Yearbook of Morphology 1994 Geert Booij, Jaap van Marle, 2013-06-29 Recent years have seen a revival of interest in morphology. The Yearbook of Morphology series supports and enforces this upswing of morphological research and gives an overview of the current issues and debates at the heart of this revival. The Yearbook of Morphology 1994 focuses on prosodic morphology, i.e. the interaction between morphological and prosodic structure, on the semantics of word formation, and on a number of related issues in the realm of inflection: the structure of paradigms, the relation between inflection and word formation, and patterns of language change with respect to inflection. There is also discussion of the relevance of the notion 'level ordering' for morphological generalizations. All theoretical and historical linguists, morphologists, and phonologists will want to read this book.

Young Children Visit Museums Margaret Carr, Brenda Soutar, Leanne Clayton, Bronwen Cowie, Jeanette Clarkin-Phillips, Shelley Butler, 2022-09-06 Bringing different cultural perspectives on creativity with them, teachers and children in two early childhood education sites in Aotearoa New Zealand were using museum visits as jumping off places to hone their creative capacity building. As a contribution to Tim Ingold's discussion of anthropology and/as education, and also finding John Dewey's writing valuable (specifically his framing of 'enduring attitudes'), the authors employ a navigation metaphor throughout the discussion. They describe a coming together of four Cultural Anchors (thinking from materials) with four Coordinates (creative capacity builders) to describe ways in which the children were making creative sense of the museum exhibits, while at the same time gathering information about them. They take these travel metaphors from a star cluster in the southern hemisphere night sky, Matariki, which provided early sea-going Māori with guidance as they navigated wide stretches of ocean in their sea-going canoes to reach Aotearoa New Zealand. A Māori immersion early childhood centre and school, and a New Zealand kindergarten provided lively examples of children's and teachers' responses to the treasured artefacts (taonga) in their local museums. The book describes an ecosocial framing, from 'little to big', and illustrates the different cultural perspectives on creativity. The Mana Tamariki kaiako (teachers) gifted us a title—He taonga, he rerenga arorangi (Where there are treasured objects, the spirit is nurtured and creativity will be inspired).

The Shallows: What the Internet Is Doing to Our Brains Nicholas Carr, 2011-06-06 Finalist for the 2011 Pulitzer Prize in General Nonfiction: "Nicholas Carr has written a Silent Spring for the literary mind."—Michael Agger, Slate "Is Google making us stupid?" When Nicholas Carr posed that question, in a celebrated Atlantic Monthly cover story, he tapped into a well of anxiety about how the Internet is changing us. He also crystallized one of the most important debates of our time: As we enjoy the Net's bounties, are we sacrificing our ability to read and think deeply? Now, Carr expands his argument into the most compelling exploration of the Internet's intellectual and cultural consequences yet published. As he describes how human thought has been shaped through the centuries by "tools of the mind"—from the alphabet to maps, to the printing press, the clock, and the computer—Carr interweaves a fascinating account of recent discoveries in neuroscience by such pioneers as Michael Merzenich and Eric Kandel. Our brains, the historical and scientific evidence reveals, change in response to our experiences. The technologies we use to find, store, and share information can literally reroute our neural pathways. Building on the insights of thinkers from Plato to McLuhan, Carr makes a convincing case that every information technology carries an intellectual ethic—a set of assumptions about the nature of knowledge and intelligence. He explains how the printed book served to focus our attention, promoting deep and creative thought. In stark contrast, the Internet encourages the rapid, distracted sampling of small bits of information from many sources. Its ethic is that of the industrialist, an ethic of speed and

efficiency, of optimized production and consumption—and now the Net is remaking us in its own image. We are becoming ever more adept at scanning and skimming, but what we are losing is our capacity for concentration, contemplation, and reflection. Part intellectual history, part popular science, and part cultural criticism, *The Shallows* sparkles with memorable vignettes—Friedrich Nietzsche wrestling with a typewriter, Sigmund Freud dissecting the brains of sea creatures, Nathaniel Hawthorne contemplating the thunderous approach of a steam locomotive—even as it plumbs profound questions about the state of our modern psyche. This is a book that will forever alter the way we think about media and our minds.

Complexity Management in Supply Chains Thorsten Blecker, Wolfgang Kersten, 2006 Supply chains are faced with a rising complexity with manifold effects. Because of the strong link between a supply chain's complexity and its efficiency, supply chain complexity management becomes a major challenge of today's business management. Therefore logistics and the supply chain management can play a significant role in mastering and managing complexity. The new book, edited by Thorsten Blecker and Wolfgang Kersten, is exemplifying the current progress in complexity management. Separate chapters are dedicated to clarify complexity management in transportation, networks and supply chains. It offers important insights of global and flexible network modelling to manage complexity, complexity in supply chains - developing human resource strategy, performance measurement of green supply chain management, complexity in transportation by means of containers and air-cargos. The volume, written by well-known experts of supply chain management from all over the world, shows applicable solutions, practical examples and use cases to illustrate complexity management and its application in logistics and supply chain management. It presents the central perspectives for a modern complexity management in supply chains. Therefore the book offers a fundamental understanding for workable complexity management concept their implementation to practitioners. The book offers fundamental insights into actual problems of an general complexity management concept and their implementation to practitioners in industry, logistics, management, service sector, research and apprenticeship. In addition to this it gives a valuable insight to the status of complexity management also for lecturers and students.

Groundwater in Fractured Bedrock Environments: Managing Catchment and Subsurface Resources U. Ofterdinger, A. M. MacDonald, J.-C. Comte, M. E. Young, 2019-07-19 Fractured bedrock aquifers have traditionally been regarded as low-productivity aquifers, with only limited relevance to regional groundwater resources. It is now being increasingly recognised that these complex bedrock aquifers can play an important role in catchment management and subsurface energy systems. At shallow to intermediate depth, fractured bedrock aquifers help to sustain surface water baseflows and groundwater dependent ecosystems, provide local groundwater supplies and impact on contaminant transfers on a catchment scale. At greater depths, understanding the properties and groundwater flow regimes of these complex aquifers can be crucial for the successful installation of subsurface energy and storage systems, such as deep geothermal or Aquifer Thermal Energy Storage systems and natural gas or CO₂ storage facilities as well as the exploration of natural resources such as conventional/unconventional oil and gas. In many scenarios, a robust understanding of fractured bedrock aquifers is required to assess the nature and extent of connectivity between such engineered subsurface systems at depth and overlying receptors in the shallow subsurface.

A Lady Cyclist's Guide to Kashgar Suzanne Joinson, 2012-05-22 It is 1923. Evangeline (Eva) English and her sister Lizzie are missionaries heading for the ancient city of Kashgar on the Silk Road. Though Lizzie is on fire with her religious calling, Eva's motives are not quite as noble, but with her green bicycle and a commission from a publisher to write *A Lady Cyclist's Guide to Kashgar*, she is ready for adventure. In present day London, a young woman, Frieda,

returns from a long trip abroad to find a man sleeping outside her front door. She gives him a blanket and pillow and in the morning finds the bedding neatly folded and an exquisite drawing of a bird with a long feathery tail, some delicate Arabic writing, and a boat made out of a flock of seagulls on her wall. Tayeb, in flight from his Yemeni homeland, befriends Frieda and, when she learns she has inherited the contents of an apartment belonging to a dead woman she has never heard of, they embark on an unexpected journey together. *A Lady Cyclist's Guide to Kashgar* explores the fault lines that appear when traditions from different parts of an increasingly globalized world crash into each other. Beautifully written and peopled by a cast of unforgettable characters, the novel interweaves the stories of Frieda and Eva, gradually revealing the links between them, and the ways in which they each challenge and negotiate the restrictions of their societies as they make their hard-won way towards home.

Simple Matters Erin Boyle, 2016-01-12 More than a decluttering guide, this book “speaks to the heart and soul of the minimalist lifestyle . . . a must-have manual for serenity in the modern world!” (Anne Sage, author of *Sage Living*). For anyone looking to declutter, organize, and simplify, author Erin Boyle shares practical guidance and personal insights on small-space living and conscious consumption. At once pragmatic and philosophical, *Simple Matters* is an essential manual for anyone who wants to bring more purpose and sustainability to their daily lives. Boyle demonstrates how the benefits of “living small” are accessible to us all—whether we’re renting a tiny apartment or purchasing a three-story house. Filled with personal essays, projects, and helpful advice on how to be inventive and resourceful in a tight space, *Simple Matters* shows that living simply is about making do with less and ending up with more: more free time, more time with loved ones, more savings, and more things of beauty.

Emerging Developments in the Power and Energy Industry Rodolfo Dufo-López, Jaroslaw Krzywanski, Jai Singh, 2019-10-29 Power and Energy Engineering are important and pressing topics globally, covering issues such as shifting paradigms of energy generation and consumption, intelligent grids, green energy and environmental protection. The 11th Asia-Pacific Power and Energy Engineering Conference (APPEEC 2019) was held in Xiamen, China from April 19 to 21, 2019. APPEEC has been an annual conference since 2009 and has been successfully held in Wuhan (2009 & 2011), Chengdu (2010 & 2017), Shanghai (2012 & 2014), Beijing (2013 & 2015), Suzhou (2016) and Guilin (2018), China. The objective of APPEEC 2019 was to provide scientific and professional interactions for the advancement of the fields of power and energy engineering. APPEEC 2019 facilitated the exchange of insights and innovations between industry and academia. A group of excellent speakers have delivered keynote speeches on emerging technologies in the field of power and energy engineering. Attendees were given the opportunity to give oral and poster presentations and to interface with invited experts.

Design Mom Gabrielle Stanley Blair, 2015-04-07 New York Times best seller Ever since Gabrielle Stanley Blair became a parent, she’s believed that a thoughtfully designed home is one of the greatest gifts we can give our families, and that the objects and decor we choose to surround ourselves with tell our family’s story. In this, her first book, Blair offers a room-by-room guide to keeping things sane, organized, creative, and stylish. She provides advice on getting the most out of even the smallest spaces; simple fixes that make it easy for little ones to help out around the house; ingenious storage solutions for the never-ending stream of kid stuff; rainy-day DIY projects; and much, much more.

Database and Expert Systems Applications Sourav S. Bhowmick, Josef Küng, Roland Wagner, 2009-08-25 This book constitutes the refereed proceedings of the 20th International Conference on Database and Expert Systems Applications, DEXA 2009, held in Linz, Austria, in August/September 2009. The 35 revised

full papers and 35 short papers presented were carefully reviewed and selected from 202 submissions. The papers are organized in topical sections on XML and databases; Web, semantics and ontologies; temporal, spatial, and high dimensional databases; database and information system architecture, performance and security; query processing and optimisation; data and information integration and quality; data and information streams; data mining algorithms; data and information modelling; information retrieval and database systems; and database and information system architecture and performance.

Computational Collective Intelligence Manuel Núñez,Ngoc Thanh Nguyen,David Camacho,Bogdan Trawiński,2015-09-09 This two-volume set (LNAI 9329 and LNAI 9330) constitutes the refereed proceedings of the 7th International Conference on Collective Intelligence, ICCCI 2014, held in Madrid, Spain, in September 2015. The 110 full papers presented were carefully reviewed and selected from 186 submissions. They are organized in topical sections such as multi-agent systems; social networks and NLP; sentiment analysis; computational intelligence and games; ontologies and information extraction; formal methods and simulation; neural networks, SMT and MIS; collective intelligence in Web systems – Web systems analysis; computational swarm intelligence; cooperative strategies for decision making and optimization; advanced networking and security technologies; IT in biomedicine; collective computational intelligence in educational context; science intelligence and data analysis; computational intelligence in financial markets; ensemble learning; big data mining and searching.

Advances in Operational Research in the Balkans Nenad Mladenović,Angelo Sifaleras,Marija Kuzmanović,2019-07-24 This proceedings volume presents recent theoretical and practical advances in operational research (OR). The papers focus on a number of key areas including combinatorial optimization, integer programming, heuristics, and mathematical programming. In addition, this volume highlights OR applications in different areas such as financial decision making, marketing, e-business, project management, scheduling, traffic and transportation. The chapters are based on papers presented at the 13th Balkan Conference on Operations Research (BALCOR). BALCOR is an established biennial conference. The selected papers promote international collaboration among researchers and practitioners, with a particular focus on the Balkan countries.

BUCKLEY, BATMAN & MYNDIE: Echoes of the Victorian culture-clash frontier ,2021-01-01 Sounding 7 begins with Echo 107 titled CONTEMPORARY EUROPEAN EYES ON THE OZ CULTURE-CLASH FRONTIER followed by echoes on BUCKLEY REVISITED, AFTER THE PROTECTORATE CRUMBED and WHAT OF PROTECTOR ROBINSON? Echoes follow on salvaging tribal ways, the Merri Creek black orphanage, ‘going round the bend’ at the Asylum and Echo 114: THE CELESTIALS OF VICTORIA, being the resented Chinese gold miners. Exploring the contrasting fate of Batman, La Trobe and Derrimut, leads into echoes on fringe-dwelling, cultural resistance and Oz racism, in particular the mass psychology of racist ideology that culminated with World War 2. After the gold rush era, life and right behaviour at the Healesville Coranderrk mission station and re-thinking William Thomas the Aboriginal Guardian lead to the pleasant notion of civilizing British colonies through sport. The life and exploits of Tom Wills is celebrated in Echo 122: THE MAKING & BREAKING OF VICTORIA’S FIRST SPORTING HERO. Turning to political history, Oz class struggles – convicts, capitalism and nation-building asks the question with Echo 124: WHITHER MARXISM [?] and then BRITISH EMPIRE POLICY REFORMS IN THE 1840s to contain a Chartist-led revolution. Facets of Victorian ‘quality of life’ since the land grab are followed by echoes on the astrology of the 1802 Port Phillip Crown possession claim and an echo titled

TOWARDS AN ASTROLOGY OF CIVILIZATION. The Sounding concludes with approaches to researching Aboriginal society, an undergraduate essay on the Dreamtime and finally with Echo 130: A RAINBOW SERPENT BRIDGE. Today in the 21st century, I wonder how differently Oz would have developed if the then ruling British government in Sydney and London had not used censorship to delay the gold rush for almost 40 years! Sounding 8 begins with Echo 131: HISTORY DISTORTION & CENSORSHIP and is backed up with a critique of Britannia's pirate empire that together spawn two more echoes of doubtful but controversial polemics in 1421 – THE YEAR CHINA DISCOVERED THE WORLD suggesting they were here in Oz many centuries before Captain Cook. Echo 135: THE KADAITCHA SUNG MEETS THE DRUID INHERITANCE pits Palm Islander Sam Watson's 1990s fiction The Kadaitcha Sung [the 'clever' occult Oz Dreamtime] in occult war with the equally ancient European / Celtic / Druid magic in the psyche of the Aryan 'race', so to speak. Going even further out on a limb, the focus shifts to recent light shed on 'dark ages barbarians' now considered by some historians to have been more culturally refined than the modern city individual. Back in Oz with Echo 137: WHITE MAN'S LAW – BLACKFELLOW LAW and Echo 138: McLEOD'S BUCKET FROM SKULL CREEK brings Western Australia after WW2 into wider awareness with the Pilbara pastoral workers strike of 1946-49 that won half-decent wage rights for Aboriginal stockmen. Moving further north, Echo 141: RECENT ARNHEMLAND CONNECTIONS Part 1: Taming the NT is the stuff of White Australia's race-based patriotism as depicted in Ion Idriess's once-mainstream fascist fictions counterpointed by Part 2: James Gaykamangus's Striving to bridge the chasm: my cultural learning journey. The final echo 142 talks treaty.

Euro-Par' 99 Parallel Processing Patrick Amestoy,Philippe Berger,Michel Dayde,Iain Duff,Valerie Frayssé,Luc Giraud,Daniel Ruiz,2003-05-21 Euro-Par is an international conference dedicated to the promotion and advancement of all aspects of parallel computing. The major themes can be divided into the broad categories of hardware, software, algorithms and applications for parallel computing. The objective of Euro-Par is to provide a forum within which to promote the development of parallel computing both as an industrial technique and an academic discipline, extending the frontier of both the state of the art and the state of the practice. This is particularly important at a time when parallel computing is undergoing strong and sustained development and experiencing real industrial take-up. The main audience for and participants in Euro-Par are seen as researchers in academic departments, government laboratories and industrial organisations. Euro-Par's objective is to become the primary choice of such professionals for the presentation of new results in their specific areas. Euro-Par is also interested in applications which demonstrate the effectiveness of the main Euro-Par themes. There is now a permanent Web site for the series <http://brahms.fmi.uni-passau.de/cl/europar> where the history of the conference is described. Euro-Par is now sponsored by the Association of Computer Machinery and the International Federation of Information Processing. Euro-Par'99 The format of Euro-Par'99 follows that of the past four conferences and consists of a number of topics each individually monitored by a committee of four. There were originally 23 topics for this year's conference. The call for papers attracted 343 submissions of which 188 were accepted. Of the papers accepted, 4 were judged as distinguished, 111 as regular and 73 as short papers.

Innovative Biosystems Engineering for Sustainable Agriculture, Forestry and Food Production Antonio Coppola,Giovanni Carlo Di Renzo,Giuseppe Altieri,Paola D'Antonio,2020-03-19 This book gathers the latest advances, innovations, and applications in the field of innovative biosystems engineering for sustainable agriculture, forestry and food production. Focusing on the challenges of implementing sustainability in various contexts in the fields of biosystems engineering, it shows how the research has addressed the sustainable use of renewable and non-renewable resources. It also presents possible solutions to help

achieve sustainable production. The Mid-Term Conference of the Italian Association of Agricultural Engineering (AIIA) is part of a series of conferences, seminars and meetings that the AIIA organizes, together with other public and private stakeholders, to promote the creation and dissemination of new knowledge in the sector. The contributions included in the book were selected by means of a rigorous peer-review process, and offer an extensive and multidisciplinary overview of interesting solutions in the field of innovative biosystems engineering for sustainable agriculture.
