Stealing Cars John A. Heitmann, Rebecca H. Morales, Rebecca Morales, 2014-05 The technology-thwarting car thief has become as advanced as the cars themselves. As early as 1910 Americans recognized that cars were easy to steal and, once stolen, hard to find, especially since cars looked much alike. Model styles and colors eventually changed, but so did the means of making a stolen car disappear. Though changing license plates and serial numbers remain basic procedure, thieves have created highly sophisticated networks to disassemble stolen vehicles, distribute the parts, and/or ship the altered cars out of the country. Stealing cars has become as technologically advanced as the cars themselves. John A. Heitmann and Rebecca H. Morales's study of automobile theft and culture examines a wide range of related topics that includes motives and methods, technological deterrents, place and space, institutional responses, international borders, and cultural reflections. Only recently have scholars begun to move their focus away from the creators and manufacturers of the automobile to its users. *Stealing Cars* illustrates the power of this approach, as it aims at developing a better understanding of the place of the automobile in the broad texture of American life. There are many who are fascinated by aspects of automobile history, but many more readers enjoy the topic of crime—motives, methods, escaping capture, and of course solving the crime and bringing criminals to justice. *Stealing Cars* brings together expertise from the history of technology and cultural history as well as city planning and transborder studies to produce a compelling and detailed work that raises questions concerning American priorities and values. Drawing on sources that include interviews, government documents, patents, sociological and psychological studies, magazines, monographs,

scholarly periodicals, film, fiction, and digital gaming, Heitmann and Morales tell a story that highlights both human creativity and some of the paradoxes of American life.

Grand Theft Auto Vic Ferrari, 2020-06-15 You might be surprised to learn crime does pay, especially auto theft. During the 1990s, New York City was averaging over a hundred thousand vehicle thefts a year. New Yorkers accepted their fate, frequently finding empty parking spaces where their vehicles were parked the night before. Victims called the police, who took theft reports without offering much hope they would ever see their car again. The NYPD's Auto Crime Division is a hundred and twenty-member unit created to combat auto theft, stopping those who roam the streets at night looking to steal your vehicle. Most Americans have been the victim of some form of auto crime or know someone who has been. What they don't know is why, how, or who stole their vehicle, or what happens to it after it disappears. *Grand Theft Auto* peels back the curtain, exposing the nuts and bolts of the auto theft industry. Would you believe a pair of nuns stole Mother Superior's car to go on a wild shopping spree in the Bronx? Or the double-dealing confidential informant who helped recover Mike Tyson's stolen motorcycle minutes before it was shipped out of the country? What about the diplomat's husband who drove around Manhattan in a stolen Mercedes? Or the silver-tongued three-hundred-pound car thief who managed to stay one step ahead of the law? Retired detective Vic Ferrari shares his unique insight and colorful stories from his days assigned to the New York City Police Department's Auto Crime Division. If you enjoy Live PD, are fascinated with police work, or want to know who stole your car, you've picked up the right book. Vic Ferrari, author of *NYPD: Through the Looking Glass: Stories From Inside America's Largest Police Department* and *The*

NYPD's Flying Circus: Cops, Crime & Chaos, and Dickheads & Debauchery and Other Ingenious Ways to Die is a retired New York City Police Department detective with over twenty years of experience in the auto theft industry.

Historical Stock Car Models Chuck Poi, 2016-01-30 Stock car racing history from 1950 through the early '70's with emphasis on the first two eras of factory involvement. Over 60 models of actual stock car racers show how these cars started out as basically stock vehicles and eventually changed to the purpose built race cars by the late '60's. There are three pictures of each car showing the whole vehicle, the engine, and the chassis. Besides NASCAR, there are vehicles that raced in AAA, USAC, ARCA, & IMCA. There are also two cars that raced in the 1952 Mexican Road Race, and two that raced in what was called the Permatex race at Daytona. Many of the models are cars raced by drivers before they became famous. Still other cars are those that were driven by men who never visited victory lane, but still raced to the best level that they and their car were capable of. There is a history of each car and also a narrative describing the model itself. This book pays tribute and recognizes the men that built and raced these cars.

Understanding and Preventing Car Theft Michael G. Maxfield, R. V. G. Clarke, 2004-01-01 Thefts of and from autos are among the most commonly reported crimes, and they account for the highest losses among property crimes that target individuals (except for arson). But according to this new book, recent initiatives in the U.S., Europe and Australia have proven effective or are showing promise in preventing car theft.

The Killing Consensus Graham Denyer Willis, 2015-03-21 We hold many assumptions about police work—that it is the responsibility of the state, or that police officers are given the right to kill in the name

of public safety or self-defense. But in *The Killing Consensus*, Graham Denyer Willis shows how in São Paulo, Brazil, killing and the arbitration of 'normal' killing in the name of social order are actually conducted by two groups—the police and organized crime—both operating according to parallel logics of murder. Based on three years of ethnographic fieldwork, Willis's book traces how homicide detectives categorize two types of killing: the first resulting from 'resistance' to police arrest (which is often broadly defined) and the second at the hands of a crime family' known as the *Primeiro Comando da Capital* (PCC). Death at the hands of police happens regularly, while the PCC's centralized control and strict moral code among criminals has also routinized killing, ironically making the city feel safer for most residents. In a fractured urban security environment, where killing mirrors patterns of inequitable urbanization and historical exclusion along class, gender, and racial lines, Denyer Willis's research finds that the city's cyclical periods of peace and violence can best be understood through an unspoken but mutually observed consensus on the right to kill. This consensus hinges on common notions and street-level practices of who can die, where, how, and by whom, revealing an empirically distinct configuration of authority that Denyer Willis calls sovereignty by consensus.

Santino, 2016-04-30 This is an edited volume of approximately 17 essays that deal with various types of spontaneous shrines and other, related public memorializations of death. Stereotypes and Violence Oliver Betts, Andrew Fuyarchuk, Biba Hadziavdic, Hilde Hoffmann, Barbara Manthe, Benjamin Nickl, Bojan Perovic, Sylvia Sadzinski, Victoria Shmidt, 2017-04-20 Stereotypes are dangerous, especially when they are used by demagogues. Slogans, which remind the historian of darker times in human history, however, reappear again in a growing number. As companions of the rise of right wing forces in Europe they make up ground in more and more regions and gain momentum in the political debate. It consequently seems to be more than important to focus on and closer analyze the interrelationship between stereotypes and violence in modern societies. The fourth volume of *Global Humanities* tries to achieve such a broader analysis and provides reading in the fields of history, political

science, gender and media studies. The authors show and emphasize in which ways the two above named factors are interacting with each other and influencing the popular opinion in modern nation states. Topics that are covered include Anti-Italian riots in Zurich at the end of the 19th century, a discussion of the interrelationship of racism and violence in Germany since the 1980s, and an analysis of gender based violence in Serbia. In addition, the persistence of stereo types in entertainment is closely studied by taking a look on Sinti and Roma depictions in current European films.

The War of Words Harold James, 2021 A timely call for recovering the true meanings of the nineteenth-century terms that are hobbling current political debates Masterful. . . . James cuts through the tangled terminological and conceptual jungle of modern globalist discourse . . . [with] fascinating discussions of the origins and meanings of the words.--G. John Ikenberry, Foreign Affairs James delves into the often-surprising intellectual origins of key concepts in the arguments about globalisation--and illuminates the debate in the process.--Gideon Rachman, Financial Times, Best Books of 2021: Politics Nationalism, conservatism, liberalism, socialism, and capitalism are among the most fiercely debated ideas in contemporary politics. Since these concepts hark back to the nineteenth century, much of their nuanced meaning has been lost, and the words are most often used as epithets that short-circuit productive discussion. In this insightful book, Harold James uncovers the origins of these concepts and examines how the problematic definition and meaning of each term has become an obstacle to respectful communication.

Noting that similar linguistic misunderstandings accompany such newer ideas as geopolitics, neoliberalism, technocracy, and globalism, James argues that a rich historical knowledge of the vocabulary surrounding globalization, politics, and economics--particularly the meaning and the usefulness that drove the original conceptions of the terms--is needed to negotiate the gaps between different understandings and make fruitful political debate once again possible.

The Short Stories of Langston Hughes Langston Hughes, 1997-08-15 The Short Stories of Langston Hughes This collection of forty-seven stories written between 1919 and 1963--the most comprehensive available--showcases Langston Hughes's literary blossoming and the development of his personal and artistic concerns. Many of the stories assembled here have long been out of print, and others never before collected. These poignant, witty, angry, and deeply poetic stories demonstrate Hughes's uncanny gift for elucidating the most vexing questions of American race relations and human nature in general.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
