Paper Sculpture Richard Sweeney,2021-11-28 Paper is readily available and inexpensive in comparison to other sculptural media, and can be manipulated with a set of simple tools. It is a tactile medium, which can be formed into three-dimensional shapes quickly and immediately through folding and cutting. This hands-on element is something I feel is important -- it allows the artist to engage immediately with the material, resulting in something

physical and tangible. It is, perhaps, these factors that make it so appealing, not only as a tool to apply in different fields, such as model making for architecture, but as an activity for its own sake. A section of this book is dedicated to a selection of the techniques I use in the creation of my work, and which I demonstrate in my workshops. My aim is to show the basic principles of form-making in paper, which can then be expanded on and explored as the reader wishes. Also included are my sources of inspiration and details of my working practice, which shows the evolution of an initial idea into a final artwork. I hope this book offers an insight into my work, while offering inspiration to those who wish to explore the creative potential of paper.

Papercutting Patricia Moffett, 2019-09-28 These 25 projects show how ammonites, lichen rosettes, honeycomb, and other natural forms can help you apply the rules of mathematics to create complexly beautiful works. Clear, paper-art-focused explanations teach you the principles of mathematics we see in nature, including the Golden Section and Golden Angle, Fibonacci numbers, and symmetry. Learn about using flaps and piercings with various projects, including A Murmuration of Starlings. Benefit from lessons in the Japanese art of kirigami and geometric principles, with projects such as Kirigami Cascade and Rotational Symmetry. Tessellations and 2-D weaving, 3-D form assembly, woven 3-D forms, and stacked layers come into play for projects such as Radiolarian and Sea Urchin. The role that display plays in your work is covered too, including flexagons in the Undersea Frieze, black light in UV Jelly Fish, and light-box effects in Art Deco Scarab and Diatoms through the Microscope. Art really does mirror nature, as these fascinating cut-paper sculptures show.
