The Women of Little Lon Barbara Minchinton,2021-08-16 A vivid account of a remarkable but little-known chapter in Melbourne's history Sex workers in nineteenth-century Melbourne were judged morally corrupt by the respectable world around them. But theirs was a thriving trade, with links to the police and political leaders of the day, and the leading brothels were usually managed by women. While today a city lane is famously named after Madame Brussels, the identities of the other 'flash madams', the 'dressed girls' who worked for them and the hundreds of women who solicited on the streets of the Little Lon district of Melbourne are not remembered. Who were they? What did their daily lives look like? What became of them? Drawing on the findings of recent archaeological excavations, rare archival material and family records, historian Barbara Minchinton brings the fascinating world of Little Lon to life. Barbara Minchinton is a historian and independent researcher. For several years she collaborated with a team of archaeologists on the interpretation of artefacts from Melbourne's Little Lon district. She is the co-editor of The Commonwealth Block, Melbourne, a historical archaeology of the city's working-class and immigrant communities, and the author of The Women of Little Lon.

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Disaster Planning and Control will be an invaluable resource for anyone involved in disaster response--from the frontline worker to the highest elected official. This book is written to the FESHE model curriculum for the Disaster Planning and Recovery course.

Periklean Athens and Its Legacy Judith M. Barringer,Jeffrey M. Hurwit,2010-01-01 The late fifth century BC was the golden age of ancient Athens. Under the leadership of the renowned soldier-statesman Perikles, Athenians began rebuilding the Akropolis, where they created the still awe-inspiring Parthenon. Athenians also reached a zenith of artistic achievement in sculpture, vase painting, and architecture, which provided continuing inspiration for many succeeding generations. The specially commissioned essays in this volume offer a fresh, innovative panorama of the art, architecture, history, culture, and influence of Periklean Athens. Written by leading experts in the field, the articles cover a wide range of topics, including: An evaluation of Perikles' military leadership during the early stages of the Peloponnesian War. Iconographical and iconological studies of vase paintings, wall paintings, and sculpture. Explorations of the Parthenon and other monuments of the Athenian Akropolis. The legacy of Periklean Athens and its influence upon later art. Assessments of the modern reception of the Akropolis. As a whole, this collection of essays proves that even a well-explored field such as Periklean Athens can yield new treasures when mined by perceptive and seasoned investigators.

Historical Atlas of Early Railways Derek Hayes,2017 In a sense the very earliest railways were simply ruts caused by the passage of carts on softer ground. Railways of this nature may have been in use as early as 2200 BCE. But railways became a worldwide economic force only in the middle of the nineteenth century, some forty or fifty years after the first demonstration of a mechanically powered train. What radically changed--in the space of less than three decades--was the method of propulsion, from human or horse power to steam powered travelling engines, the forerunners of the modern railway locomotive. Such railways enabled faster, more efficient transport of people and goods, opened the world to settlement and changed the nature of war, allowing supplies and soldiers to be moved much faster than on horseback or on foot. Historical Atlas of Early Railways highlights the innovations, failures and most memorable moments of railways through the ages. Read about a variety of designs and inventions including the steam underground in 1863, rack and mountain railways, electric railways, monorails and atmospheric railways. Study the world's oldest surviving railway map. This newest addition to the popular Historical Atlas Series features 320 maps and 450 photos and other illustrations, and is a beautifully designed chronicle for anyone who has a fondness for history, maps or trains.
