Private Military and Security Companies and States Christopher Spearin, 2017-08-02 This book identifies and explains the functional and ideational boundaries regarding what states and Private Military and Security Companies (PMSCs) both do and possess regarding land power, sea power, and air power. Whereas the mercenaries, privateers, and chartered companies of years past held similar characteristics to state military forces, the PMSCs of today are dissimilar for two reasons: a conventional forces norm amongst states and a state proclivity towards the offensive. These factors reveal both the limitations of and the possibilities for contemporary security privatization. This volume is ideal for civilian and military practitioners and students wishing to develop a detailed understanding of what the private military and security industry has to offer and why it is structured the way it is.

Arms, Transparency, and Security in South-East Asia Bates Gill, J. N. Mak, 1997 This report, jointly sponsored by SIPRI and the Maritime Institute of Malaysia (MIMA), draws together the work of eight experts on armaments and Asia-Pacific security affairs to present analysis and extensive data on arms- and defence-related transparency mechanisms in South-East Asia. It also includes a de facto arms trade register for South-East Asia covering the period 1975-96. The book will prove useful to security analysts and policy makers seeking analysis of and practical approaches to transparency and confidence building in South-East Asia.

**Knights of the Realm** Paul Chambers, 2013

People's Liberation Army After Next Susan M Puska, 2012-08-01 An analytical schism has developed over differing assessments of China's military modernization. Underlying this debate are at least two key questions. First, will the ongoing China's People's Liberation Army (PLA) modernization provide China with significant offensive power projection and/or preemptive capability? If so, by when? Second, does the pace and success of China's military modernization constitute a threat to the United States and/or its friends and allies in the Asia-Pacific region? At the source of these differing views on the pace and likely success of the PLA modernization is a lack of hard evidence, aggravated by a Chinese tendency to conceal both strengths and weaknesses. There are also analysts who are locked into positions on the PLA that the evidence seems unable to alter. Lack of information is often muddled by anecdotal knowledge, sometimes provided by Chinese interlocutors, that may be impossible to confirm or refute. In addition, a large body of conventional wisdom about the PLA has built up over time, which may inhibit fresh reassessment. Finally, peer comparisons of the PLA to the U.S. military, which is without equal in the post-Cold War period, may shape analysis of the PLA's capabilities and shortfalls. As a result, conclusions about China's military modernization often leave considerable room for interpretation on any side of an argument. The policy decisions made today based in part on the absence of hard analysis will likely haunt U.S. and allied policy and interests well into the 21st century, as China's comprehensive strength and historic aspirations mature. In order to minimize miscalculations about the PLA modernization, debate is essential, for it can help reduce the twin analytical evils of overestimation and underestimation. Debate can reduce wishful thinking or demonization about China's strategic capability and intentions. It may also preclude counterproductive self-imposed constraints on U.S. policy options based on fear of self-fulfilling prophecies of a China threat. Active debate, finally, can lead to a reevaluation of old, well-worn assumptions, and spur greater exploitation of publicly available information about the PLA and China's national security. All of this would potentially help to develop a clearer picture of China's People's Liberation Army After Next into the 21st century.

Shifting Power in Asia-Pacific? Enrico Fels, 2016-11-03 This book investigates whether a power shift has taken place in the Asia-Pacific region since the end of the Cold War. By systematically examining the development of power dynamics in Asia-Pacific, it challenges the notion that a wealthier and militarily more powerful China is automatically turning the regional tides in its favour. With a special emphasis on Sino-US competition, the book explores the alleged linkage between the regional distribution of relevant material and immaterial capabilities, national power and the much-cited regional power shift. The book presents a novel concept for measuring power in international relations by outlining a composite index on aggregated power (CIAP) that includes 55 variables for 44

regional countries and covers a period of twenty years. Moreover, it develops a middle power theory that outlines the significance of middle powers in times of major power shifts. By addressing political, military and economic cooperation via a structured-focused comparison and by applying a comparative-historical analysis, the book analyses in depth the bilateral relations of six regional middle powers to Washington and Beijing.

*Freax* Tamás, Polgár, 2016-04-17 FREAX – the biggest book ever written about the history of the computer demoscene. The book tells the complete history of the Commodore 64 and the Amiga, both about the machines and about the underground subcultures around them, from the cracker- and warez-scene to the demoscene, from hacking and phreaking to the ASCII art scene. Interviews with scene celebrities, former key persons of the computer industry, citations from contemporary magazines and fanzines make the narrative history of the big adventure complete. The book contains 350 pages and is illustrated with 480 color photos and screenshots. This is the comprehensive guide to the golden era of home computers.

A Study of Vietnam's Control over Online Anti-state Content Dien Nguyen An Luong, 2022-02-21  
Over the past two decades, the fixation on anti-state content has shaped the way Vietnamese authorities deployed various censorship strategies to achieve the dual goals of creating a superficial openness while maintaining a tight grip on online discourses. These considerations dictated how several regulations on Internet controls were formulated and enforced. Vietnamese censors also selectively borrowed from China's online censorship playbook, a key tenet of which is the fear-based approach. The modus operandi for the authorities is to first harp on what they perceive as online foreign and domestic threats to Vietnam's social stability. Then those threats are exhaustively used to enforce tougher measures that are akin to those implemented in China. But unlike China, Vietnam has not afforded to ban Western social media platforms altogether. Realizing that they would be better off exploiting social media for their own gains, Vietnamese authorities have sought to co-opt and utilize it to curb anti-state content on the Internet. The lure of the Vietnamese market has also emboldened Facebook and Google's YouTube to consider it fit to acquiesce to state censorship demands. The crackdown on anti-state content and fear-based censorship are likely to continue shaping Vietnam's Internet controls, at least in the foreseeable future. The question is how both Internet users and the authorities will make the most of their unlikely—and fickle—alliance with social media to fulfil their agendas.

**The Maritime Strategy of China in the Asia-Pacific Region** Paul An-hao Huang, 2010  
*Chinese Anti-Ship Ballistic Missile (ASBM) Development* Andrew S. Erickson, 2016-08-02 China's anti-ship ballistic missile (ASBM), the DF-21D, has reached the equivalent of Initial Operational Capability. Although it probably has been deployed in small numbers, additional challenges and tests remain. This study examines the ASBM's capability and history, showing how the DF-21D meets multiple priorities in Chinese defense modernization and in the national security bureaucracy, as well its implications for the United States. The ASBM's physical threat to U.S. Navy ships will be determined by the development of associated systems and organizations, which currently limit data fusion and coordination in the complex task of identifying a U.S. aircraft carrier in the open ocean. Still, the ASBM poses a direct threat to the foundations of U.S. power project in Asia and will undermine the U.S. position, unless efforts to counter its political-military effects are taken.

**Asia Pacific Security Outlook 2005** Richard W. Baker, Charles E. Morrison, 2005-07 The Asia Pacific Security Outlook series provides assessments of the security environment, defense issues, and regional and global cooperation from the perspectives of countries that participate in the ASEAN Regional Forum. This ninth edition reports on the impact of such recent trends and events as the continuing slow-motion crisis over North Korea's nuclear program and other potential proliferation of weapons of mass destruction; further terrorist attacks combined with the forces of radical Islamism and regional rebellion that threaten numerous countries in the region; stresses in the relations of major regional powers, including China's relations with the United States (especially over Taiwan) and

Japan; and new questions about the long-term future of a U.S. presence in the region. Adding the toll of natural disasters, disease, and persistent poverty, human security is under threat virtually throughout the region. Based on the work and expertise of a multinational team of security analysts and written for generalists and specialists alike, the Outlook is the most concise and authentic comparative work in this field. Contributors include Ross Cottrill (Australian Institute of International Affairs), Allen G. Sens (University of British Columbia), Martin Wagener (University of Trier, Germany), Philips Vermonte (Centre for Strategic and International Studies, Indonesia), Ken Jimbo (Japan Forum for International Relations), Kim Sung-han, (Ministry of Foreign Affairs and Trade, ROK), Elina Noor (Institute of Strategic and International Studies, Malaysia), Bayarmagnai Toinkhoo (Institute for Strategic Studies, Mongolia), Peter Cozens (Victoria University of Wellington, New Zealand), Victor Cha (Georgetown University), Ronald J. May (Australian National University), Noel M. Morada (Institute for Strategic and Development Studies, Philippines), Sergey Sevastyanov (Vladivostok State University of Economics, Russia), Yeo Lay Hwee (Singapore Institute of International Affairs), Mallika Joseph (Institute of Peace and Conflict Studies, India), Sakkarin Niyomsilpa (Kasikorn Research Center, Institute of Security and International Studies, Thailand), Hoang Anh Tuan (Research Institute for International Relations, Vietnam), Richard W. Baker (East-West Center), and Charles E. Morrison (East-West Center).

*Report on the Bottom-up Review* United States. Department of Defense, Les Aspin, 1993 In March 1993, Secretary of Defense Aspin initiated a comprehensive review of the nation's defense strategy, force structure, modernization, infrastructure, and foundations. He felt that a department-wide review needed to be conducted from the bottom up because of the dramatic changes that have occurred in the world as a result of the end of the Cold War and the dissolution of the Soviet Union. These changes in the international security environment have fundamentally altered America's security needs. Thus, the underlying premise of the Bottom-Up Review was that we needed to reassess all of our defense concepts, plans, and programs from the ground up. This final report on the Bottom-Up Review provides the results of that unprecedented and collaborative effort. It represents the product of hundreds of individuals' labor and dedication. It describes the extensive analysis that went into the review and the recommendations and decisions that emerged.

The Imperial Japanese Navy in the Pacific War Mark Stille, 2014-11-20 An highly illustrated examination of the key ships, tactics and operations of the Imperial Japanese Navy in the War in the Pacific in World War II. The Imperial Japanese Navy (IJN) was the third most powerful navy in the world at the start of World War II, and came to dominate the Pacific in the early months of the war. This was a remarkable turnaround for a navy that only began to modernize in 1868, although defeats inflicted on the Russians and Chinese in successive wars at the turn of the century gave a sense of the threat the IJN was to pose. Bringing together for the first time material previously published in Osprey series books, and with the addition of new writing making use of the most recent research, this book details the Japanese ships which fought in the Pacific and examines the principles on which they were designed, how they were armed, when and where they were deployed and how effective they were in battle. The Imperial Japanese Navy in the Pacific War provides a history of the IJN's deployment and engagements, analysis of the evolution of strategy and tactics, and finally addresses the question of whether it truly was a modern navy, fully prepared for the rigors of combat in the Pacific. Illustrated throughout with photographs and detailed colour artworks, this is a valuable reference source for Pacific War enthusiasts and historians alike.

**Japan's Security Renaissance** Andrew L. Oros, 2017-03-07 For decades after World War II, Japan chose to focus on soft power and economic diplomacy alongside a close alliance with the United States, eschewing a potential leadership role in regional and global security. Since the end of the Cold War, and especially since the rise of Prime Minister Shinzo Abe, Japan's military capabilities have resurged. In this analysis of Japan's changing military policy, Andrew L. Oros shows how a gradual awakening to new security challenges has culminated in the multifaceted security renaissance of the past decade. Despite openness to new approaches, however, three historical legacies—contested memories of the Pacific War and Imperial Japan, postwar anti-militarist convictions, and an unequal

relationship with the United States—play an outsized role. In Japan's Security Renaissance Oros argues that Japan's future security policies will continue to be shaped by these legacies, which Japanese leaders have struggled to address. He argues that claims of rising nationalism in Japan are overstated, but there has been a discernable shift favoring the conservative Abe and his Liberal Democratic Party. Bringing together Japanese domestic politics with the broader geopolitical landscape of East Asia and the world, Japan's Security Renaissance provides guidance on this century's emerging international dynamics.

**The Diffusion of Military Power** Michael C. Horowitz, 2010-07-01 The Diffusion of Military Power examines how the financial and organizational challenges of adopting new methods of fighting wars can influence the international balance of power. Michael Horowitz argues that a state or actor wishing to adopt a military innovation must possess both the financial resources to buy or build the technology and the internal organizational capacity to accommodate any necessary changes in recruiting, training, or operations. How countries react to new innovations--and to other actors that do or don't adopt them--has profound implications for the global order and the likelihood of war. Horowitz looks at some of the most important military innovations throughout history, including the advent of the all-big-gun steel battleship, the development of aircraft carriers and nuclear weapons, and the use of suicide terror by nonstate actors. He shows how expensive innovations can favor wealthier, more powerful countries, but also how those same states often stumble when facing organizationally complicated innovations. Innovations requiring major upheavals in doctrine and organization can disadvantage the wealthiest states due to their bureaucratic inflexibility and weight the balance of power toward smaller and more nimble actors, making conflict more likely. This book provides vital insights into military innovations and their impact on U.S. foreign policy, warfare, and the distribution of power in the international system.

**Honor, Symbols, and War** Barry O'Neill, 2001 A lively and profound analysis of the role of symbols in international relations

**Securing Japan** Richard J. Samuels, 2011-07-07 For the past sixty years, the U.S. government has assumed that Japan's security policies would reinforce American interests in Asia. The political and military profile of Asia is changing rapidly, however. Korea's nuclear program, China's rise, and the relative decline of U.S. power have commanded strategic review in Tokyo just as these matters have in Washington. What is the next step for Japan's security policy? Will confluence with U.S. interests—and the alliance—survive intact? Will the policy be transformed? Or will Japan become more autonomous? Richard J. Samuels demonstrates that over the last decade, a revisionist group of Japanese policymakers has consolidated power. The Koizumi government of the early 2000s took bold steps to position Japan's military to play a global security role. It left its successor, the Abe government, to further define and legitimate Japan's new grand strategy, a project well under way—and vigorously contested both at home and in the region. Securing Japan begins by tracing the history of Japan's grand strategy—from the Meiji rulers, who recognized the intimate connection between economic success and military advance, to the Konoye consensus that led to Japan's defeat in World War II and the postwar compact with the United States. Samuels shows how the ideological connections across these wars and agreements help explain today's debate. He then explores Japan's recent strategic choices, arguing that Japan will ultimately strike a balance between national strength and national autonomy, a position that will allow it to exist securely without being either too dependent on the United States or too vulnerable to threats from China. Samuels's insights into Japanese history, society, and politics have been honed over a distinguished career and enriched by interviews with policymakers and original archival research. Securing Japan is a definitive assessment of Japanese security policy and its implications for the future of East Asia.

**Swarm Troopers** David Hambling, 2015-12-10 Small unmanned aircraft are already transforming warfare, with hand-launched scouts like the Raven and lethal tactical drones like Switchblade already in use by US forces. A bigger revolution is on the way, as swarming software allows a single operator to control large numbers of drones, and smartphone technology means they can be built for \$1,000 each -- by anybody, not just governments. This book looks at the history of drone warfare, the rise of

big drones like the Predator and how they are being eclipsed by smaller unmanned aircraft. And how the future is being shaped by smartphone technology, swarm software, miniaturised munitions and energy-harvesting that allows small drones to fly forever. It also looks at why current air defence cannot stop the swarms, and what drone swarms will mean for the balance of power and future wars. This is the world of Swarm Troopers

**Rethinking Japanese Public Opinion and Security** Paul Midford, 2011-01-24 Rethinking Japanese Public Opinion and Security argues that Japanese public opinion matters and has acted to prevent overseas military deployments involving combat while increasingly supportive of a more normal military establishment capable of autonomously defending Japanese territory.

*The Spanish-American War* Joseph Smith, 1994 The short but decisive war of 1898 is described and explained in its full local context, from the Cuban revolt of 1895 onwards, whilst also presenting it in its broadest, international context. It also addresses the wider question of imperialism and the rise of the USA to world power status at the end of the 19th century.
