The Hawker Hurricane - The Supermarine Spitfire Mantelli - Brown - Kittel - Graf, 2017-03-05 The Hawker Hurricane was the first modern British fighter before the outbreak of World War II. Until 1941 the Hurricane was the most widely used combat aircraft from the Royal Air Force and the one that bore the brunt of the first clashes with aircraft of the Luftwaffe in the skies of France and Britain. Almost 3,000 aircraft of this type were delivered to the USSR, for the law Rentals & Loans, but the Soviet pilots were generally very critical of the fighter Hawker, considered inferior, not only to the German fighters, but also its. First fighter monoplane of the RAF, the first aircraft equipped with eight machine guns, was the plane means available in greater numbers to counter the waves of attack by the Luftwaffe during the Battle of Britain. Available in twenty-six departments in the early summer of 1940, to August, there were thirty-two against nineteen Spitfire. Piloted by aces like Douglas Bader that made him a legend, the Hawker Hurricane Mk I, although less than the Bf 109-E, however, he proved to be a horse race, and especially at high altitudes could be more maneuverable and thus, to this, more suitable bomber hunter. His majesty the Spitfire. This airplane is an air legend, a real brand, and his image is inextricably linked to the British victory in the Battle of Britain. It is one of the few, perhaps the only one, whose name evokes some images even in a profane things of historical aviation. Excellent defensive machine, heavily armed, very agile, climbing fast, but the lack of range and of sufficient load capacity has not helped in the war below. The Spitfire name was suggested by Sir Robert MacLean, director of Vickers-Armstrongs at the time, who called his daughter Ann a little spitfire, a saying Elizabethan to indicate a person impetuous.

TSR2 Damien Burke, 2014-04-30 More than forty years after its cancellation, the BAC TSR2 is still a controversial aircraft. Years ahead of its time, it was abruptly cancelled by a new government when flight testing had only just begun. Built to a demanding RAF requirement, the BAC TSR2 was a revolutionary low-level strike aircraft able to deliver a tactical nuclear weapon at supersonic speed and low altitude to evade enemy radar. This fascinating new book describes in detail the aircraft, its history and the events of its cancellation. Many hitherto unseen photographs and diagrams support the detailed text, which benefits from extensive research in the BAC archives and access to newly rediscovered material. Subjects covered include the background to the requirement, and competing designs; development and production; the flight-testing programme; the full story of the cancellation and its aftermath; unbuilt variants and detailed specifications. With input from ex-BAC employees and unprecedented access to BAC archives, the detailed history of the project is revealed here for the first time. Superbly illustrated with over 400 photographs and diagrams, many in colour and many previously unpublished.

Round the Bend Nevil Shute, 2023-03-24 Round the Bend follows the life of Tom Cutter, an Englishman who becomes a pilot and settles in the Middle East after World War II. Tom starts an air freight business and becomes fascinated by the spiritual beliefs of the local Muslim population, which leads him to start his own religion called The Way. Through his travels and teachings, Tom attracts a group of devoted followers and becomes a spiritual leader. However, his unconventional beliefs and practices lead to conflict with some of the more traditional religious and political authorities in the region. Despite the challenges he faces, Tom remains committed to his beliefs and the pursuit of a more peaceful and harmonious world. The novel explores themes of religion, spirituality, cultural differences, and the clash between tradition and modernity.

Stryker Combat Vehicles Gordon L. Rottman, 2012-09-20 The eight-wheeled (8x8) Stryker combat light armored vehicle was adopted by the US Army in 2002 to provide a comparatively rapidly deployable contingency force with armor protection, tactical mobility, and heavy firepower, as well as advanced command, control communications, computer, intelligence, surveillance, and reconnaissance (C4ISR) capabilities. Covering the first new US Army release since the M1 Abrams MBT, this book details the conception, ongoing development and deployment of one of the most highly anticipated new AFVs in recent years, including its service in Iraq and the ensuing controversy surrounding the Stryker's varying successes.

The Stirling Story Michael J. F. Bowyer, 2002 Conceived in the shadow of looming war, when the RAF's bomber force was largely made up of obsolete and outmoded aircraft, the Stirling became the first British four-engined 'heavy' bomber of the Second World War. Developed, tested and brought into service in the first desperate years of the Second World War, the arrival of the Stirling marked a turning point in the aerial warfare of that conflict, the moment when the Allies went on the offensive against the German homeland. In the years that followed Stirling squadrons were at the forefront of the developing tactics of the Allied bomber campaign - target marking, pathfinding, electronic navigation, the thousand bomber raids etc. - that were ultimately to lead to the utter devastation of so many German cities. Despite this leading role the Stirling has never enjoyed the standing of the Halifax and the even more celebrated Lancaster. Handicapped by an unrealistic peacetime design

specification, it could not match the performance of its more famous successors and was withdrawn from frontline service as deliveries of Lancasters and Halifaxes gathered momentum. However, even then the Stirling proved to be versatile and adaptable as a glider tug, transport in secret SOE operations, and later as a civilian transport in the immediate post-war years. The Stirling Story is the culmination of years of exhaustive research by one of the world's foremost aviation authors. From original design specification and testing, through its development, introduction to service, developing marks and later adaptations the full story of the Shorts Stirling bomber is told with the aid of eyewitness accounts from the designers, production workers, engineers and above all the crews of the Stirling. Much more than the history of just one aircraft type, The Stirling Story is the story of RAF Bomber Command emerging from obscurity and failure to become a devastatingly effective weapon of war. It is an essential work of reference that no serious military aviation enthusiast or war historian can afford to be without, as well as a fascinating read for anyone with any interest in, or connection with, the Shorts Stirling.'
