Cave of the Winds Joseph R. Chambers, 2014

American Women and Flight since 1940 Deborah G.

Douglas, 2014-07-11 Women run wind tunnel experiments, direct air traffic, and fabricate airplanes. American women have been involved with flight from the beginning, but until 1940, most people believed women could not fly, that Amelia Earhart was an exception to the rule. World War II changed everything. It is on the record that women can fly as well as men, stated General Henry H. Arnold, commanding general of the Army Air Forces. The question became Should women fly? Deborah G. Douglas tells the story of this ongoing debate and its impact on American history. From Jackie Cochran, whose perseverance led to the formation of the Women's Army Service Pilots (WASP) during World War II to the recent achievements of Jeannie Flynn, the Air Force's first woman fighter pilot and Eileen Collins, NASA's first woman shuttle commander, Douglas introduces a host of determined women who overcame prejudice and became military fliers, airline pilots, and air and space engineers. Not forgotten are stories of flight attendants, air traffic controllers, and mechanics. *American Women and Flight since 1940* is a revised and expanded edition of a Smithsonian National Air and Space Museum reference work. Long considered the single best reference work in the field, this new edition contains extensive new illustrations and a comprehensive bibliography.

United States Naval Aviation, 1919-1941 E.R.

Johnson, 2011-04-29 Within six months of the devastating attack on Pearl Harbor, the U.S. Navy had checked the Japanese military advance in the Pacific to the extent that the United States could return to its original "Defeat Germany First" strategy. That the Navy was able to accomplish this feat with only six fleet aircraft carriers and little more than 1,000 combat aircraft was not sheer luck but the culmination of more than two decades of determined preparation. This thorough study, with detailed drawings and

photographs, explains and illustrates the trial and error process which went into developing the aircraft, airships and ships of the interwar period. The critical factors that shaped Naval Aviation after World War I—naval treaties, fleet tactics, government programs, leadership and organization, as well as the emergence of Marine Corps and Coast Guard aviation—are discussed in depth.

Revolutionary Atmosphere Robert S. Arrighi, Nasa History Division, 2011-03-01 NASA SP 2010-4319. NASA History Series. This scholarly look at the Altitude Wind Tunnel covers the transformations the wind tunnel made in its long history from a wind tunnel doing full-scale testing for wartime applications, to a vacuum chamber supporting the Vision for Space Exploration, and even a brief period as home to Mercury astronaut training. The book also addresses the attempts to resurrect the facility and its eventual decommissioning and demolition.

Rotax 912 Engine Introduction Paul Hamilton, 2013 This DVD by Paul Hamilton provides tips and techniques for trouble-free operation of a Light-Sport Aircraft (LSA) with a ROTAX 912 engine and provides an introduction to important aspects of maintaining the 912 and 912S. Based on years of operational and maintenance experience, industry-recognized experts Phil Lockwood and Dean Vogel outline typical procedures every owner, operator and mechanic should know. Learn about vital engine fluids, selecting fuel and proper filters, coolant options, cold weather operations, as well as how and when to check and change the oil. Gain insight on cold weather operations and dual carburetor synchronization for avoiding engine clattering, prolonging engine life, and reducing maintenance costs. This new edition also addresses an oil pressure sensor update, best types of oil to use, frequency of oil changes, tips on finding updated Rotax information, automobile gas and avgas options, and extended TBO (time before overhaul) information. If you fly, operate, or work on a ROTAX 912 engine, this DVD is a must have to ensure proper maintenance and safe operation. Approximate running time 68 minutes, plus 28 minutes of extras.

High-speed Wind Tunnels Luigi Crocco, 1946 The

importance assumed in recent times by experimental supersonic wind tunnels, as well as the power required, has brought about the need for a study which would permit a comparison of the types tested and the principal theoretical plans.

Build 'Em by the Mile, Cut 'Em Off by the Yard Steve Gilford, 2011-10-01 This book is about a time when millions of Americans put their hearts, minds, and bodies into a clearly recognized goal, defeating the forces of Germany and Japan. The stories of the people who accomplished this are a reminder of the potential of this nation to rise up and meet a challenge. The Second World War is long over [but] once again, vital challenges face us. When they seem overwhelming and when the task seems as though it might be too much for us, we can turn to the example of America's World War II home front and in particular to the Kaiser Shipyards in Richmond, California. - Congressman George Miller

A Wasp Among Eagles Ann Carl, 2013-06-04 Before World War II most Americans did not believe that the average woman could fly professionally, but during the war more than a thousand women pilots proved them wrong. These were the Women Airforce Service Pilots (WASPs), who served as military flyers on the home front. In March 1944 one of them, Ann Baumgartner, was assigned to the Fighter Flight Test Branch at Wright Field in Dayton, Ohio. There she would make history as the only woman to test-fly experimental planes during the war and the first woman to fly a jet. A WASP among Eagles is the first-person story of how Baumgartner learned to fly, trained as a WASP, and became one of the earliest jet-age pioneers. Flying such planes as the Curtiss A-25 Helldiver, the Lockheed P-38, and the B-29 Superfortress, she was the first woman to participate in a host of experiments, including in-air refueling and flying the first fighter equipped with

a pressurized cockpit. But in evaluating the long-awaited turbojet-powered Bell YP-59A, she set a "first" record that would remain unchallenged for ten years.

Creating GI Jane Leisa D. Meyer,1996 Upheld current sex and race occupational segregation, assuring the public that women were in the military to do women's work within it, and resisting African-American women's protests against their relegation to menial labor. Yet Creating GI Jane is also the story of how, in spite of a palpable climate of repression, many women effectively carved out spaces and seized opportunities in the early WAC. African-American women and men worked together in demanding civil.
