The Rust Programming Language is the official book on Rust: an open source systems programming language that helps you write faster, more reliable software. Rust offers control over low-level details (such as memory usage) in combination with high-level ergonomics, eliminating the hassle traditionally associated with low-level languages. The authors of The Rust Programming Language, members of the Rust Core Team, share their knowledge and experience to show you how to take full advantage of Rust's features--from installation to creating robust and scalable programs. You'll begin with basics like creating functions, choosing data types, and binding variables and then move on to more advanced concepts, such as: Ownership and borrowing, lifetimes, and traits Using Rust's memory safety guarantees to build fast, safe programs Testing, error handling, and effective refactoring Generics, smart pointers, multithreading, trait objects, and advanced pattern matching Using Cargo, Rust's built-in package manager, to build, test, and document your code and manage dependencies How best to use Rust's advanced compiler with compiler-led programming techniques You'll find plenty of code examples throughout the book, as well as three chapters dedicated to building complete projects to test your learning: a number guessing game, a Rust implementation of a command line tool, and a multithreaded server. New to this edition: An extended section on Rust macros, an expanded chapter on modules, and appendixes on Rust development tools and editions.

Typographic Systems of Design Kimberly Elam,2007-05-03 Typographic organization has always been a complex system in that there are so many elements at play, such as hierarchy, order of reading, legibility, and contrast. In Typographic Systems, Kim Elam, author of our bestselling books, Geometry of Design and Grid Systems, explores eight major structural frameworks beyond the gridincluding random, radial, modular, and bilateralsystems. By taking the reader through exercises, student work, and professional examples, Elam offers a broad range of design solutions. Once essential visual organization systems are understood the designer can fluidly organize words or images within a structure, combination of structures, or a variation of a structure. With clarity and substance, each systemfrom the structured axis to the nonhierarchical radial arrayis explained and explored so that the reader comes away with a better understanding of these intricate complex arrangements. Typographic Systems is the seventh title in our bestselling Design Briefs series, which has sold more than 100,000 copies worldwide.

Animated Encounters Daisy Yan Du,2019-02-28 China's role in the history of world animation has been trivialized or largely forgotten. In Animated Encounters Daisy Yan Du addresses this omission in her study of Chinese animation and its engagement with international forces during its formative period, the 1940s-1970s. She introduces readers to transnational movements in early Chinese animation, tracing the involvement of Japanese, Soviet, American, Taiwanese, and China's ethnic minorities, at socio-historical or representational levels, in animated filmmaking in China. Du argues that Chinese animation was international almost from its inception and that such border-crossing exchanges helped make it "Chinese" and subsequently transform the history of world animation. She highlights animated encounters and entanglements to provide an alternative to current studies of the subject characterized by a preoccupation with essentialist ideas of "Chineseness" and further questions the long-held belief that the forty-year-period in question was a time of cultural isolationism for China due to constant wars and revolutions. China's socialist era, known for the pervasiveness of its political propaganda and suppression of the arts, unexpectedly witnessed a golden age of animation. Socialist collectivism, reinforced by totalitarian politics and centralized state control, allowed Chinese animation to prosper and flourish artistically. In addition, the double marginality of animation—a minor art form for children—coupled with its disarming qualities and intrinsic malleability and mobility, granted animators and producers the double power to play with politics and transgress ideological and geographical borders while surviving censorship, both at home and abroad. A captivating and enlightening history, Animated Encounters will attract scholars and students of world film and animation studies, children's culture, and modern Chinese history.

Transnational Chinese Cinemas Sheldon H. Lu,1997-10-01 Zhang Yimou's first film, Red Sorghum, took the Golden Bear Award in 1988 at the Berlin International Film Festival. Since then Chinese films have continued to arrest worldwide attention and capture major film awards, winning an international following that continues to grow. Transnational Chinese Cinemas spans nearly the entire length of twentieth-century Chinese film history.

The volume traces the evolution of Chinese national cinema, and demonstrates that gender identity has been central to its formation. Femininity, masculinity and sexuality have been an integral part of the filmic discourses of modernity, nationhood, and history. This volume represents the most comprehensive, wide-ranging, and up-to-date study of China's major cinematic traditions. It is an indispensable source book for modern Chinese and Asian history, politics, literature, and culture.

Fractured Realms Horrified Press,2014-06-15 Extraordinary people marked 'not normal' come from all different walks of life. For far too long, a shroud of darkness was thrown over those who've had boundless potential to transcend greatness; shunned and cast out through the misjudgment forced upon them. People enduring isolation from being trapped inside their own minds. People labeled with an ASD-Autism Spectrum Disorder. Seeds of greatness cannot be cultivated through judgment and condemnation. Imagine a world never having heard the music of Wolfgang Amadeus Mozart? Never seeing the extraordinary art of Michelangelo? What if Sir Isaac Newton hadn't discovered gravity, and laws of motion that would be relevant 300 years later? And for all the writers out there...were you aware that Lewis Carroll-author of 'Alice in Wonderland'-fell under the umbrella of Autism? So to all of you, who are reading this, ask yourself... Is Autism a disorder, or is it a gift? Through their short stories and poetry, a collection of talented authors have tackled that question.

But I Don't See Color Terry Husband,2016-07-25 Racism is still very prevalent and pervasive in all aspects of the P-12 educational experience in the United States. Far too many teachers and administrators continue to respond to this challenge by applying colorblind perspectives and approaches. This edited volume provides a broad and comprehensive critique of colorblindness in various educational contexts. In an attempt to advocate for a more color-conscious approach to education, this book deals with a wide range of issues related to teaching, learning, curriculum, creativity, assessment, discipline, implicit bias, and teacher education. There are three distinct features that make this book so important and relevant given the current social and racial climate in U.S. schools today. First, each chapter in this book draws from a plethora of different theoretical perspectives related to race and racism. In this sense, readers are equipped with variety of robust theoretical perspectives to better understand this complicated

issue of racism in schools. Second, this book communicates issues of race and racism through multiple voices. Unlike other books on race and racism where the central voice is that of a researcher or scholar, this book centralizes the voices and perspectives of researchers, teachers, and teacher educators alike. As a result, readers are better able to understand issues of race and racism in schools from a more nuanced perspective. Finally, unlike other books related to race and racism in schools, this book provides readers with practical strategies for combating racism in their respective educational contexts.

Chinese Animation Rolf Giesen, 2014-12-19 With an output of more than 250,000 minutes annually, and with roughly 5,000 producers and production units, the Chinese are leading the field of animated films. Although it is almost impossible to completely cover 90 years of filmmaking, this book provides a comprehensible introduction to the industry's infancy, its Golden Age (Shanghai Animation Film Studio) and today's Chinese animation (in feature films, television series and student films). There are classics such as Princess Iron Fan (made at the time of the Japanese occupation) and the color Havoc in Heaven, both starring the Monkey King Sun Wukong, as well as countless TV stars (Blue Cat, Pleasant Goat and Big Big Wolf) and many almost unknown works by young filmmakers who are not focusing on an audience of children (like most of the industry output).
