Original Grin Ron English, 2019-07-16 Through his highly subversive art Ron English (b. 1959) has bombed the global landscape with striking and often unsettling imagery. He coined the term POPaganda to describe his signature and darkly satirical renderings of corporate branding icons. Ranging from superhero mythology to pillars of art history, his work is populated with a vast and constantly growing arsenal of original characters such as MC Supersized, the obese fast-food mascot featured in the hit movie *Supersize Me*; and Abraham Obama, which fused America's 16th and 44th Presidents, an image that was posited by the media as having directly impacted the 2008 election. His cameo on *The Simpsons* secured his position as America's premier pop iconoclast. This book is the first complete retrospective of English's work, compiling his paintings, illustrations, toys, sculpture, street art, and agit-pop. Additionally, it contains a lengthy and comprehensive interview with the artist conducted exclusively for this publication.

Lightless C.A. Higgins, 2015-09-29 NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BUZZFEED AND KIRKUS REVIEWS • With deeply moving human drama, nail-biting suspense—and bold speculation informed by a degree in physics—C. A. Higgins spins a riveting science fiction debut guaranteed to catapult readers beyond their expectations. Serving aboard the *Ananke*, an experimental military spacecraft launched by the ruthless organization that rules Earth and its solar system, computer scientist Althea has established an intense emotional bond—not with any of her crewmates, but with the ship's electronic systems, which speak more deeply to her analytical mind than human feelings do. But when a pair of fugitive terrorists gain access to the *Ananke*, Althea must draw upon her heart and soul for the strength to defend her beloved ship. While one of the saboteurs remains at large somewhere on board, his captured partner—the enigmatic Ivan—may prove to be more dangerous. The perversely fascinating criminal whose silver tongue is his most effective weapon has long evaded the authorities' most relentless surveillance—and kept the truth about his methods and motives well hidden. As the ship's systems begin to malfunction and the claustrophobic atmosphere is increasingly poisoned by distrust and suspicion, it falls to Althea to penetrate the prisoner's layers of intrigue and deception before all is lost. But when the true nature of Ivan's mission is exposed, it will change Althea forever—if it doesn't kill her first. Praise for *Lightless* “Gripping . . . sci-fi flavored with a hint of thriller.”—*New York Daily News* “[A] measured, lovely science-fiction debut [that is] more psychological thriller . . . contained, disciplined, tense . . . The plot is compulsive. . . . *Lightless* is the first of a planned series, and you can't help looking forward to learning what's next.”—*The New York Times* “*Lightless* is full of suspense and fun as hell to read.”—*BuzzFeed* “Absolutely brilliant . . . This is science fiction as it is meant

to be done: scientific concepts wedded to and built upon human ideals.”—Seanan McGuire, New York Times bestselling author of the October Daye series “The stakes in this story are high—life and death, rebellion and betrayal—and debut novelist Higgins continually ratchets up the tension. . . . A suspenseful, emotional story that asks plenty of big questions about identity and freedom, this is a debut not to be missed.”—Kirkus Reviews (starred review) “A taut, suspenseful read.”—Tech Times “Lightless is an exercise in lighting a very slow fuse and building the tension to an unbearable pitch while making us guess just how apocalyptic the ultimate explosion will be. . . . It is a high-wire act, a wonderment, and a fine accomplishment from a name we’ll be seeing again.”—Sci Fi

The Girl in the Road Monica Byrne,2014-05-20 A debut that Neil Gaiman calls “Glorious. . . . So sharp, so focused and so human.” The Girl in the Road describes a future that is culturally lush and emotionally wrenching. Monica Byrne bursts on to the literary scene with an extraordinary vision of the future. In a world where global power has shifted east and revolution is brewing, two women embark on vastly different journeys—each harrowing and urgent and wholly unexpected. When Meena finds snakebites on her chest, her worst fears are realized: someone is after her and she must flee India. As she plots her exit, she learns of the Trail, an energy-harvesting bridge spanning the Arabian Sea that has become a refuge for itinerant vagabonds and loners on the run. This is her salvation. Slipping out in the cover of night, with a knapsack full of supplies including a pozit GPS, a scroll reader, and a sealable waterproof pod, she sets off for Ethiopia, the place of her birth. Meanwhile, Mariama, a young girl in Africa, is forced to flee her home. She joins up with a caravan of misfits heading across the Sahara. She is taken in by Yemaya, a beautiful and enigmatic woman who becomes her protector and confidante. They are trying to reach Addis Abba, Ethiopia, a metropolis swirling with radical politics and rich culture. But Mariama will find a city far different than she ever expected—romantic, turbulent, and dangerous. As one heads east and the other west, Meena and Mariama’s fates are linked in ways that are mysterious and shocking to the core. Written with stunning clarity, deep emotion, and a futuristic flair, The Girl in the Road is an artistic feat of the first order: vividly imagined, artfully told, and profoundly moving.

From Cave Man to Cave Martian Manfred "Dutch" von Ehrenfried,2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a “Short Stay” Opposition Class mission to Mars as the first mission rather than the “Long Stay” concept requiring a mission that is too long, too dangerous and too costly for man’s first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is moreextensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.
