Guidelines for Applying Protected Area Management Categories Nigel Dudley,2008 IUCN's Protected Areas Management Categories, which classify protected areas according to their management objectives, are today accepted as the benchmark for defining, recording, and classifying protected areas. They are recognized by international bodies such as the United Nations as well as many national governments. As a result, they are increasingly being incorporated into government legislation. These guidelines provide as much clarity as possible regarding the meaning and application of the Categories. They describe the definition of the Categories and discuss application in particular biomes and management approaches.

The Playground of Europe Leslie Stephen,1909

Mountain Gloom and Mountain Glory Marjorie Hope Nicolson, 1997 To English poets and writers of the seventeenth century, as to their predecessors, mountains were ugly protuberances which disfigured nature and threatened the symmetry of earth; they were symbols God's wrath. Yet, less than two centuries later the romantic poets sang in praise of mountain splendor, of glorious heights that stirred their souls to divine ecstasy. In this very readable and fascinating study, Marjorie Hope Nicolson considers the intellectual renaissance at the close of the seventeenth century that caused the shift from mountain gloom to mountain glory. She examines various writers from the seventeenth, eighteenth, and nineteenth centuries and traces both the causes and the process of this drastic change in perception.

Immunity of International Organizations , 2015-06-19 Immunity for international organizations and their staff, while long considered necessary to their functioning, has fallen under scrutiny and criticism in practice. These contributions, originally prepared for a conference held at Leiden University in June 2013, are re-published here in celebration of the 10th anniversary of the International Organizations Law Review.

Rationality in the Social Sciences Helmut Staubmann, Victor Lidz, 2017-11-30 This volume presents for the first time a collection of historically important papers written on the concept of rationality in the social sciences. In 1939-40, the famed Austrian economist Joseph A. Schumpeter and the famous sociologist Talcott Parsons convened a faculty seminar at Harvard University on the topic of rationality. The first part includes their essays as well as papers by the Austrian phenomenologist Alfred Schütz, the sociologist Wilbert Moore, and the economist Rainer Schickele. Several younger economists and sociologists with bright futures also participated, including Alex Gerschenkron, John Dunlop, Paul M. Sweezy, and Wassily W. Leontief, who was later awarded the Nobel Prize for developing input-output analysis. The second part presents essays and commentaries written by today's internationally noted social scientists and addressing the topic of rationality in social action from a broad range of perspectives. The book's third and final part shares the recently discovered correspondence between the seminar principals regarding the original but failed plan to publish its proceedings. It also includes letters, not previously published, between Richard Grathoff, Walter M. Sprondel and Talcott Parsons on the rationality seminar and the exchanges between Parsons and Schütz.

Bayesian Networks and Influence Diagrams: A Guide to Construction and Analysis Uffe B. Kjærulff, Anders L. Madsen, 2012-11-30 Bayesian Networks and Influence Diagrams: A Guide to Construction and Analysis, Second Edition, provides a comprehensive guide for practitioners who wish to understand, construct, and analyze intelligent systems for decision support based on probabilistic networks. This new edition contains six new sections, in addition to fully-updated examples, tables, figures, and a revised appendix. Intended primarily for practitioners, this book does not require sophisticated mathematical skills or deep understanding of the underlying theory and methods nor does it discuss alternative technologies for reasoning under uncertainty. The theory and methods presented are illustrated through more than 140 examples, and exercises are included for the reader to check his or her level of understanding. The techniques and methods presented for knowledge elicitation, model construction and verification, modeling techniques and tricks, learning models from data, and analyses of models have all been developed and refined on the basis of numerous courses that the authors have held for practitioners worldwide.

Values of American Society Talcott Parsons, Winston White, 2016 The material in *Values of American Society* remains the principal resource for understanding Parsons' conception of value systems. His treatment of value systems has been much debated, although poorly understood, in considerable part because Parsons never published his full conception, developed only in these manuscripts. They continue to hold interest for social scientists, both for their carefully developed analytical scheme and for the resulting discussion of American culture and society. Your Creative Power Alex Osborn, 2008-11 YOUR CREATIVE POWER How to Use Imagination BY ALEX OSBORNSf CHARLES SCRIMERS SOWS, MEW YORK CHARLES SCWBNER SONS, Ltd., LONDON 1948 This book is dedicated to BRUCE BARTON in appreciation of our 30 years as partners and friends . . . A. F. O. ABOUT THE AUTHOR . . . by Samuel Hopkins Adams Hamilton College graduates have the habit of keeping an attentive eye upon their fellow alumni. Thus, although he graduated eighteen years after me, I knew of Alex Osborn long before he had any inkling of my interest. There was another Alex in that able class of 1909, Alex antler Woollcott, whom I had sponsored into a newspaper job upon his graduation. Only a few years thereafter he was a notable in the newspaper and theatre worlds. About the time of his early success, we met at the home of Laurette

Taylor, where one met everybody. Aleck buttonholed me What do you know about my classmate Alex Osborn Nothing I answered. Weil, youd better. Why What am I supposed to do about this Osborn Nothing, Nobody has to do anything about him. Hell do it, himself AH right I said. Im open to conviction. What is he doing Aleck was a bit vague about that. His friend and class mate had been teacher, reporter, had taken a shot at maga zine writing, had touched upon banking and a few other lines, and was something in factory management. It isnt what hes doing its what he fe Woollcott insisted. When the subject next came up between us, Alex Osborn was well on his way to becoming head of the great advertis ing firm of Batten, Barton, Durstine and Osborn, and I had come to know and admire him personally as one of the most versatile, vigorous, and provocative minds among my wide range of acquaintances, His classmate recalled tome our conversation of years before. What clo you think of Osborn now he demanded with rather the air of having patented, or, at least, invented him. You were right I admitted, I am always right, said Aleck Woollcott blandly ix ABOUT THE BOOK . . . hy Alex Osborn Ten years ago, the editor of a leading magazine invited me to lunch. I had been one of his contributors, but we had never met. lie broke the ice by asking, What is your hobby, Mr. Osborn Imagination, I replied. He paused, then wrote on the back of an envelope, u Mv HOBBY Is IMAGINATION. Mr. Osborn, he said, you must do a book on that. Its a job that has been waiting to be done all these years. There is no subject of greater importance. You must give it the time and energy and thoroughness it deserves. That remark started this book. Although I earned my masters degree in practical psy chology and have devotee most of my life to the psychology of advertising, I cannot claim to be a psychologist. Nor have I tried to write as a psychologist, I have felt free to take figurative liberties with academic concepts. For instance, I realize that imagination is an integral part of mans mind fxxly function and yet, for the sake of clarity and read ability, I refer to imagination as if it were an entity of itself. My frequent use of the term brainstorm may bother the reader at first. Although Chapter 33 will fully explain, an inkling of its meaning may be helpful here Brainstorm is used mainly to label the kind of conference where a few people sit clown together for an hour or so solely to use their creative imaginations solely to suggest ideas on a specific . subject right then and there. During the past ton years, in quest of material andinsight, -I have interviewed hundreds of people and have read hun dreds of books, speeches and articles, I am indebted to all who talked with me and to all whose writings I read. Many of their names will be found in the index, My .. special thanks go to those whose books were most helpful, and this list includes Julius Boraas Teaching to Think, Alexis Carrel Man the Unknown, James B, Conant xi xfi On C ndfer standing Science, Robert P...

Something to Hide Deborah Moggach,2016-05-03 “Classic Moggach: readable, memorable . . . an unashamedly colorful journey across continents, with clothes, food, landscapes brought joyously to life.” —The Times (London) “Nobody in the world knows our secret . . . that I’ve ruined Bev’s life, and she’s ruined mine.” Petra’s romantic life has always been a car crash, and even in her sixties she’s still getting it disastrously wrong. And then she falls in love with Jeremy, an old friend visiting from abroad. There’s just one catch: Jeremy is married to her best friend, Bev. Meanwhile, on opposite sides of the world, two other women are also struggling with the weight of betrayal: Lorrie, a Texan, is about to embark on the biggest deception of her life, and in China, Li Jing is trying to understand exactly what it is her husband does on his business trips. It turns out that no matter where you are in the world or how well you think you know the one you love, everyone has secrets.

Sacred Mountains of the World Edwin Bernbaum,2022-03-10 From the Andes to the Himalayas, mountains have an extraordinary power to evoke a sense of the sacred. In the overwhelming wonder and awe that these dramatic features of the landscape awaken, people experience something of deeper significance that imbues their lives with meaning and vitality. Drawing on his extensive research and personal experience as a scholar and climber, Edwin Bernbaum's *Sacred Mountains of the World* takes the reader on a fascinating journey exploring the role of mountains in the mythologies, religions, history, literature, and art of cultures around the world. Bernbaum delves into the spiritual dimensions of mountaineering and the implications of sacred mountains for environmental and cultural preservation. This beautifully written, evocative book shows how the contemplation of sacred mountains can transform everyday life, even in cities far from the peaks themselves. Thoroughly revised and updated, this new edition considers additional sacred mountains, as well as the impacts of climate change on the sacredness of mountains.

Organizing Bronze Age Societies Timothy Earle,Kristian Kristiansen,2010-08-30 The Bronze Age was a formative period in European history when the organisation of landscapes, settlements, and economy reached a new level of complexity. This book presents the first in-depth, comparative study of household economy and settlement in three micro-regions: the Mediterranean (Sicily), Central Europe (Hungary), and Northern Europe (South Scandinavia). The results are based on ten years of fieldwork in a similar method of documentation, and scientific analyses were used in each of the regional studies, making controlled comparisons possible. The new evidence demonstrates how differences in settlement organisation and household

economies were counterbalanced by similarities in the organised use of the landscape in an economy dominated by the herding of large flocks of sheep and cattle. This book's innovative theoretical and methodological approaches will be of relevance to all researchers of landscape and settlement history.
