A Stolen Life Jaycee Dugard, 2011-07-12 A raw and powerful memoir of Jaycee Lee Dugard's own story of being kidnapped as an 11-year-old and held captive for over 18 years On 10 June 1991, eleven-year-old Jaycee Dugard was abducted from a school bus stop within sight of her home in Tahoe, California. It was the last her family and friends saw of her for over eighteen years. On 26 August 2009, Dugard, her daughters, and Phillip Craig Garrido appeared in the office of her kidnapper's parole officer in California. Their unusual behaviour sparked an investigation that led to the positive identification of Jaycee Lee Dugard, living in a tent behind Garrido's home. During her time in captivity, at the age of fourteen and seventeen, she gave birth to two daughters, both fathered by Garrido. Dugard's memoir is written by the 30-year-old herself and covers the period from the time of her abduction in 1991 up until the present. In her stark, utterly honest and unflinching narrative, Jaycee opens up about what she experienced, including how she feels now, a year after being found. Garrido and his wife Nancy have since pleaded guilty to their crimes.

Stargirl Jerry Spinelli,2004-05-11 ONE OF TIME MAGAZINE'S 100 BEST YA BOOKS OF ALL TIME • NEW YORK TIMES BESTSELLER A modern-day classic from Newbery Medalist Jerry Spinelli, this beloved celebration of individuality is now an original movie on Disney+! And don't miss the author's highly anticipated new novel, *Dead Wednesday!* *Stargirl*. From the day she arrives at quiet Mica High in a burst of color and sound, the hallways hum

with the murmur of “Stargirl, Stargirl.” She captures Leo Borlock’s heart with just one smile. She sparks a school-spirit revolution with just one cheer. The students of Mica High are enchanted. At first. Then they turn on her. Stargirl is suddenly shunned for everything that makes her different, and Leo, panicked and desperate with love, urges her to become the very thing that can destroy her: normal. In this celebration of nonconformity, Newbery Medalist Jerry Spinelli weaves a tense, emotional tale about the perils of popularity and the thrill and inspiration of first love. Don’t miss the sequel, *Love, Stargirl*, as well as *The Warden’s Daughter*, a novel about another girl who can’t help but stand out. “Spinelli is a poet of the prepubescent. . . . Mira Calligraphiae Monumenta Lee Hendrix, Thea Vignau-Wilberg, 2020-09-29 Now back in print, “the ultimate book-lover’s gift book” (Los Angeles Times) In 1561–62 the master calligrapher Georg Bocskay (died 1575), imperial secretary to the Holy Roman Emperor Ferdinand I, created *Mira calligraphiae monumenta* (Model Book of Calligraphy) as a demonstration of his own preeminence among scribes. Some thirty years later, Ferdinand’s grandson, the Emperor Rudolf II, commissioned Europe’s last great manuscript illuminator, Joris Hoefnagel (1542–1600), to embellish the work. The resulting book is at once a treasury of extraordinary beauty and a landmark in the cultural debate between word and image. Bocskay assembled a vast selection of contemporary and historical scripts for a work that summarized all that had been learned about writing to date—a testament to the universal power of the written word. Hoefnagel, desiring to prove the superiority of his art over Bocskay’s words, employed every resource of illusionism,

color, and form to devise all manner of brilliant grotesques, from flowers, fruit, insects, and animals to monsters and masks.

Unavailable for nearly a decade, this gorgeous volume features over 180 color illustrations, as well as scholarly commentary and biographies of both artists to inspire scholars, bibliophiles, graphic designers, typographers, and calligraphers.

Edible Insects Arnold van Huis, Food and Agriculture

Organization of the United Nations, 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body

of research on issues such as insect nutrition and food safety, the use of insects as animal feed, and the processing and preservation of insects and their products. It highlights the need to develop a regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of stakeholders. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.
