Earthen Architecture in Muslim Cultures Stéphane Pradines,2018-09-11 Until recently little collective attention has been paid to earthen architecture within Muslim cultures.This book endeavours to share knowledge and methods of different disciplines such as history, anthropology, archaeology and architecture.

Architecture Francis D. K. Ching,2012-07-16 A superb visual reference to the principles of architecture Now including interactive CD-ROM! For more than thirty years, the beautifully illustrated Architecture: Form, Space, and Order has been the classic introduction to the basic vocabulary of architectural design. The updated Third Edition features expanded sections on circulation, light, views, and site context, along with new considerations of environmental factors, building codes, and contemporary examples of form, space, and order. This classic visual reference helps both students and practicing architects understand the basic vocabulary of architectural design by examining how form and space are ordered in the built environment.? Using his trademark meticulous drawing, Professor Ching shows the relationship between fundamental elements of architecture through the ages and across cultural boundaries. By looking at these seminal ideas, Architecture: Form, Space, and Order encourages the reader to look critically at the built environment and promotes a more evocative understanding of architecture. In addition to updates to content and many of the illustrations, this new edition includes a companion CD-ROM that brings the book's architectural concepts to life through three-dimensional models and animations created by Professor Ching.

A Pattern Language Christopher Alexander,2018-09-20 You can use this book to design a house for yourself with your family; you can use it to work with your neighbors to improve your town and neighborhood; you can use it to design an office, or a workshop, or a public building. And you can use it to guide you in the actual process of construction. After a ten-year silence, Christopher Alexander and his colleagues at the Center for Environmental Structure are now publishing a major statement in the form of three books which will, in their words, lay the basis for an entirely new approach to architecture, building and planning, which will we hope replace existing ideas and practices entirely. The three books are The Timeless Way of Building, The Oregon Experiment, and this book, A Pattern Language. At the core of these books is the idea that people should design for themselves their own houses, streets, and communities. This idea may be radical (it implies a radical transformation of the architectural profession) but it comes simply from the observation that most of the wonderful places of the world were not made by architects but by the people. At the core of the books, too, is the point that in designing their environments people always rely on certain languages, which, like the languages we speak, allow them to articulate and communicate an infinite variety of designs within a forma system which gives them coherence. This book provides a language of this kind. It will enable a person to make a design for almost any kind of building, or any part of the built environment. Patterns, the units of this language, are answers to design problems (How high should a window sill be? How many stories should a building have? How much space in a neighborhood should be devoted to grass and trees?). More than 250 of the patterns in this pattern language are given: each consists of a problem statement, a discussion of the problem with an illustration, and a solution. As the authors say in their introduction, many of the patterns are archetypal, so deeply rooted in the nature of things that it seems likely that they will be a part of human nature, and human action, as much in five hundred years as they are today.

In the Shadow of the Church Mattia Guidetti,2016-11-07 In his book In the Shadow of the Church: The Building of Mosques in Early Medieval Syria Mattia Guidetti explains how late antique church architecture influenced the rise of Islamic religious architecture in the Syrian region.

Lateness and Modernity in Medieval Architecture Alice Isabella Sullivan,Kyle G. Sweeney,2023 This volume engages with notions of lateness and modernity in medieval architecture, broadly conceived geographically, temporally, methodologically, and theoretically. It aims to (re)situate secular and religious buildings from the 14th through the 16th centuries that are indebted to medieval building practices and designs, within the more established narratives of art and architectural history.

The Building of Vṛndāvana Kiyokazu Okita,Rembert Lutjeharms,2023-12-28 The small town of Vṛndāvana is today one of the most vibrant places of pilgrimage in northern India. Throngs of pilgrims travel there each year to honour the sacred land of Kṛṣṇa's youth and to visit many of its temples. The Building of Vṛndāvana explores the complex history of this town's early modern origins. Bringing together scholars from various disciplines to examine history, architecture, art, ritual, theology, and literature in this pivotal period, the book examines how these various disciplines were used to create, develop, and map Vṛndāvana as the most prominent place of pilgrimage for devotees of Kṛṣṇa. Contributors are: Guy L. Beck, Måns Broo, David Buchta, John Stratton Hawley, Barbara A. Holdrege, Rembert Lutjeharms, Cynthia D. Packert, and Heidi Pauwels.

The Architecture of the Ancient Greek Theatre Rune Frederiksen,Elizabeth R. Gebhard,Alexander Sokolicek,2015-12-01 This book is a collection of papers following the conference The Architecture of the Ancient Greek Theatre, held in Athens in January 2012. Fundamental publications on the topic have not been issued for many years. Bringing together the leading experts on theatre architecture, this conference aimed at introducing new facts and important comprehensive studies on Greek theatres to the public. The published volume is, first of all, a presentation of new excavation results and new analyses of individual monuments. Many well-known theatres such as the one of Dionysos in Athens, and others at Dodone, Corinth, and Sikyon have been re-examined since their original publication, with stunning results. New research, presented in this volume, includes moreover less well known, or even newly found, ancient Greek theatres in Albania, Asia Minor, Cyprus, and Sicily. Further studies on the history of research, on regional theatrical developments, terminology, and function, as well as a perspective on Roman theatres built in Greek traditions make this volume a comprehensive volume of new research for expert scholars as well as for students and the interested public.

Graphic History of Architecture John Mansbridge,1967 This pictorial survey of Western architecture, covering ancient Egyptian times to the present, contains two thousand drawings of buildings, ground plans, and architectural details. The book includes maps, time-charts, and a very brief text.

Experiencing Architecture, second edition Steen Eiler Rasmussen,1964-03-15 A classic examination of superb design through the centuries. Widely regarded as a classic in the field, *Experiencing Architecture* explores the history and promise of good design. Generously illustrated with historical examples of designing excellence—ranging from teacups, riding boots, and golf balls to the villas of Palladio and the fish-feeding pavilion of Beijing's Winter Palace—Rasmussen's accessible guide invites us to appreciate architecture not only as a profession, but as an art that shapes everyday experience. In the past, Rasmussen argues, architecture was not just an individual pursuit, but a community undertaking. Dwellings were built with a natural feeling for place, materials and use, resulting in “a remarkably suitable comeliness.” While we cannot return to a former age, Rasmussen notes, we can still design spaces that are beautiful and useful by seeking to understand architecture as an art form that must be experienced. An understanding of good design comes not only from one's professional experience of architecture as an abstract, individual pursuit, but also from one's shared, everyday experience of architecture in real time—its particular use of light, color, shape, scale, texture, rhythm and sound. *Experiencing Architecture* reminds us of what good architectural design has accomplished over time, what it can accomplish still, and why it is worth pursuing. Wide-ranging and approachable, it is for anyone who has ever wondered “what instrument the architect plays on.”
