**Paper Toys: Monsters** Niark,2019-02-17 Using the same silhouettes as Niark's previous Monsters volume but with all new vibrant colors and patterns that take their designs to the next level, these unique paper monsters are sure to shock and amaze. Printed on durable card stock and die-cut, each toy is easy to assemble with no glue or scissors needed. Full color. Consumable.

**Papertoy Monsters** Brian Castleforte,2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

**100 Animals That Can F\*cking End You** Mamadou Ndiaye,2022-07-05 A wittily informative field guide to the deadliest animals on Earth from AnimalTok star @mndiaye\_97 Ever wonder how to tell if a moose is about to subtract you? Curious why you should be terrified of cassowaries, the “velociraptor that time forgot?” Questioning whether that cute baby hippo is actually a homicidal maniac in the making? Yea, so was Mamadou Ndiaye . . . and now he's got your answers. 100 Animals That Can F\*cking End You is the ultimate countdown to merk by animal, featuring everything from tiny bugs that can turn you into a hashtag to animals so massive they can murder you by accident. These include: • The massive Southern elephant seal, which is built like a truck with the personality of a Spring Break frat boy • Sperm whales with a call so strong it can vibrate you to death • A golf-ball-sized octopus that can erase twenty-six people with one bite • Hyenas, which have no qualms eating their prey while it is still alive • A snake so quick it can strike you three times before you blink You'll learn not only which animals to avoid, but which ones can beat you in a footrace, which ones create surprisingly high body counts, and which ones will give you a good reason never to venture into the ocean. Mamadou also offers the occasional survival tip, even if it is just to make peace with your higher power. This dynamic, fact-filled, occasionally disturbing book is perfect for animal lovers and anyone perplexed by the natural world.

**There's No Such Thing as "The Economy"** Samuel A. Chambers,2018 Every Economics textbook today teaches that questions of values and morality lie outside of, are in fact excluded from, the field of Economics and its proper domain of study, the economy. Yet the dominant cultural and media narrative in response to major economic crisis is almost always one of moral outrage. How do we reconcile this tension or explain this paradox by which Economics seems to have both everything and nothing to do with values? The discipline of modern economics hypostatizes and continually reifies a domain it calls the economy; only this epistemic practice makes it possible to falsely separate the question of value from the broader inquiry into the economic. And only if we have first eliminated value from the domain of economics can we then transform stories of financial crisis or massive corporate corruption into simple tales of ethics. But if economic forces establish, transform, and maintain relations of value then it proves impossible to separate economics from questions of value, because value relations only come to be in the world by way of economic logics. This means that the positive economics spoken of so fondly in the textbooks is nothing more than a contradiction in terms, and as this book demonstrates, there's no such thing as the economy. To grasp the basic logic of capital is to bring into view the unbreakable link between economics and value.

**Bloodbones** Steve Jackson,2010

**Chitty Chitty Bang Bang** Ian Fleming,2013-03-12 Ian Fleming's beloved original text – newly illustrated by Joe Berger! “Crackpot” is what everybody calls the Pott family. So when they go to buy a new car and come back with a wreck, nobody is surprised. Except for the Potts themselves. First, the car has a name. And she tells them what it is. Then they find out that she can fly. And swim. . . . Chitty Chitty Bang Bang is a car on a mission to stop a criminal gang in its tracks – and she is taking the Potts with her! Jump into the world's most loved magical car for her first adventure.

**The Cultural Identities of European Cities** Katia Pizzi,2010 Cities are both real and imaginary places whose identity is dependent on their distinctive heritage: a network of historically transmitted cultural resources. The essays in this volume, which originate from a lecture series at the Institute of Germanic & Romance Studies, University of London, explore the complex and multi-layered identities of European cities. Themes that run through the essays include: nostalgia for a grander past; location between Eastern and Western ideologies, religions and cultures; and the fluidity and palimpsest quality of city identity. Not only does the book provide different thematic angles and a variety of approaches to the investigation of city identity, it also emphasizes the importance of diverse cultural components. The essays presented here discuss cultural forms as various as music, architecture, literature, journalism, philosophy, television, film, myths, urban planning and the naming of streets.

**The Fingerprint** U. S. Department Justice,2014-08-02 The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

**Trust** Adriano Fabris,2020-04-06 This book presents cutting-edge concepts on the question of trust. Written by leading experts, it investigates a paradoxical feature of contemporary society: while information and communication technologies, on the one hand, and scientific discourses, on the other, can promote more informed

participation in public and democratic life, they have also led to a dramatic decline in our communicative and cooperative skills. The book analyzes the notion of trust from an interdisciplinary perspective by combining the normative (continental) and empirical (Anglo-American) approaches and by considering the political, epistemological, and historical transformations in the interpersonal relationships sparked by new technologies. Using trust as a model, it then investigates and clarifies the new types of participation that are made possible by scientific and technological advances.

Happy Birthday, Frankie Sarah Weeks,1999-08-18 The leg bone's connected to the ... Hmmmm, what is the leg bone connected to? Not to mention the arm bone, and all the other parts of the mad professor's build-your-own Frankenstein project. Will the professor manage to assemble Frankie in time to celebrate the monster's first birthday?

Howl of the Werewolf Steve Jackson,Ian Livingstone,2007 Lupravia is a cursed land, haunted by the spirits of the restless dead. Peasants struggle daily with survival, living in constant fear of attacks from ravenous wild beasts. Only the foolhardy or insane would willingly pass beyond its borders and enter that benighted realm of predators.

**Way of the Ferret** Judi Harris,1994

**Introducing Semantics** Nick Riemer,2010-03-25 An introduction to the study of meaning in language for undergraduate students.

**Theodor W. Adorno** Detlev Claussen,2009-06-30 This book gives us our first clear look at how the man and his moment met to create “critical theory.” An intimate picture of the quintessential twentieth-century transatlantic intellectual, the book is also a window on the cultural ferment of Adorno’s day—and its ongoing importance in our own.

**Disability Studies and the Inclusive Classroom** Susan Baglieri,Arthur Shapiro,2012 This work's mission is to integrate the fields of disability studies and inclusive education. It focuses on the broad, foundational topics that comprise disability studies (culture, language, history, etc.) and moves into the more practical topics normally associated with inclusive education.

**The Eleusinian and Bacchic Mysteries** Thomas Taylor,1875

**Building and Interpreting Possession Sentences** Neil Myler,2024-02-06 A wide-ranging generative analysis of the typology of possession sentences, solving long-standing puzzles in their syntax and semantics. A major question for linguistic theory concerns how the structure of sentences relates to their meaning. There is broad agreement in the field that there is some regularity in the way that lexical semantics and syntax are related, so that thematic roles (the different participant roles in an event: agent, theme, goal, etc.) are predictably associated with particular syntactic positions. In this book, Neil Myler examines the syntax and semantics of possession sentences, which are infamous for appearing to diverge dramatically from this broadly regular pattern. On the one hand, Myler points out, possession sentences have too many meanings; in any given language, the construction used to express archetypal possessive meanings (such as personal ownership) is also often used to express other apparently unrelated notions (body parts, kinship relations, and many others). On the other hand, possession sentences have too many surface structures; languages differ markedly in the argument structures used to convey the same possessive meanings. Myler argues that recent work on the syntax-semantics interface in the generative tradition has developed the tools needed to solve these puzzles. Examining and synthesizing ideas from the literature and drawing on data from many languages (including some understudied Quechua dialects), Myler presents a novel way to understand the apparent irregularity of possession sentences while preserving explanations of general cross-linguistic regularities, offering a unified approach to the syntax and semantics of possession sentences that can also be integrated into a general theory of argument structure.

**Court Culture in Dresden** H. Watanabe-O'Kelly,2002-03-07 This is the first cultural history of Baroque Dresden, the capital of Saxony and the most important Protestant territory in the Empire from the mid-sixteenth to the early eighteenth century. Helen Watanabe-O'Kelly shows how the art patronage of the Electors fits into the intellectual climate of the age and investigates its political and religious context. Lutheran church music and architecture, the influence of Italy, the cabinet of curiosities and the culture of collecting, alchemy, mining and early technology, official image-making and court theatre are some of the wealth of colourful subjects dealt with during the period 1553 to 1733.
