The Unseen Olympic Patrick Mylon, 2017-09 RMS Olympic was created during a period of intense competition between the north Atlantic shipping lines. Sister to the ill-fated Titanic and Britannic, Olympic encompassed all the qualities the line was striving for in size, opulence and luxury. Although sometimes overshadowed in the public consciousness by her two sisters, given their unfortunate fates, she enjoyed a lengthy and distinguished career that they did not, including time spent as a troopship in the First World War. She served as one of the White Star Line's leading vessels from 1911 to 1935, when she was finally scrapped. Packed with stunning postcards and photographs from author Patrick Mylon's unrivalled collection, this sumptuous book is the definitive 'unseen' history of this grand ocean liner.

**RMS Olympic** Brian Hawley, 2013-10-30 On October 20, 1910, RMS Olympic was launched at Belfast. She was the first of a trio of steamships constructed for the White Star Line and, when built, was the largest ship in the world.

*Titanic and Her Sisters Olympic and Britannic* Peter Davies-Garner, 2011-07-30 The ShipCraft series explores the iconic pleasure vessels Titanic, Olympic, and Britannic in fully illustrated detail for building your own model ship. In the first of the ShipCraft series to cover non-naval vessels, this meticulously researched and illustrated volume looks at the legendary cruise ship RMS Titanic and her sisters, Olympic and Britannic. Written for the serious model ship builder, this book not only covers the many model kits available, but a concise history of the ship's class, including every detail that contributed to the ship's creation. Accompanied by hundreds of photographs of models in various scales, the text covers paint colors, line drawings, and scale plans, as well as the differences in the ships' appearance over time. An invaluable resource on available models, their pros and cons, and ways to modify and customize each one, this ShipCraft title concludes with a reference section essential to any modeler.

*Hospital Ships & Troop Transport of the First World War* Campbell McCutcheon, 2015-11-15 Campbell McCutcheon tells the story of the First World War hospital ships.

*RMS Olympic* Mark Chirnside, 2004 RMS Olympic has been overshadowed by her ill-fated sisters Titanic and Britannic for over ninety years. The first of a new breed of superliner, the list of superlatives that apply to Olympic has is breathtaking. This is the first detailed history of the Olympic and tells the story of the ship and her time in service at war and in peace.

*Olympic, Titanic, Britannic* Mark Chirnside, 2012 At the beginning of the twentieth century, competition between the North Atlantic shipping lines was fierce. While Britain responded to the commercial threat posed by the growing German merchant marine, there was also rivalry between the great Cunard Line and its chief competitor, the White Star Line. Against this backdrop Olympic, Titanic and Britannic were conceived. Designed for passenger comfort, they were intended to provide luxurious surroundings and safe, reliable service rather than record-breaking speed. Ironically, fate decreed that only Olympic would ever complete a single commercial voyage and she went on to serve for a quarter of a century in peace and war. Titanic's name would become infamous after she sank on her maiden voyage. The third sister, Britannic, saw a brief and commendable career as a hospital ship during the First World War, sinking in the Aegean Sea in 1916.

**A Man and His Ship** Steven Ujifusa, 2013-06-04 "A fascinating historical account...A snapshot of the American Dream culminating with this country's mid-century greatness" (The Wall Street Journal) as a man endeavors to build the finest, fastest, most beautiful ocean liner in history. The story of a great American Builder at the peak of his power, in the 1940s and 1950s, William Francis Gibbs was considered America's best naval architect. His quest to build the finest, fastest, most beautiful ocean liner of his time, the SS United States, was a topic of national fascination. When completed in 1952, the ship was hailed as a technological masterpiece at a time when "made in America" meant the best. Gibbs was an American original, on par with John Roebling of the Brooklyn Bridge and Frank Lloyd Wright of Fallingwater. Forced to drop out of Harvard following his family's sudden financial ruin, he overcame debilitating shyness and lack of formal training to become the visionary creator of some of the finest ships in history. He spent forty years dreaming of the ship that became the SS United States. William Francis Gibbs was driven, relentless, and committed to excellence. He loved his ship, the idea of it, and the realization of it, and he devoted himself to making it the epitome of luxury travel during the triumphant post-World War II era. Biographer Steven Ujifusa brilliantly describes the way Gibbs worked and how his vision transformed an industry. A Man and His Ship is a tale of ingenuity and enterprise, a truly remarkable journey on land and sea.

*Salvage Man* John Doughty Alden, 1998 Few American naval officers have been as unconventional as Edward Ellsberg and still managed to rise to the rank of rear admiral. This probing biography shows Ellsberg time and again confronting the Navy's conservatism, service politics, and professional jealousies to literally salvage the unsalvageable. Taking full advantage of Ellsberg's extensive collection of papers and archives on both sides of the Atlantic, this insightful study is the first to focus on the determined admiral.

Miniature Ship Models Paul Jacobs, 2008-05-30 This book is the first comprehensive history of how the 1:1200 scale and its 1:1250 continental equivalent became accepted as the modern standard for miniature ship models. The origins can be traced back to the first years of the twentieth century and their use as identification aids by the military during the First World War, but when peace came the manufacturers aimed their increasingly sophisticated products at collectors, and acquiring, modifying or scratch-building miniature ship models has been an avidly pursued hobby ever since. This book charts the commercial rise and fall of the manufacturers, and the advancing technology that produces ever more detailed and accurate replicas. The author - himself a lifetime collector and

builder of models - looks at the products of each manufacturer, past and present, rating their quality and suggesting why some are regarded as more collectible than others. But the book deals with more than off-the-shelf models, covering subsidiary issues like painting, modifying and diorama settings, and is illustrated throughout with many of the finest examples of the genre. The combination of fascinating background information with stunning visual presentation will make this book irresistible to any collector or enthusiast.

**Naval Camouflage 1914-1945** David L. Williams,2001 Although it is a subject of immense importance to warship enthusiasts, modelmakers, photograph collectors, and indeed academic naval historians, there has never been an authoritative history of camouflage. Apart from the huge scale of the subject, the reason for this lies largely in the fragmented nature of the surviving evidence, and the ad hoc nature of much wartime development. This book does not claim to be such a narrative history, but it does set out to provide a comprehensive study. Visual and illustrative in its approach, it is Anglo-American in emphasis, but the camouflage patterns of enemy navies (and selected neutrals) are covered as well.

**Miniature Merchant Ships** John Bowen,1997 This practical guide to waterline ship modelling in 1/1200 scale contains 30 sets of plans for the reader to construct their own models.

**More Miniature Merchant Ships** John Bowen,2003 John Bowen brings his knowledge and expertise of waterline ship modelling to a second volume of miniature merchant ships, including examples such as Haverford (1901), Carpathia (1903), Oronsay (1925) and Braemar Castle (1952). The book opens with a section giving advice on initial preparations - finding and using plans, suitable materials and tools. This section also presents an alphabetical list of the principal fittings on a ship (those that would be included on this type of model) - hatches, winches, capstans, anchors, etc - with details and diagrams on how to make them. Section II comprises 30 sets of plans of ships built between 1900 and 1969. These are accompanied with at least one photograph of the ship, a full specification, brief history, and notes on essential constructional details, including colour scheme. Readers will recognise the authoritative yet approachable style John has brought to several ship modelling titles, which will appeal to both beginners and more experienced modellers. A companion volume to the highly successful Miniature Merchant Ships, More Miniature Merchant Ships includes 30 1/1200 scale plans of liners, cargo ships and passenger cargo ships, each supplied with comprehensive modelling notes. More than 60 photographs of the prototype ships underway supply detailed pictorial references. This book, like Miniature Merchant Ships, is an essential addition to the library of any ship modeller.John Bowen is the author of several acclaimed titles for Conway Maritime Press, including Miniature Merchant Ships, published in 1997. Building waterline models has always been his favourite form of modelling and this book is a culmination of his continuing achievements inthis area of ship modelling. John was deputy editor of Conway's quarterly journal Model Shipwright when it was launched in 1972 and has been its editor since 1974. He contributes a plan and instructions for a miniature merchant ship to each issue. John is a member of the Royal Institution of Naval Architects.
