A Lady Cyclist's Guide to Kashgar Suzanne Joinson, 2012-05-22 It is 1923. Evangeline (Eva) English and her sister Lizzie are missionaries heading for the ancient city of Kashgar on the Silk Road. Though Lizzie is on fire with her religious calling, Eva's motives are not quite as noble, but with her green bicycle and a commission from a publisher to write *A Lady Cyclist's Guide to Kashgar*, she is ready for adventure. In present day London, a young woman, Frieda, returns from a long trip abroad to find a man sleeping outside her front door. She gives him a blanket and pillow and in the morning finds the bedding neatly folded and an exquisite drawing of a bird with a long feathery tail, some delicate Arabic writing, and a boat made out of a flock of seagulls on her wall. Tayeb, in flight from his Yemeni homeland, befriends Frieda and, when she learns she has inherited the contents of an apartment belonging to a dead woman she has never heard of, they embark on an unexpected journey together. *A Lady Cyclist's Guide to Kashgar* explores the fault lines that appear when traditions from different parts of an increasingly globalized world crash into each other. Beautifully written and peopled by a cast of unforgettable characters, the novel interweaves the stories of Frieda and Eva, gradually revealing the links between them, and the ways in which they each challenge and negotiate the restrictions of their societies as they make their hard-won way towards home.

The Shallows: What the Internet Is Doing to Our Brains Nicholas Carr, 2011-06-06 Finalist for the 2011 Pulitzer Prize in General Nonfiction: "Nicholas Carr has written a Silent Spring for the literary mind."—Michael Agger, Slate "Is Google making us stupid?" When Nicholas Carr posed that question, in a celebrated Atlantic Monthly cover story, he tapped into a well of anxiety about how the Internet is changing us. He also crystallized one of the most important debates of our time: As we enjoy the Net's bounties, are we sacrificing our ability to read and think deeply? Now, Carr expands his argument into the most compelling exploration of the Internet's intellectual and cultural consequences yet published. As he describes how human thought has been shaped through the centuries by "tools of the mind"—from the alphabet to maps, to the printing press, the clock, and the computer—Carr interweaves a fascinating account of recent discoveries in neuroscience by such pioneers as Michael Merzenich and Eric Kandel. Our brains, the historical and scientific evidence reveals, change in response to our experiences. The technologies we use to find, store, and share information can literally reroute our neural pathways. Building on the insights of thinkers from Plato to McLuhan, Carr makes a convincing case that every information technology carries an intellectual ethic—a set of assumptions about the nature of knowledge and intelligence. He explains how the printed book served to focus our attention, promoting deep and creative thought. In stark contrast, the Internet encourages the rapid, distracted sampling of small bits of information from many sources. Its ethic is that of the industrialist, an ethic of speed and efficiency, of optimized production and consumption—and now the Net is remaking us in its own image. We are becoming ever more adept at scanning and skimming, but what we are losing is our capacity for concentration, contemplation, and reflection. Part intellectual history, part popular science, and part cultural criticism, *The Shallows* sparkles with memorable vignettes—Friedrich Nietzsche wrestling with a typewriter, Sigmund Freud dissecting the brains of sea creatures, Nathaniel Hawthorne contemplating the thunderous approach of a steam locomotive—even as it plumbs profound questions about the state of our modern psyche. This is a book that will forever alter the way we think about media and our minds.

Desert Warfare: German Experiences In World War II [Illustrated Edition] Major General Alfred Toppe, 2014-08-15 Includes 112 photos/illustrations and 21 maps. The German Afrika Korps blazed a trail across the deserts of North Africa under their dashing leader Erwin Rommel, the Desert Fox, although finally defeated by far superior Allied Forces they set the gold standard for desert operations. This book is of great historical value and even in the present day it is still considered of great value by the American military who still seek for improvements in their ways of desert doctrine... "Analysts continue to assess the data from Operations Desert Shield and Desert Storm as a means of improving the military's ability to function efficiently in desert terrain...The information gleaned from this effort will enhance the already considerable body of knowledge on the subject derived from the historical record...When contributions in the latter category are located or rediscovered, they should be given the dissemination they merit... "Such is the purpose of publishing Desert Warfare: German Experiences in World War II...Organized by Major General Alfred Toppe and written with the assistance of nine German commanders who served in North Africa, the manuscript...represents a collaborative attempt to determine "as many factors as possible which exerted a determining influence on desert warfare," Issues addressed include planning, intelligence, logistics, and operations. Described and analyzed are the German order of battle, the major military engagements in North Africa, and the particular problems of terrain and climate in desert operations. Not unlike many of the U.S. units engaged in the war with Iraq, the Germans in North Africa learned about combat operations in the desert only after they arrived on the scene and confronted the desert on its own terms. For this reason alone, as well as for the insights it offers, Desert Warfare requires the serious consideration of those responsible for preparing the U.S. military for any future conflict in desert terrain."
