. He then examines foundational works of anime, including the films and television series of Miyazaki Hayao and Anno Hideaki, the multimedia art of Murakami Takashi, and CLAMP's manga and anime adaptations, to illuminate the profound connections between animators, characters, spectators, and technology. Working at the intersection of the philosophy of technology and the history of thought, Lamarre explores how anime and its related media entail material orientations and demonstrates concretely how the "animetic machine" encourages a specific approach to thinking about technology and opens new ways for understanding our place in the technologized world around us.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Between Technology and Humanity Chris Gastmans, 2002 In the last decade health care has witnessed a host of technological novelties in the field of diagnostic and therapeutic practices, as well as in the supportive information and communication technology and in various applications of genetics, microbiology and informatics. As a result a few questions need to be answered: -Is health care ethics due to a splitting up into an ethics of technology (focusing on the ethical implications of new technologies) and an ethics of care (focusing on the ethical problems concerning chronic diseases, decay, disability, end of life)? -How to cope with dependence, limitation, finiteness, suffering, ... in spite of technological progress? -Could a better integration of technology and care preclude situations where patients are being dehumanised? Starting with a philosophical ethical reflection about the possibilities and dangers of technologies in health care, this book highlights both the relation between technology and care, and the normative aspects of economic analyses in health care. Finally, a series of concrete examples from various clinical fields (prenatal diagnosis, genetic tests, digital imaging in psychiatry, tube feeding in care for the elderly, and palliative sedation) will help the authors to consider how to integrate these technologies in a care context aimed upon humaneness. Since each topic is analysed by leading European clinicians and health care ethicists, this book clearly stands for the interdisciplinary approach in health care ethics This book may be a rich source of material for reflection on the role, meaning and ends of technology and care, as harmonious aspects of clinical health care practice. However, the authors main concern is to show what such a reflection may consist of and how it can contribute to the inquiry into the experience of technology, the needs of humanity and the development of appropriate health care.
