**Arthrogryposis** Lynn T. Staheli,1998-04-28 The term arthrogryposis describes a range of congenital contractures that lead to childhood deformities. It encompasses a number of syndromes and sporadic deformities that are rare individually but collectively are not uncommon. Yet, the existing medical literature on arthrogryposis is sparse and often confusing. The aim of this book is to provide individuals affected with arthrogryposis, their families, and health care professionals with a helpful guide to better understand the condition and its therapy. With this goal in mind, the editors have taken great care to ensure that the presentation of complex clinical information is at once scientifically accurate, patient oriented, and accessible to readers without a medical background. The book is authored primarily by members of the medical staff of the Arthrogryposis Clinic at Children's Hospital and Medical Center in Seattle, Washington, one of the leading teams in the management of the condition, and will be an invaluable resource for both health care professionals and families of affected individuals.

**The Smartest Book in the World** Greg Proops,2015-05-05 From the bold, beloved comic and podcast star Greg Proops comes a "terrifically random appreciation of cultural touchstones" (Publishers Weekly) that is electrifying, thought-provoking, and unrelenting, full of rapid-fire references, historical name-checking, Satchel Paige bon mots, and genuine wisdom. Greg Proops is an internationally renowned comedian, best known for starring on the hit improv-comedy show *Whose Line Is It Anyway?* and for his popular award-winning podcast, "The Smartest Man in the World," which Rolling Stone called "some of the boldest comedy on the podcasting frontier right now." But Proops is also a fountain of historical knowledge, a wealth of pop culture trivia, and a generally charming know-it-all. The Smartest Book in the World is a rollicking reference guide to the most essential areas of knowledge in Proops's universe, from history's juiciest tales and curious backstories to the movies you must see and the albums you must hear. Full of eclectic and humorous knowledge, it is a concentrated collection and comic cultural dictionary of the essential Proops topics including poetry, proper punctuation, and Satchel Paige, all delivered with his signature style, making the full Proops experience complete. So if you're stuck wondering why Alexander was so Great (well, he did conquer the world), which cinema bombshell would be the best shortstop (Hedy Lamarr, of course), what great work of art would be the best to steal (not that you would), or the finest way to prepare vodka-flavored vodka (add vodka), don't fret, pumpkin butter—The Smartest Book in the World has what you need right now.

**WHO consolidated guidelines on tuberculosis. Module 4** World Health Organization,2022-04-30 Between 2011 and 2019, WHO has developed and issued evidence-based policy recommendations on the treatment and care of patients with DR-TB. These policy recommendations have been presented in several WHO documents and their associated annexes, including the WHO Consolidated Guidelines on Drug Resistant Tuberculosis Treatment, issued by WHO in March 2019. The policy recommendations in each of these guidelines have been developed by WHO-convened Guideline Development Groups, using the GRADE (Grading of Recommendations, Assessment, Development and Evaluation) approach to summarize the evidence, and formulate policy recommendations and accompanying remarks. The present WHO Consolidated Guidelines on Tuberculosis, Module 4: Treatment - Drug-Resistant Tuberculosis Treatment includes a comprehensive set of WHO recommendations for the treatment and care of DR-TB. The document includes two new recommendations, one on the composition of shorter regimens and one on the use of the BPaL regimen (i.e. bedaquiline, pretomanid and linezolid). In addition, the consolidated guidelines include existing recommendations on treatment regimens for isoniazid-resistant TB and MDR/RR-TB, including longer regimens, culture monitoring of patients on treatment, the timing of antiretroviral therapy (ART) in MDR/RR-TB patients infected with the human immunodeficiency virus (HIV), the use of surgery for patients receiving MDR-TB treatment, and optimal models of patient support and care. The guidelines are to be used primarily in national TB programmes, or their equivalents in Ministries of Health, and for other policy-makers and technical organizations working on TB and infectious diseases in public and private sectors and in the community.

**The Community Resilience Reader** Daniel Lerch,2017-10-12 National and global efforts have failed to stop climate change, transition from fossil fuels, and reduce inequality. We must now confront these and other increasingly complex problems by building resilience at the community level. The Community Resilience Reader combines a fresh look at the challenges humanity faces in the 21st century, the essential tools of resilience science, and the wisdom of activists, scholars, and analysts working on the ground to present a new vision for creating resilience. It shows that resilience is a process, not a goal; how it requires learning to adapt but also preparing to transform; and that it starts and ends with the people living in a community. From Post Carbon Institute, the producers of the award-winning The Post Carbon Reader, The Community Resilience Reader is a valuable resource for

community leaders, college students, and concerned citizens.

**Ecosemiotics** Timo Maran,2020-12-10 This Element provides an accessible introduction to ecosemiotics and demonstrates its pertinence for the study of today's unstable culture-nature relations. Ecosemiotics can be defined as the study of sign processes responsible for ecological phenomena. The arguments in this Element are developed in three steps that take inspiration from both humanities and biological sciences: 1) Showing the diversity, reach and effects of sign-mediated relations in the natural environment from the level of a single individual up the functioning of the ecosystem. 2) Demonstrating numerous ways in which prelinguistic semiotic relations are part of culture and identifying detrimental environmental effects that self-contained and purely symbol-based sign systems, texts and discourses bring along. 3) Demonstrating how ecosemiotic analysis centred on models and modelling can effectively map relations between texts and the natural environment, or the lack thereof, and how this methodology can be used artistically to initiate environmentally friendly cultural forms and practices.

**Handbook of Ecological Economics** Joan Martínez-Alier,Roldan Muradian,2015-09-25 This Handbook provides an overview of major current debates, trends and perspectives in ecological economics. **Podcasting** Dario Llinares,Neil Fox,Richard Berry,2018-07-24 Podcasting: New Aural Cultures and Digital Media is the first comprehensive interdisciplinary collection of academic research exploring the definition, status, practices and implications of podcasting through a Media and Cultural Studies lens. By bringing together research from experienced and early career academics alongside audio and creative practitioners, the chapters in this volume span a range of approaches in a timely reaction to podcasting’s zeitgeist moment. In conceptualizing the podcast, the contributors examine its liminal status between the mechanics of ‘old’ and ‘new’ media and between differing production contexts, in addition to podcasting’s reliance on mainstream industrial structures whilst retaining an alternative, even outsider, sensibility. In the present tumult of online media discourse, the contributors frame podcasting as indicative of a ‘new aural culture’ emerging from an identifiable set of industrial, technological and cultural circumstances. The analyses in this collection offer a range of interpretations which begin to open avenues for further research into a distinct Podcast Studies.
