Marbled Paper Richard J. Wolfe, 1990 For 250 years after its introduction to Europe around 1600, the method of decorating paper known as marbling reigned supreme as the chief means of embellishing the fine work of hand-bookbinders. Richard J. Wolfe reconstructs the rise and fall of the craft and offers the most comprehensive account available of its history, techniques, and patterns. A publication of the A.S.W. Rosenbach Fellowship in Bibliography Series

Modelling and Numerics of Kinetic Dissipative Systems Lorenzo Pareschi, Giovanni Russo, 2006 The book is divided into three parts, which contain respectively recent results in the kinetic theory of granular gases, kinetic theory of chemically reacting gases, and numerical methods for kinetic systems. Part I is devoted to theoretical aspects of granular gases. Part II presents recent results on modelling of kinetic systems in which molecules can undergo binary collisions in presence of chemical reactions and/or in presence of quantum effects. Part III contains several contributions related to the construction of suitable numerical methods and simulations for granular gases.

Multiphase Flow S. Hernández, P. Vorobieff, 2020-06-03 The research included in this volume focuses on using synergies between experimental and computational techniques to gain a better understanding of all classes of multiphase and complex flow. The included papers illustrate the close interaction between numerical modellers and researchers working to gradually resolve the many outstanding issues in our understanding of multiphase flow. Recently multiphase fluid dynamics have generated a great deal of attention, leading to many notable advances in experimental, analytical and numerical studies. Progress in numerical methods has permitted the solution of many practical problems, helping to improve our understanding of the physics involved. Multiphase flows are found in all areas of technology and the range of related problems of interest is vast, including astrophysics, biology, geophysics, atmospheric process, and many areas of engineering.

Cultural Criticism Arthur Asa Berger,1995 Arthur Asa Berger's unique ability to translate difficult theories into accessible language makes this book an ideal introduction to cultural criticism. Berger covers the key theorists, concepts, and subject areas, from literary, sociological and psychoanalytical theories to semiotics and Marxism. *Cultural Criticism* breathes new life into the discipline by making these theories relevant to students' lives. The author illustrates his explanations with excerpts from classic works giving readers a sense of the important thinkers' styles and helping place them in their context. Berger also provides a comprehensive bibliography on cultural criticism for those who wish to explore the topics at greater length. *Cultural Criticism* is the perfect undergraduate supplemental text for such courses as media studies, literary criticism, and popular culture.

Combinatorial Pattern Matching Raffaele Giancarlo,Giovanni Manzini,2011-06-27 This book constitutes the refereed proceedings of the 22nd Annual Symposium on Combinatorial Pattern Matching, CPM 2011, held in Palermo, Italy, in June 2011. The 36 revised full papers presented together with 3 invited talks were carefully reviewed and selected from 70 submissions. The papers address issues of searching and matching strings and more complicated patterns such as trees, regular expressions, graphs, point sets, and arrays. The goal is to derive non-trivial combinatorial properties of such structures and to exploit these properties in order to either achieve superior performance for the corresponding computational problems or pinpoint conditions under which searches cannot be performed efficiently. The meeting also deals with problems in computational biology, data compression and data mining, coding, information retrieval, natural language processing and pattern recognition.

Globalization JoAnn Chirico,2013-08-01 *Globalization: Prospects and Problems*, by JoAnn Chirico, provides a comprehensive and enlightening

overview of globalization issues and topics. Emphasizing the theory and methods that social scientists employ to study globalization, the text reveals how macro globalization processes impact individual lives—from the spread of scientific discourse to which jobs are more or less likely to be offshored. The author presents a clear image of “the big globalization picture” by skillfully exploring, piece by piece, a myriad of globalization topics, debates, theories, and empirical data. Compelling chapters on theory, global civil society, democracy, cities, religion, institutions (sports, education, and health care), along with three chapters on global challenges, help readers develop a broad understanding of key topics and issues. Throughout the text, the author encourages readers to relate their personal experiences to globalization processes, allowing for a more meaningful and relevant learning experience.

The Rating of Chess Players, Past and Present Arpad E. Elo, 2008 One of the most extraordinary books ever written about chess and chessplayers, this authoritative study goes well beyond a lucid explanation of how today's chessmasters and tournament players are rated. Twenty years' research and practice produce a wealth of thought-provoking and hitherto unpublished material on the nature and development of high-level talent: Just what constitutes an exceptional performance at the chessboard? Can you really profit from chess lessons? What is the lifetime pattern of Grandmaster development? Where are the masters born? Does your child have master potential? The step-by-step rating system exposition should enable any reader to become an expert on it. For some it may suggest fresh approaches to performance measurement and handicapping in bowling, bridge, golf and elsewhere. 43 charts, diagrams and maps supplement the text. How and why are chessmasters statistically remarkable? How much will your rating rise if you work with the devotion of a Steinitz? At what age should study begin? What toll does age take, and when does it begin? Development of the performance data, covering hundreds of years and thousands of players, has revealed a fresh and exciting version of chess history. One of the many tables identifies 500 all-time chess greats, personal data and top lifetime performance ratings. Just what does government assistance do for chess? What is the Soviet secret? What can we learn from the Icelanders? Why did the small city of Plovdiv produce three Grandmasters in only ten years? Who are the untitled dead? Did Euwe take the championship from Alekhine on a fluke? How would Fischer fare against Morphy in a ten-wins match? It was inevitable that this fascinating story be written, ' asserts FIDE President Max Euwe, who introduces the book and recognizes the major part played by ratings in today's burgeoning international activity. Although this is the definitive

ratings work, with statistics alone sufficient to place it in every reference library, it was written by a gentle scientist for pleasurable reading -for the enjoyment of the truths, the questions, and the opportunities it reveals.
