The Year 3000 Paolo Mantegazza,2010-11-01 First published in 1897,The Year 3000is the most daring and original work of fiction by the prominent Italian anthropologist Paolo Mantegazza. A futuristic utopian novel, the book follows two young lovers who, as they travel from Rome to the capital of the United Planetary States to celebrate their mating union, encounter the marvels of cultural and scientific advances along the way. Intriguing in itself,The Year 3000is also remarkable for both its vision of the future (predicting an astonishing array of phenomena from airplanes, artificial intelligence, CAT scans, and credit cards to controversies surrounding divorce, abortion, and euthanasia) and the window it opens on fin de siecle Europe. Published here for the first time in English, this richly annotated edition features an invaluable introductory essay that interprets the intertextual and intercultural connections within and beyond Mantegazza's work. For its critical contribution to early science fiction and for its insights into the hopes, fears, and clash of values in the Western world of both Mantegazza's time and our own, this book belongs among the visionary giants of speculative literature.

Ebbs and Flows of Ancient Imperial Power, 3000 BC-AD 900 Will Slatyer, 2014-05 Ebbs and Flows of Ancient Imperial Power, 3000 BC-AD 900 provides a flow of history throughout the ancient world, describing the ebbs and flows of empires and their power. Author Will Slatyer presents empires in China and India in the same timeframes as Mediterranean empires to show patterns of similarity. During ancient times, wars were a vital part of power-building, focusing on gaining territory and wealth for ancient priests and kings who evolved into imperial leaders with absolute power. Religion was an important factor in allowing the popular power of leaders--until contamination of foreign religions diluted their authority. the financial evolution had its origins in the weights of precious metals owned by temples,

which were then converted into gold and silver coins that could be used for retail purchases and to pay individual taxes. When governments took full control of the minting of coins, they also commenced the debasement of the value of money that continues to the present day. Ebbs and Flows of Ancient Imperial Power, 3000 BC-AD 900 shows that fear and greed experienced by the priest, kings, pharaohs, and emperors of ancient times have not changed from the fear and greed of modern leaders. Much can be learned from an overview of historic empires.
