Science and Decisions National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Improving Risk Analysis Approaches Used by the U.S. EPA, 2009-03-24 Risk assessment has become a dominant public policy tool for making choices, based on limited resources, to protect public health and the environment. It has been instrumental to the mission of the U.S. Environmental Protection Agency (EPA) as well as other federal agencies in evaluating public health concerns, informing regulatory and technological decisions, prioritizing research needs and funding, and in developing approaches for cost-benefit analysis. However, risk assessment is at a crossroads. Despite advances in the field, risk assessment faces a number of significant challenges including lengthy delays in making complex decisions; lack of data leading to significant uncertainty in risk assessments; and many chemicals in the marketplace that have not been evaluated and emerging agents requiring assessment. *Science and Decisions* makes practical scientific and technical recommendations to address these challenges. This book is a complement to the widely used 1983 National Academies book, *Risk Assessment in the Federal Government* (also known as the Red Book). The earlier book established a framework for the concepts and conduct of risk assessment that has been adopted by numerous expert committees, regulatory agencies, and public health institutions. The new book embeds these concepts within a broader framework for risk-based decision-making. Together, these are essential references for those working in the regulatory and public health fields.

Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 *Drawing Futures* brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. *Drawing Futures* will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. *Drawing Futures* focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Land-use and Prehistory in South-East Spain A. Gilman, J. B. Thornes, 2014-10-24 Based on a major research programme, and originally published in 1985, this book looked to provide an economic foundation for reinterpreting the Neolithic-Bronze Age sequence of South-east Spain in terms of emergent social complexity. The cultural evolution of the area had already been considered in terms of influence from the eastern Mediterranean but this book uses site catchment analysis to give an economic baseline for all thirty-five of the better-known prehistoric settlements of the region. Site catchment analysis assumes that people minimised transport costs in production and that ancient and modern resource spaces correspond systematically. This research therefore studied modern land use and combined it with evidence from historical, archaeological and geomorphological investigation. The book shows the increasing social complexity evident in the archaeological record emerging as a result of progressive intensification of agricultural technique. Offering a complete coherent evolutionary model for the archaeological sequence of the region's prehistory, this book is a worthy in-depth study for prehistorians, geographers and anyone interested in the history of the western Mediterranean.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatised in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Encyclopedia of Play in Today's Society Rodney P. Carlisle, 2009-04-02 CHOICE Outstanding Academic Title for 2009 This ground-breaking resource is strongly recommended for all libraries and health and welfare institutional depots; essential for university collections, especially those catering to social studies programs. -Library Journal, STARRED Review Children and adults spend a great deal of time in activities we think of as play, including games, sports, and hobbies. Without thinking about it very deeply, almost everyone would agree that such activities are fun, relaxing, and entertaining. However, play has many purposes that run much deeper than simple entertainment. For children, play has various functions such as competition, following rules, accepting defeat, choosing leaders, exercising leadership, practicing adult roles, and taking risks in order to reap rewards. For adults, many games and sports serve as harmless releases of feelings of aggression, competition, and intergroup hostility. The *Encyclopedia of Play in Today's Society* explores the concept of play in history and modern society in the United States and internationally. Its scope encompasses leisure and recreational activities of children and adults throughout the ages, from dice games in the Roman Empire to video games today. With more than 450 entries, these two volumes do not include coverage of professional sports and sport teams but, instead, cover the hundreds of games played not to earn a living but as informal activity. All aspects of play—from learning to competition, mastery of nature, socialization, and cooperation—are included. Simply enough, this *Encyclopedia* explores play played for the fun of it! Key Features Available in both print and electronic formats Provides access to the fascinating literature that has explored questions of psychology, learning theory, game theory, and history in depth Considers the affects of play on child and adult development, particularly on health, creativity, and imagination Contains entries that describe both adult and childhood play and games in dozens of cultures around the world and throughout history Explores the sophisticated analyses of social thinkers such as Huizinga, Vygotsky, and Sutton-Smith, as well as the wide variety of games, toys, sports, and entertainments found around the world Presents cultures as diverse as the ancient Middle East, modern Russia, and China and in nations as far flung as India, Argentina, and France Key Themes Adult Games Board and Card Games Children's Games History of Play Outdoor Games and Amateur Sports Play and Education Play Around the World Psychology of Play Sociology of Play Toys and Business Video and Online Games For a subject we mostly consider light-hearted, play as a research topic has generated an extensive and sophisticated literature, exploring a range of penetrating questions. This two-volume set serves as a general, nontechnical resource for academics, researchers, and students alike. It is an essential addition to any academic library.

Drawing Architecture , 2013-10-18 We are in the second decade of the 21st century and, as with most things, the

distinction between digital and analogue has become tired and inappropriate. This is also true in the world of architectural drawing, which paradoxically is enjoying a renaissance supported by the graphic dexterity of the computer. This new fecundity has produced a contemporary glut of stunning architectural drawings and representations that could rival the most recent outpouring of architectural vision in the 1960s, 1970s and 1980s. Indeed, there is much to learn by comparing the then and the now. The contemporary drawing is often about its ability to describe the change, fluctuations and mutability of architecture in relation to the virtual/real 21st-century continuum of architectural space. Times have changed, and the status of the architectural drawing must change with them. This reassessment is well overdue, and this edition of AD will be the catalyst for such re-examination. Features the work of: Pascal Bronner, Bryan Cantley, Peter Cook, Perry Kulper, CJ Lim, Tom Noonan, Dan Slavinsky, Neil Spiller, Peter Wilson, Nancy Wolf, Lebbeus Woods and Mas Yendo. Contributors include: Nic Clear, Mark Garcia, Simon Herron and Mark Morris.

Towards a Nordic textile strategy David Palm, Maria Elander, David Watson, Nikola Kiørboe, Hanna Salmenperä, Helena Dahlbo, Katja Moliis, Kari-Anne Lyng, Clara Valente, Stefán Gíslason, Haben Tekie, Tomas Rydberg, 2014 This report is the primary outcome from Part I of the project “Towards a Nordic textile strategy – Collection, sorting, reuse and recycling of textiles” initiated by the Nordic Waste Group (NAG). The report for Part 2 will be published in December 2014. This report summarizes the work carried out in 2013. The three subreports will be the basis for the work to be performed in 2014. The reports for 2013 are: • International market survey of textile flows in the Nordic region and the market for collection, sorting, preparing for reuse, reselling and waste management of textiles. • Collection and sorting systems A total of 19 collection systems are compared for collection flows, contamination levels, cost, suitability of collected textile and availability for the consumer. Four sorting systems are described. • Technology review of sorting and recycling of textiles that describes available and future technology. The report is part of the Nordic Prime Ministers’ overall green growth initiative: “The Nordic Region – leading in green growth.” Read more in the web magazine “Green Growth the Nordic Way” at www.norden.org/greengrowth.

Cultural Industries and the Production of Culture Dominic Power, Allen J. Scott, 2004-08-05 Cutting-edge perspectives on the functioning of cultural industries are offered in this volume, which explores the media, entertainment and artistic sectors. Contributors place these industries in the new economy and suggest ways in which they can contribute to urban and regional economic and social development.

Recycling of Polymers Raju Francis, 2016-12-19 Recycling of Polymers This timely reference on the topic is the only book you need for a complete overview of recyclable polymers. Following an introduction to various polymer structures and their resulting properties, the main part of the book deals with different methods of recycling. It discusses in detail the recycling of such common polymers as polyethylene, polypropylene and PET, as well as rubbers, fibers, engineering polymers, polymer blends and composites. The whole is rounded off with a look at future technologies and the toxicological impact of recycled polymers. An indispensable reference source for those working in the field, whether in academia or industry, and whether newcomers or advanced readers.

This Time Together Carol Burnett, 2011-03-22 This touching and hilarious memoir is 100 percent Carol Burnett—funny, irreverent, and irresistible. Carol Burnett is one of the most beloved and revered actresses and performers in America. The Carol Burnett Show was seen each week by millions of adoring fans and won twenty-five Emmys in its remarkable eleven-year run. Now, in *This Time Together*, Carol really lets her hair down and tells one funny or touching or memorable story after another. In engaging anecdotes, Carol discusses her remarkable friendships with stars such as Jimmy Stewart, Lucille Ball, Cary Grant, and Julie Andrews; the background behind famous scenes, like the moment she swept down the stairs in her curtain-rod dress in the legendary “Went with the Wind” skit; and things that would happen only to Carol—the prank with Julie Andrews that went wrong in front of the First Lady; the famous Tarzan Yell that saved her during a mugging; and the time she faked a wooden leg to get served in a famous ice cream emporium. This poignant look back allows us to cry with the actress during her sorrows, rejoice in her successes, and finally, always, to laugh.

Animation and Advertising Malcolm Cook, Kirsten Moana Thompson, 2019-12-17 Throughout its history, animation has been fundamentally shaped by its application to promotion and marketing, with animation playing a vital role in advertising history. In individual case study chapters this book addresses, among others, the role of promotion and advertising for anime, Disney, MTV, Lotte Reiniger, Pixar and George Pal, and highlights American, Indian, Japanese, and European examples. This collection reviews the history of famous animation studios and artists, and rediscovers overlooked ones. It situates animated advertising within the context of a diverse intermedial and multi-platform media environment, influenced by print, radio and digital practices, and expanding beyond cinema and television screens into the workplace, theme park, trade expo and urban environment. It reveals the part that animation has played in shaping our consumption of particular brands and commodities, and assesses the ways in which animated advertising has both changed and been changed by the technologies and media that supported it, including digital production and distribution in the present day. Challenging the traditional privileging of art or entertainment over commercial animation, *Animation and Advertising* establishes a new and rich field of research, and raises many new questions concerning particular animation and media histories, and our methods for researching them.

Justice a Poem, 1774

Polyglot Notes Yuriy Ivantsiv, 2020-05-09 The practical manual clearly describes how to build your learning, how to develop your memory, why you forget how to develop your language skills to automatism, how to create a language environment for yourself, what a cultural shock is, and how to overcome it. As well as many other topical issues that people face when learning a language. Each person throughout his or her life has to deal with different cultures and languages one way or another. Knowledge of language greatly facilitates the interaction of a person with another type of culture, improves social status, provides career growth, provides great opportunities for self-expression and dissemination of ideas, opens up prospects for modern education, improves financial situation, contributes to the achievement of your goals and objectives. However, in the process of learning many people necessarily face difficulties, which they lack experience and necessary knowledge to overcome. This practical manual will become a desktop assistant for a large audience: for those who want to or are already learning a foreign language, do it alone or with a teacher, individually, in a group or educational institution (school, college, university, academy). The workshop will help to structure and organize your individual language learning process and will give you the opportunity to independently determine the methodology of learning a language that will be interesting and not burdensome. The title of the manual reflects its content: current issues and possible solutions. The material is presented in a concise and concrete manner. The methods presented in the book can be immediately applied in language practice. Each person can choose the method that is interesting and most adapted to him or her, as well as suitable to his or her pace and lifestyle, so that language learning becomes a natural and exciting process.

Use of Recycled Plastics in Eco-efficient Concrete Fernando Pacheco-Torgal, Jamal Khatib, Francesco

Colangelo,Rabin Tuladhar,2018-11-21 Use of Recycled Plastics in Eco-efficient Concrete looks at the processing of plastic waste, including techniques for separation, the production of plastic aggregates, the production of concrete with recycled plastic as an aggregate or binder, the fresh properties of concrete with plastic aggregates, the shrinkage of concrete with plastic aggregates, the mechanical properties of concrete with plastic aggregates, toughness of concrete with plastic aggregates, modulus of elasticity of concrete with plastic aggregates, durability of concrete with plastic aggregates, concrete plastic waste powder with enhanced neutron radiation shielding, and more, thus making it a valuable reference for academics and industrial researchers. Describes the main types of recycled plastics that can be applied in concrete manufacturing Presents, for the first time, state-of-the art knowledge on the properties of conventional concrete with recycled plastics Discusses the technological challenges for concrete manufactures for mass production of recycled concrete from plastic waste

Revolutionaries at Sony Reiji Asakura,2000 This is the story of Ken Kutaragi and how he gathered a team of colleagues and used corporate resources to bring his dream to fruition. It examines his passion for a change in technology, his work to sell the concept and how he kept the project alive.

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Sounds and the City B. Lashua,K. Spracklen,S. Wagg,2014-05-27 This book explores the ways in which Western-derived music connects with globalization, hybridity, consumerism and the flow of cultures. Both as local terrain and as global crossroads, cities remain fascinating spaces of cultural contestation and meaning-making via the composing, playing, recording and consumption of popular music.
