Star Trek Classics Volume 3: Encounters with the Unknown

Nathan Archer, Janine Ellen Young, Doselle Young, Dan Abnett, Andy Lanning, Kristine Kathryn Rusch, Dean Wesley Smith, 2012 Lost in the Delta Quadrant, Captain Janeway and the crew of the U.S.S. Voyager NCC-74656 have been seeking a way home for years. But their quest is interrupted by encounters with an astonishing variety of foes - and a few new friends. This collection contains four tales that exemplify all that's best about the adventures of Voyager: False Colors, Avalon Rising, Elite Force, and Planet Killer.

Ex Machina Christopher L. Bennett, 2012-07-17 Following the events of Star Trek: The Motion Picture the captain and crew of the USS Enterprise found themselves haunted by their extraordinary encounter with the vast artificial intelligence of V'Ger, and by the sacrifice and ascension of their friend and shipmate, Willard Decker. As James T. Kirk, Spock and Leonard McCoy attempt to cope with the personal fallout of their ordeal, a chapter from their mutual past is reopened, raising troubling new questions about the relationship of God, man and A.I. On the recently settled world of Daran IV, the former refugees of the Fabrini worldship Yonada are divided by conflicting ideologies, some clinging to their theocratic past while others envision a future governed by reason alone. Years ago the officers of the Enterprise helped overthrow the Oracle, the machine-god that controlled Yonada. Now confronting the consequences of those actions, together with echoes of their strange encounter with V'Ger, Kirk, Spock and McCoy face choices which will decide the fate of a civilization - and which may change them forever.

More Brilliant than the Sun Kodwo Eshun, 2020-02-04 The classic work on the music of Afrofuturism, from jazz to jungle More Brilliant

than the Sun: Adventures in Sonic Fiction is one of the most extraordinary books on music ever written. Part manifesto for a militant posthumanism, part journey through the unacknowledged traditions of diasporic science fiction, this book finds the future shock in Afrofuturist sounds from jazz, dub and techno to funk, hip hop and jungle. By exploring the music of such musical luminaries as Sun Ra, Alice Coltrane, Lee Perry, Dr Octagon, Parliament and Underground Resistance, theorist and artist Kodwo Eshun mobilises their concepts in order to open the possibilities of sonic fiction: the hitherto unexplored intersections between science fiction and organised sound. Situated between electronic music history, media theory, science fiction and Afrodiasporic studies, *More Brilliant than the Sun* is one of the key works to stake a claim for the generative possibilities of Afrofuturism. Much referenced since its original publication in 1998, but long unavailable, this new edition includes an introduction by Kodwo Eshun as well as texts by filmmaker John Akomfrah and producer Steve Goodman aka kode9.

Gothic Charm School Jillian Vinters, 2009-06-23 An essential, fully illustrated guidebook to day-to-day Goth living There's more to being a Goth than throwing on some black velvet, dyeing your hair, and calling it a day (or a night). How do you dress with morbid flair when going to a job interview? Is there such a thing as growing too old to be a Goth? How do you explain to your grandma that it's not just a phase? Jillian Vinters, a.k.a. the Lady of the Manners, knows how to be strange and unusual without sacrificing politeness and etiquette. In *Gothic Charm School*, she offers the quintessential guide to dark decorum for all those who have ever searched for beauty in dark, unexpected places, embraced their individuality, and reveled in decadence . . . and for families and friends who just don't understand.

Bullied Carrie Goldman, 2012-08-14 The mother of a bullied first grader, popular blogger Carrie Goldman's inspiring true story triggered an outpouring of support from online communities around the world. In *Bullied*, she gives us a guide to the crucial lessons and actionable guidance she's learned about how to stop bullying before it starts. It is a book born from Goldman's post about the ridicule her daughter suffered for bringing a Star Wars thermos to school—a story that went viral on Facebook and Twitter before exploding everywhere, from CNN.com and Yahoo.com to sites all around the world. Written in Goldman's warm, engaging style, *Bullied* is an important and very necessary read for parents, educators, self-professed "Girl Geeks," or anyone who has ever felt victimized by a bully, online or in person. *Bullied* has been recognized with Gold Awards at the 2013 National Parenting Publications Awards and the 2013 Mom's Choice Awards.

Space Invaders Michel van Pelt, 2010-05-05 Manned space programs attract the most media attention, and it is not hard to understand why: the danger, the heroism, the sheer adventure we as earthbound observers can imagine when humans are involved. But robotic missions deserve a respectful and detailed history and analysis of their own, and this book provides it. Instead of describing one specific spacecraft or mission, Michel van Pelt offers a behind the scenes look at the life of a space probe from its first conceptual design to the analysis of the scientific data returned by the spacecraft.

Size Matters Not Warwick Davis, 2011-11-08 The life and times of Warwick Davis, star of Ricky Gervais's forthcoming sitcom, *Life's Too Short*. Actors work their entire careers hoping to achieve the kind of cult movie hero status that Davis achieved at the age of eleven playing Wicket W. Warrick, the lead Ewok in *Star Wars: Return of*

the Jedi. In this lively and down-to-earth memoir, Davis offers personal stories on the making of some of the most popular films of the last few decades—including the Star Wars, Harry Potter, and Leprechaun movie franchises, among many others—and shares the unique perspective of life as experienced by someone with a one-in-a-million genetic condition. The real life of the man who helped destroy a Death Star, saved a princess, defeated an evil sorceress, taught magic to Harry Potter, became a Jedi Master, and embodied a mass murdering, gold-obsessed leprechaun—the one and only Warwick Davis Warwick Davis's honest look at the highs and lows of life as an actor and pop culture icon, from his screen debut in *Star Wars: Return of the Jedi* to his starring role in Ricky Gervais's forthcoming sitcom, *Life's Too Short* Includes behind-the-scenes stories, from sweltering inside a furry Ewok costume and filling in for R2-D2 to sliding down a glacier at Mach 2 with Val Kilmer and getting kicked in the face by Ricky Gervais (again and again) Features a foreword by George Lucas, who has been friends with Davis for almost three decades Both refreshingly frank and highly entertaining, this book will help you see what life is like when it really is too short.

The Just City Jo Walton, 2015-01-13 Here in the Just City you will become your best selves. You will learn and grow and strive to be excellent. Created as an experiment by the time-traveling goddess Pallas Athene, the Just City is a planned community, populated by over ten thousand children and a few hundred adult teachers from all eras of history, along with some handy robots from the far human future—all set down together on a Mediterranean island in the distant past. The student Simmea, born an Egyptian farmer's daughter sometime between 500 and 1000 A.D, is a brilliant child, eager for knowledge, ready to strive to be her best self. The teacher Maia was

once Ethel, a young Victorian lady of much learning and few prospects, who prayed to Pallas Athene in an unguarded moment during a trip to Rome—and, in an instant, found herself in the Just City with grey-eyed Athene standing unmistakably before her. Meanwhile, Apollo—stunned by the realization that there are things mortals understand better than he does—has arranged to live a human life, and has come to the City as one of the children. He knows his true identity, and conceals it from his peers. For this lifetime, he is prone to all the troubles of being human. Then, a few years in, Sokrates arrives—the same Sokrates recorded by Plato himself—to ask all the troublesome questions you would expect. What happens next is a tale only the brilliant Jo Walton could tell. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Topography of Wellness Sara Jensen Carr, 2021-06-15 The COVID-19 pandemic has re-ignited discussions of how architects, landscapes, and urban planners can shape the environment in response to disease. This challenge is both a timely topic and one with an illuminating history. In The Topography of Wellness, Sara Jensen Carr offers a chronological narrative of how six epidemics transformed the American urban landscape, reflecting changing views of the power of design, pathology of disease, and the epidemiology of the environment. From the infectious diseases of cholera and tuberculosis, to so-called social diseases of idleness and crime, to the more complicated origins of today's chronic diseases, each illness and its associated combat strategies has left its mark on our surroundings.

While each solution succeeded in eliminating the disease on some level, sweeping environmental changes often came with significant social and physical consequences. Even more unexpectedly, some adaptations inadvertently incubated future epidemics. From the Industrial Revolution to present day, this book illuminates the constant evolution of our relationship to wellness and the environment by documenting the shifting grounds of illness and the urban landscape.

From the duo behind the massively successful and award-winning podcast Stuff You Should Know comes an unexpected look at things you thought you knew. Josh Clark and Chuck Bryant started the podcast Stuff You Should Know back in 2008 because they were curious—curious about the world around them, curious about what they might have missed in their formal educations, and curious to dig deeper on stuff they thought they understood. As it turns out, they aren't the only curious ones. They've since amassed a rabid fan base, making Stuff You Should Know one of the most popular podcasts in the world. Armed with their inquisitive natures and a passion for sharing, they uncover the weird, fascinating, delightful, or unexpected elements of a wide variety of topics. The pair have now taken their near-boundless whys and hows from your earbuds to the pages of a book for the first time—featuring a completely new array of subjects that they've long wondered about and wanted to explore. Each chapter is further embellished with snappy visual material to allow for rabbit-hole tangents and digressions—including charts, illustrations, sidebars, and footnotes. Follow along as the two dig into the underlying stories of everything from the origin of Murphy beds, to the history of facial hair, to the psychology of being lost. Have you
