Making It Chris Lefteri, 2007-06-28 Review: Making it uses contemporary design as a vehicle to describe over 90 production techniques, both established and cutting-edge, so that the mysteries of the processes are revealed in an accessible way. This is the first book to approach the subject from a designer's point of view. The author has grouped the processes according to the shapes and physical dimensions of the finished product. Each process is introduced and described, and information boxes offer guidance on suitable production volumes, the costs involved, the speed of production, relevant materials and more.--BOOK JACKET

The Ancient Phonograph Shane Butler, 2016-04-22 A search for traces of the voice before the phonograph, reconstructing a series of ancient soundscapes from Aristotle to Augustine. Long before the invention of musical notation, and long before that of the phonograph, the written word was unrivaled as a medium of the human voice. In *The Ancient Phonograph*, Shane Butler searches for traces of voices before Edison, reconstructing a series of ancient soundscapes from Aristotle to Augustine. Here the real voices of tragic actors, ambitious orators, and singing emperors blend with the imagined voices of lovesick nymphs, tormented heroes, and angry gods. The resonant world we encounter in ancient sources is at first unfamiliar, populated by texts that speak and sing, often with no clear difference between the two. But Butler discovers a commonality that invites a deeper understanding of why voices mattered then and why they have mattered since. With later examples that range from Mozart to Jimi Hendrix, Butler offers an ambitious attempt to rethink the voice—as an anatomical presence, a conceptual category, and a source of pleasure and wonder. He carefully and critically assesses the strengths and limits of recent theoretical approaches to the voice by Adriana Cavarero and Mladen Dolar and makes a rich and provocative range of ancient material available for the first time. *The Ancient Phonograph* will appeal not only to classicists and to voice theorists but to anyone with an interest in the verbal arts—literature, oratory, song—and the nature of aesthetic experience.

Bearing the Unbearable Deborah van Deusen Hunsinger, 2015-07-08 A Christ-centered approach to dealing with trauma on both a personal and a communal level Traumas abound. Post-traumatic stress disorder, emotional and sexual abuse, unbearable anxiety and fear, and a host of other traumas afflict people everywhere. In this book Deborah van Deusen Hunsinger weaves together threads from the fields of psychology and pastoral theology as she explores the impact of trauma on people's lives and offers practical strategies and restorative practices for dealing with it. Not only a teacher of pastoral theology but also an experienced pastoral counselor herself, Hunsinger draws on the resources of depth psychology, including object relations theory, trauma theory, family systems theory, nonviolent communication, and restorative circles. She then places her findings in a Christian theological context, emphasizing God's work in and through Jesus' passion, death, and resurrection, to present a cohesive, faith-based vision for healing.

Wittgenstein's Nephew Thomas Bernhard, 2019-09-03 LRB BOOKSHOP'S AUTHOR OF THE MONTH ONE OF THE GUARDIAN'S BEST BOOKS OF 2019 WITH A NEW AFTERWORD BY BEN LERNER, AUTHOR OF THE TOPEKA SCHOOL 'If you haven't read Bernhard, you will not know of the most radical advance in fiction since Joyce ... My advice: dive in.' Lucy Ellmann 'I absolutely love Bernhard: he is one of the darkest and funniest writers ... A must read for everybody.' Karl Ove Knausgaard It is 1967. Two men lie bedridden in separate wings of a Viennese hospital. The narrator, Thomas Bernhard, is stricken with a lung ailment; his friend Paul, nephew of Ludwig Wittgenstein, is suffering from one of his periodic bouts of madness. As their friendship quickens, these two eccentric men discover in each other an antidote to their feelings of despair on the unexpected strength of what they share - a spiritual symmetry forged by their love of music, black humour, disgust for bourgeois Vienna, and fear of mortality. A restless blend of fiction and memoir, *Wittgenstein's Nephew* is not only a haunting meditation on the artist's struggle to maintain a foothold on reality, but an impassioned eulogy to a real-life friendship - newly illuminated by Ben Lerner's afterword.

Biotechnologies of Crop Improvement, Volume 2 Satbir Singh Gosal, Shabir Hussain

Wani, 2018-07-09 During the past 15 years, cellular and molecular approaches have emerged as valuable adjuncts to supplement and complement conventional breeding methods for a wide variety of crop plants. Biotechnology increasingly plays a role in the creation, conservation, characterization and utilization of genetic variability for germplasm enhancement. For instance, anther/microspore culture, somaclonal variation, embryo culture and somatic hybridization are being exploited for obtaining incremental improvement in the existing cultivars. In addition, genes that confer insect- and disease-resistance, abiotic stress tolerance, herbicide tolerance and quality traits have been isolated and re-introduced into otherwise sensitive or susceptible species by a variety of transgenic techniques. Together these transformative methodologies grant access to a greater repertoire of genetic diversity as the gene(s) may come from viruses, bacteria, fungi, insects, animals, human beings, unrelated plants or even be artificially derived. Remarkable achievements have been made in the production, characterization, field evaluation and commercialization of transgenic crop varieties worldwide. Likewise, significant advances have been made towards increasing crop yields, improving nutritional quality, enabling crops to be raised under adverse conditions and developing resistance to pests and diseases for sustaining global food and nutritional security. The overarching purpose of this 3-volume work is to summarize the history of crop improvement from a technological perspective but to do so with a forward outlook on further advancement and adaptability to a changing world. Our carefully chosen "case studies of important plant crops" intend to serve a diverse spectrum of audience looking for the right tools to tackle complicated local and global issues.

Pedagogical Tact Max van Manen, 2016-07-11 Pedagogical Tact describes how teacher-student relations possess an improvisational and ethical character. The daily realities of educators, parents, and childcare specialists are pedagogically conditioned by sensitive insights, active thoughtfulness, and the creative ability to act caringly and appropriately in the immediacy of the moment. Internationally known educator Max van Manen shows through recognizable examples and evocative stories how good teaching is driven by the phenomenology of pedagogy. His book-refocuses educators and others away from an emphasis on instrumental skills and technocratic programs toward the need for pedagogical tact;-describes how pedagogical actions have latent effects that will influence children throughout their lives;-shows how our actions with young people have pedagogically ethical and moral significance;-gives educators back their original vocational motivation and inspiration.

Hourglass Danilo Kiš, 1997 Of all Danilo Kiš's books, *HOURLASS*, the account of the final months in one man's life before he is sent to a concentration camp, is generally considered his masterpiece. A finely sustained, complex fictional performance. It is full of pain and rage and gusto and joy of living, at once side-splitting and a heartbreaker.--WASHINGTON POST BOOK WORLD.

Research Methods for Product Design Alex Milton, Paul Rodgers, 2023-05-04 This book provides the reader with a comprehensive, relevant, and visually rich insight into the world of research methods specifically aimed at product designers. It includes practical case studies and tutorials that will inform, inspire and help you to conduct product design research better. Product designers need a comprehensive understanding of research methods as their day-to-day work routinely involves them observing people, asking questions, searching for information, making and testing ideas, and ultimately generating 'solutions' to 'problems'. Manifest in the design process is the act of research. Huge technological advances in information, computing and manufacturing processes also offer enormous opportunities to product designers such as the development of

'intelligent' products and services, but at the same time raise important research questions that need to be dealt with. Product designers are, in many ways, best placed to address these challenges because of the manner in which they apply their design thinking to problems. This book demonstrates in a clear, highly visual and structured fashion how research methods can support product designers and help them address the very real issues the world currently faces in the 21st century.
