Historical Racialized Toys in the United States Christopher P. Barton,Kyle Somerville,2016-04-14 This book explores the history of children’s toys and games bearing racial stereotypes, and the role these objects played in the creation and maintenance of structures of racialism and racism in the United States, from approximately 1865 to the 1930s. This time period is one in which the creation of structures of childhood and children’s socialization into race was fostered. Additionally, commodities, like toys, were didactic and disciplinary media in the creation, modification and reproduction of Victorian society. This volume: will shed light on issues of identity, ideology, and hegemony; will appeal to those interested in historical archaeology, critical theory, and constructions of racism and class, as well as material culture scholars, and antiques collectors; will be suitable for upper-level courses in historical archaeology, modern American history, and material culture studies.

Interactive Books Jacqueline Reid-Walsh,2017-09-27 Movable books are an innovative area of children’s publishing. Commonly equated with spectacular pop-ups, movable books have a little-known history as interactive, narrative media. Since they are hybrid artifacts consisting of words, images and movable components, they cross the borders between story, toy, and game. Interactive Books is a historical and comparative study of early movable books in relation to the children who engage with them. Jacqueline Reid-Walsh focuses on the period movable books became connected with children from the mid-17th to the early-19th centuries. In particular, she examines turn-up books, paper doll books, and related hybrid experiments like toy theaters and paignion (or domestic play set) produced between 1650 and 1830. Despite being popular in their own time, these artifacts are little known today. This study draws attention to a gap in our knowledge of children’s print culture by showing how these artifacts are important in their own right. Reid-Walsh combines archival research with children’s literature studies, book history, and juvenilia studies. By examining commercially produced and homemade examples, she explores the interrelations among children, interactive media, and historical participatory culture. By drawing on both Enlightenment thinkers and contemporary digital media theorists Interactive Books enables us to think critically about children’s media texts paper and digital, past and present.
