Klaus H. Schmider

The Battleship Dreadnought John Roberts,2001 Launched in 1906, HMS Dreadnought was the first all big-gun battleship and, as such, revolutionized battleship design for more than a generation. Though she saw little action during her career, her influence was profound.

Thunderer William Mowll,2010-04-06 HMS Thunderer was the third Orion class battleship, one of the Super Dreadnoughts built to counter German naval expansion, and was laid down one hundred years ago in April 1910. At 22,200 tons she was the largest ship ever built on the Thames but she was to be responsible for the bankruptcy of her builders, the Thames Iron Works. The author's 1/96 scale museum-quality model of this ship reflects the massive engineering of the prototype and brings to life the power and potency of the Super Dreadnoughts. Every aspect of the building is covered, from the hull to wireless equipment, and all the different techniques required to bring a complex model battleship to completion are clearly explained, including casting in metal and GRP, silver brazing, soft soldering, metal fabrication in steel, brass, copper, aluminium and pewter, and lathe turning and milling operations for the production of guns and propellers. The author also covers the contemporary American battleship, USS Texas, the only remaining ship of that type and era, and an inspiration for any modeller setting out to tackle this subject. Not just a superb "how to" manual, the book is also an eloquent testimony to the skills of the designers and the original builders as well as a wonderful evocation of the great ships that fought at the battle of Jutland. WILLIAM MOWLL has been building large-scale ship models for more than twenty-five years. His interest is focussed on the iron ships of the nineteenth and early twentieth centuries and he has completed superb models of SS Great Britain and HMS Warrior, both on display at the sites where the prototypes were built.

The Battleship HMS Dreadnought Stefan Dramiński,2013 The text part of this book describes technical specifications of the ship and detailed history of her construction and service. This is accompanied by more than 100 color illustrations showing HMS Dreadnought's appearance in 1907, at the beginning of her career. Elements that are shown in detail include armament, boats, rig, etc. Additionally, numerous illustrations present the ship with her torpedo nets rigged. Blueprints in 1:700, 1:350, 1:200, 1:100 and 1:50 scales (general views and details) are included on a separate sheet. The publication is a great reference for building a detailed model of HMS Dreadnought.

American Rifle Alexander Rose,2009-09-29 George Washington insisted that his portrait be painted with one. Daniel Boone created a legend with one. Abraham Lincoln shot them on the White House lawn. And Teddy Roosevelt had his specially customized. In this first-of-its-kind book, historian Alexander Rose delivers a colorful, engrossing biography of an American icon: the rifle. Drawing on the words of foot soldiers, inventors, and presidents, based on extensive new research, and spanning from the Revolution to the present day, American Rifle is a balanced, wonderfully entertaining history of the rifle and its place in American culture.

The Attack on Pearl Harbor John C. Davenport,2009 Traces events leading up to and resulting from the December 7, 1941, Japanese attack on American battleships at Pearl Harbor, which brought the United States into World War II.

The Japanese Battleship Ise Carlo Cestra,2018-01-23 Ise (whose name comes from an ancient Japanese province on Honshu, now part of Mie Prefecture) was the lead ship of the two-vessel Ise-class battleships of the Imperial Japanese Navy, which saw combat service during the Pacific War. Ise was laid down as battleship 5 at the Kawasaki Heavy Industries shipyard in Kobe on 10 May 1915, launched on 12 November 1916, completed on 15 December 1917, and assigned to the Kure Naval District. Completed too late for service in World War I, Ise patrolled off the Siberian coast and in northern waters in support of Japan's Siberian Intervention against the Bolshevik Red Army. From the mid-1920s through the late 1930s, Ise patrolled mostly off of the China coast. On 12 April 1922, she hosted a delegation which included Prince of Wales, the future King Edward VIII of the United Kingdom, and the future Lord Mountbatten. Ise-class battleships were fascinating ships and their story began in 1906 with the completion of HMS Dreadnought. The appearance of the all-big-gun turbine-powered Dreadnought rendered all existing battleships obsolete overnight, and in response the rest of the world's navies initiated massive construction programs. The world's major navies had gained an insurmountable lead in the number of dreadnoughts in service or under construction. Recognizing the futility of trying to compete in sheer numbers, the Japanese Navy adopted a quality before quantity approach, building fewer ships each of much greater capability than foreign designs. In 1911 the Japanese government passed the Emergency Naval Expansion bill which authorized the building of four battlecruisers and one battleship. The battleship was to be designed and built in Japan; this ship became the Fuso. There were a number of foreign designs to take into consideration when it came time to decide the main armament for the new ships. Britain Royal Navy's Orion class was armed with the 13.5 in. gun; the US Wyoming class with 12-12 in. guns; and the succeeding New York class with 10-14 in. weapons. Japan decided to leap over the competition and fit the new ships with the 14 in. gun so Fuso-class would carry 12-14 in. weapons. Armament was not the only area where the Japanese battleship was intended to be superior to foreign designs: it was also to be at least 2 knots faster. Fuso was laid down on 11 March 1912 and she was the first battleship built in Japan using Japanese manufactured materials and weapons. Three sister ships were authorized, one of them laid down in November 1913, but financial difficulties prevented the laying down of the next two ships until 1915, which allowed time for some design improvements. The forecastle deck was shortened, the amidships turrets were grouped together and placed aft of the second funnel and the hull length was increased by 10 ft. to give more machinery space. The changes resulted in the two ships becoming known as the Improved Fuso or Ise class.

Hitler's Fatal Miscalculation Klaus H. Schmider,2021-01-28 Hitler's decision to declare war on the United States has baffled generations of historians. In this revisionist new history of those fateful months, Klaus H. Schmider seeks to uncover the chain of events which would incite the German leader to declare war on the United States in December 1941. He provides new insights not just on the problems afflicting German strategy, foreign policy and war production but, crucially, how they were perceived at the time at the top levels of the Third Reich. Schmider sees the declaration of war on the United States not as an admission of defeat or a gesture of solidarity with Japan, but as an opportunistic gamble by the German leader. This move may have appeared an excellent bet at the time, but would ultimately doom the Third Reich.

The Vertigo Years Philipp Blom,2010-11-02 Examines how changes from the Industrial Revolution prior to World War I brought about radical transformation in society, changes in education, and massive migration in population that led to one of the bloodiest events in history.

Claude A. Swanson of Virginia Henry C. FerrellJr.,2014-07-15 Spanning most of the years of the one-party South, the public career of Virginian Claude A. Swanson, congressman, governor, senator, and secretary of the navy, extended from the second administration of Grover Cleveland into that of Franklin Roosevelt. His record, writes Henry C. Ferrell, Jr., in this definitive biography, is that of a skillful legislative diplomat and an exceedingly wise executive encompassed in the personality of a professional politician. As a congressman, Swanson abandoned Cleveland's laissez faire doctrines to become the leading Virginia spokesman for William Jennings Bryan and the Democratic platform of 1896. His achievements as a reform governor are equaled by few Virginia chief executives. In the Senate, Swanson worked to advance the programs of Woodrow Wilson. In the 1920s, he contributed to formulation of Democratic alternatives to Republican policies. In Roosevelt's New Deal cabinet, he helped the Navy obtain favorable treatment during a decade of isolation. The warp and woof of local politics are well explicated by Ferrell to furnish insight into personalities and events that first produced, then sustained, Swanson's electoral success. He examines Virginia educational, moral, and social reforms; disfranchisement movements; racial and class politics; and the impact of the woman's vote. And he records the growth of the Hampton Roads military-industrial complex, which Swanson brought about. In Virginia, Swanson became a dominant political figure, and Ferrell's study challenges previous interpretations of Virginia politics between 1892 and 1932 that pictured a powerful, reactionary Democratic Organization, directed by Thomas Staples Martin and his successor Harry Flood Byrd, Sr., defeating would-be progressive reformers. A forgotten Virginia emerges here, one that reveals the pervasive role of agrarians in shaping the Old Dominion's politics and priorities.

Kennedy Book Award For six months in 1919, after the end of "the war to end all wars," the Big Three—President Woodrow Wilson, British prime minister David Lloyd George, and French premier Georges Clemenceau—met in Paris to shape a lasting peace. In this landmark work of narrative history, Margaret MacMillan gives a dramatic and intimate view of those fateful days, which saw new political entities—Iraq, Yugoslavia, and Palestine, among them—born out of the ruins of bankrupt empires, and the borders of the modern world redrawn.
