Korean War Aces Robert F Dorr,2013-01-20 The first virtually all-jet war, the conflict in Korea saw F-86 Sabres of the USAF take on MiG-15s of the North Korean and Chinese air forces. Although the Allied pilots were initially taken aback by the ability of the communist fighter in combat, sound training and skilful leadership soon enabled Sabre pilots to dominate the dogfights over the Yalu River. In all 39 F-86 pilots achieved ace status, and a number of these are profiled in this volume, as are notable pilots from the US Navy, Marine Corps and Royal Navy and, for the first time, the handful of MiG-15 aces.

*Takeoff* Moose Peterson,2017-09-05 Aviation photography is the perfect mix of sleek, beautiful machines, blended with nature's beautiful skies and fields, along with a fascinating collection of fearless pilots and capable crew, all wrapped in a rich, significant, and crucial part of history. Few genres combine this many elements, and invoke this much passion from photographers. This one-of-a kind book from Moose Peterson, one of the world's most recognized experts in aviation photography, not only teaches you exactly what you need to know to start making beautiful, intriguing photographs of aircraft, but inspires you and pushes you creatively and technically every step of the way. Moose takes you through all the basics for camera gear and settings, showing you what he travels with and the settings he uses to get those tack sharp images. He covers one of the most important aspects of aviation photography-light! And, he gives you a number of examples of how to take the best advantage of that light any time of the day. He shares the critical techniques you'll need to master to create the illusion of flight, speed, and romance in a still image, including which types of prop blur you're aiming for (and which types you want to avoid). You'll learn how to make the most out of air shows and fly-ins-what to shoot while you're there, and what you might want to skip or avoid altogether (and why). You'll learn how to photograph aircraft on the ground, from ground-to-air, and ultimately air-to-air, and how to capture one of the most important elements in aviation photography today: the fascinating pilots and crew-the people! Moose shares many wonderful stories and adventures along the way, which illustrate how, as photographers, we're also storytellers, and the importance of bringing out those stories in our aviation photos. Plus, you'll gain free access to his acclaimed KelbyOne film, Warbirds and the Men Who Flew Them. With this book, your camera, and your passion, your success in aviation photography will quickly take flight!

Guns and Military Ichiro Kamiya,2003 This volume introduces the essentials for developing a basic knowledge for drawing various guns, accouterments, and the mechanics of combat planes and warships. Not only will this volume become the artist's brave ally, but it is also enjoyable by non-artists simply as reading material and a source of information and knowledge.

**Environmental Engineering Dictionary and Directory** Thomas M. Pankratz,2000-09-22 Like most technical disciplines, environmental science and engineering is becoming increasingly specialized. As industry professionals focus on specific environmental subjects they become less familiar with environmental problems and solutions outside their area of expertise. This situation is compounded by the fact that many environmental science related terms are confusing. Prefixes such as bio-, enviro-, hydra-, and hydro- are used so frequently that it is often hard to tell the words apart. The Environmental Engineering Dictionary and Directory gives you a complete list of brand terms, brand names, and trademarks - right at your fingertips.

**India's Ad Hoc Arsenal** Chris Smith,1994 Chris Smith explores the evolution of Indian defence policy since 1947. He looks carefully at the domestic dynamics of Indian

defence policy. This includes an in-depth analysis of the period 1947-62, which is often ignored by Indian defence analysts, and the performance of the defence industrial base. He concludes that India's defence policy is designed more as one aspect of the quest for great power status than as an attempt to acquire security at an affordable price.

**Convair B-36 Peacemaker** Meyers K. Jacobsen, 1999 Convair B-36 Peacemaker, A Photo Chronicle explores the history of the Strategic Air Command's biggest bomber that helped keep the peace during the early years of the Cold War. The six-engined B-36 - later ten engine - was the first intercontinental bomber that could fly across continents, hit its target, and return to base unrefueled - long a dream of air planners. Presented here through the use of historical photographs is the history of this magnificent airplane, from its origin just prior to America's entry into World War II in 1941, to its final days in 1959 when its last missions were flown. This book will give the reader a concise overview of the story of the Peacemaker in the 1940s-1950s. A serial number listing is included, as well as a list of all ten B-36 bomb wings.

**American Flying Boats and Amphibious Aircraft** E.R. Johnson, 2016-03-29 This work is a comprehensive, heavily illustrated history of the many flying boats and amphibious aircraft designed and built in the United States. It is divided into three chronological sections: the early era (1912-1928), the golden era (1928-1945), and the post-war era (1945-present), with historical overviews of each period. Within each section, individual aircraft types are listed in alphabetical order by manufacturer or builder, with historical background, technical specifications, drawings, and one or more photographs. Appendices cover lesser known flying boat and amphibian types as well as various design concepts that never achieved the flying stage.

**Messerschmitt Bf 110** Marek Józef Murawski, 2010-07 \* Free extras for modelers, including decals and masking foil \* Thirty-two sheets of technical drawings and nine color charts The first part of a monograph on the German WW2 aircraft, Messerschmitt Bf 110 describes the development history of its all versions with coverage of changes made in their variants, sub-variants and field modifications. Originally designed as a long range heavy fighter (Zerstörer), Bf 110 was used as a reconnaissance and ground attack aircraft as well as a night fighter with advanced radio, navigation and radar systems. The book features a detailed description of the aircraft's structure and technical data and a chapter about camouflage and markings. Complete with 116 pages, 124 photographs, 32 sheets of technical drawings in 1:48 and 1:72 scale with specification of external changes in production-run versions of the aircraft and 9 color charts with 16 examples of camouflage schemes. Free 1:48 and 1:72 decals for 2 schemes: Bf 110 E-2, '3U+KS' of 8./ZG 26, North Africa, 1942. Bf 110 G-4/R3, 'G9+DC', flown by Oblt. Leo Baro of Stab II./NJG 1, Germany, May 1945. About the Series Monographs is a series focusing on an individual type of aircraft. Each monograph contains descriptions of the aircraft's origins, its variants and combat history. Each volume includes several hundred archive photographs, technical scale drawings and color profile artworks, with free extras for modelers, including decals and masking foil.

**The Mind of War** Grant Hammond, 2012-01-11 The ideas of US Air Force Colonel John Boyd have transformed American military policy and practice. A first-rate fighter pilot and a self-taught scholar, he wrote the first manual on jet aerial combat; spearheaded the design of both of the Air Force's premier fighters, the F-15 and the F-16; and shaped the tactics that saved lives during the Vietnam War and the strategies that won the Gulf War. Many of America's best-known military and political leaders consulted Boyd on matters of technology, strategy, and theory. In *The Mind of War*, Grant T. Hammond offers the first complete portrait of John Boyd, his groundbreaking ideas, and his enduring legacy. Based on extensive interviews with Boyd and those who knew him as well as on a close analysis

of Boyd's briefings, this intellectual biography brings the work of an extraordinary thinker to a broader public.

**United States Naval Aviation, 1919–1941** E.R. Johnson,2011-04-29 Within six months of the devastating attack on Pearl Harbor, the U.S. Navy had checked the Japanese military advance in the Pacific to the extent that the United States could return to its original “Defeat Germany First” strategy. That the Navy was able to accomplish this feat with only six fleet aircraft carriers and little more than 1,000 combat aircraft was not sheer luck but the culmination of more than two decades of determined preparation. This thorough study, with detailed drawings and photographs, explains and illustrates the trial and error process which went into developing the aircraft, airships and ships of the interwar period. The critical factors that shaped Naval Aviation after World War I—naval treaties, fleet tactics, government programs, leadership and organization, as well as the emergence of Marine Corps and Coast Guard aviation—are discussed in depth.

**Rapid Fire** Anthony G. Williams,2002-10-22 A comprehensive account of the heavy automatic weapons developed in every nation throughout the 20th century. Contains tabulated data for the weapons and ammunition as well as a cartridge identification guide.

**The Spitfire** Hugh W. Cowin,2024-04 History has shown the Spitfire to be the right aircraft in the right place at the right time, of that there is more than ample evidence. Indeed, the very name Spitfire has become as indelibly woven into the unfolding story of the Second World War as those of its chief human protagonists, Churchill, Hirohito, Hitler, Roosevelt and Stalin. Hugh Cowin lays to rest many of the myths and plain misinformation contained in numerous earlier chronicles. Spanning the decades between the Spitfire's infancy and its final departure from operational service, this fascinating work opens up and explores a whole host of aspects all too frequently ignored. Sensitive yet vital aspects brought to light include the tragically hard-won Battle of Britain combat lessons, borne of the Spitfire's inadequate armament and its 'torch' propensity when hit. More positive and

negative aspects of the design were only to emerge post-War, as a result of increases in engine power. These, combined with operational developments, are explained simply, making the narrative more of an enthralling yarn than a dry history. To help the reader keep focussed on the Spitfire/Seafire's place in the broader scheme of things, Cowin intersperses his narrative with straightforward comparisons between the Spitfire and its fighter contemporaries, friend and foe. This substantial, highly readable narrative history contains well over 150 photographs and diagrams and really is a must-read volume for all serious aviation enthusiasts.

**The Development of Jet and Turbine Aero Engines** Bill Gunston, 2006 Using language understandable to those without an engineering background and avoiding complex mathematical formulae, Bill Gunston explains the differences between gas-turbine, jet, rocket, ramjet and helicopter turbo shaft aero engines and traces their histories from the early days through to today's complex and powerful units as used in the latest wide-bodied airliners and high performance military jets.

**The Audit of War** Correlli Barnett, 2011-07 Correlli Barnett described his Audit of War as an 'operational study' to 'uncover the causes of Britain's protracted decline as an industrial country since the Second World War.' First published in 1986, the book swiftly became one of the most controversial and influential historical works of its time. '[The Audit of War] argued that British industry during the Second World War was scandalously inefficient, a situation Barnett blamed on an establishment more concerned with welfare than with industry, technology or the capacity of the nation to fight a war... Alan Clark records approvingly that Mrs Thatcher herself read it...' David Edgerton, London Review of Books 'A stimulating polemic.' Times Literary Supplement 'A formidable book, essential reading.' Asa Briggs, Financial Times
