**Space Wars** Michael J. Coumatos, William B. Scott, William J. Birnes, 2007-04-17 Michael J. Coumatos is a former U.S. Navy test pilot, ship's captain, and commodore; U.S. Space Command director of wargaming; and a government counterterrorism advisor. William Scott is a retired bureau chief of Aviation Week and Space Technology and a nine-year Air force veteran who served as aircrew on nuclear sampling missions. He is a six-time Royal Aeronautical Society Journalist of the Year finalist, and won the Society's 1998 Lockheed Martin Award for the Best Defense Submission. He also received both the 2006 and 2007 Messier-Dowty awards for Best Airshow Submission. With the help of New York Times bestselling author William J. Birnes, these renowned experts have joined forces to grippingly depict how the first hours of World War III might play out in the year 2010. Coumatos, Scott, and Birnes take the reader inside U.S. Strategic Command, where top military commanders, space-company executives, and U.S. intelligence experts are conducting a DEADSATS II wargame, exploring how the loss of critical satellites could lead to nuclear war. The players don't know that the war they are gaming has already begun, miles above them in the lifeless, silent cold of space. Jam-packed with the actual systems and secret technologies the United States has or will soon field to protect its space assets, *Space Wars* describes a near-future nuclear nightmare that terrorists will relish but politicians prefer to ignore. In a quieter, more peaceful time, *Space Wars* would be an exciting work of fiction. But with the United States now at war, *Space Wars* is all too real. . **The Weapon Wizards** Yaakov Katz, Amir Bohbot, 2017-01-31 A lively account of Israel's evolving military prowess...if The Weapon Wizards were a novel, it would be one written by Horatio Alger; if it were a biblical allegory, it would be the story of David and Goliath. —The New York Times Book Review From drones to satellites, missile defense systems to cyber warfare, Israel is leading the world when it comes to new technology being deployed on the modern battlefield. The Weapon Wizards shows how this tiny nation of 8 million learned to adapt to the changes in warfare and in the defense industry and become the new prototype of a 21st century superpower, not in size, but rather in innovation and efficiency—and as a result of its long war experience. Sitting on the front lines of how wars are fought in the 21st century, Israel has developed in its arms trade new weapons and retrofitted old ones so they remain effective, relevant, and deadly on a constantly-changing battlefield. While other countries begin to prepare for these challenges, they are looking to Israel—and specifically its weapons—for guidance. Israel is, in effect, a laboratory for the rest of the world. How did Israel do it? And what are the military and geopolitical implications of these developments? These are some of the key questions Yaakov Katz and Amir Bohbot address.

Drawing on a vast amount of research, and unparalleled access to the Israeli defense establishment, this book is a report directly from the front lines.

**The Culture of Military Innovation** Dima Adamsky, 2010-01-27 This book studies the impact of cultural factors on the course of military innovations. One would expect that countries accustomed to similar technologies would undergo analogous changes in their perception of and approach to warfare. However, the intellectual history of the Revolution in Military Affairs (RMA) in Russia, the US, and Israel indicates the opposite. The US developed technology and weaponry for about a decade without reconceptualizing the existing paradigm about the nature of warfare. Soviet 'new theory of victory' represented a conceptualization which chronologically preceded technological procurement. Israel was the first to utilize the weaponry on the battlefield, but was the last to develop a conceptual framework that acknowledged its revolutionary implications. Utilizing primary sources that had previously been completely inaccessible, and borrowing methods of analysis from political science, history, anthropology, and cognitive psychology, this book suggests a cultural explanation for this puzzling transformation in warfare. *The Culture of Military Innovation* offers a systematic, thorough, and unique analytical approach that may well be applicable in other perplexing strategic situations. Though framed in the context of specific historical experience, the insights of this book reveal important implications related to conventional, subconventional, and nonconventional security issues. It is therefore an ideal reference work for practitioners, scholars, teachers, and students of security studies.

*Market Economy and the State* Dr. R. K. Sinha, 2001 Collection of articles presented at a conference.

*Arming Asia* Richard Bitzinger, 2016-12-19 Bitzinger examines the phenomenon of attempted self-reliance in arms production within Asia, and assesses the extent of success in balancing this independence with the growing requirements of next-generation weapons systems. He analyzes China, India, Japan, South Korea, and Southeast Asia. The overarching question in the book is whether self-reliance is a strategically viable solution for development and manufacturing of arms. Given the ever-changing dynamics and increasing demand for sophisticated next-generation weaponry, will these countries be able to individually sustain their domestic defense industries and constantly update their technologies? This is the first book to analyze arms production from a regional perspective.

**Towards a Brave New Arms Industry?** Richard Bitzinger, 2014-08-27 In the post-Cold War era, most countries have been forced to radically reduce their arms industries, and abandoned self-sufficiency in favour of a subordinate role in an increasingly globalized worldwide defence industry. This has significant implications for the future of armaments production, for proliferation, and for arms control.

*Report of the Quadrennial Defense Review* William S. Cohen, 1997 Partial contents include: (1) Design, Approach, and Implementation of the Quadrennial Defense Review; (2) The Global Security Environment; (3) Defense Strategy; (4) Alternative Defense Postures; (5) Forces and Manpower; (6) Force Readiness; (7) Transforming U.S. Forces For the Future; (8) Achieving a 21st Century Defense Infrastructure; (9) Defense Resources Section; and (10) Comments by the Chairman of the Joint Chiefs of Staff.

**Military Innovation in Small States** Michael Raska, 2015-11-06 This book provides a comprehensive assessment of the global diffusion of the Revolution in Military Affairs (RMA)

and its impact on military innovation trajectories in small states. Although the 'Revolution in Military Affairs' (RMA) concept has enjoyed significant academic attention, the varying paths and patterns of military innovation in divergent strategic settings have been overlooked. This book seeks to rectify this gap by addressing the broad puzzle of how the global diffusion of RMA-oriented military innovation – the process of international transmission, communication, and interaction of RMA-related military concepts, organizations, and technologies – has shaped the paths, patterns, and scope of military innovation of selected small states. In a reverse mode, how have selected small states influenced the conceptualization and transmission of the RMA theory, processes, and debate? Using Israel, Singapore and South Korea as case studies, this book argues that RMA-oriented military innovation paths in small states indicate predominantly evolutionary trajectory, albeit with a varying patterns resulting from the confluence of three sets of variables: (1) the level of strategic, organizational, and operational adaptability in responding to shifts in the geostrategic and regional security environment; (2) the ability to identify, anticipate, exploit, and sustain niche military innovation – select conceptual, organizational, and technological innovation intended to enhance the military's ability to prepare for, fight, and win wars, and (3) strategic culture. While the book represents relevant empirical cases for testing the validity of the RMA diffusion hypotheses, from a policy-oriented perspective, this book argues that these case studies offer lessons learned in coping with the security and defence management challenges posed by military innovation in general. This book will be of much interest for students of military innovation, strategic studies, defence studies, Asian politics, Middle Eastern politics and security

studies in general.

The Modern Defense Industry Richard A. Bitzinger, 2009-10-15 Whether it's guns and ammunition or multidimensional anti-terrorism systems, the defense industry is dynamic, complex, and ubiquitous. It is also mysterious, powerful, and controversial, involving thousands of players worldwide—from suppliers and producers to government and military procurers to shadowy figures that trade in the black market. This comprehensive, two-volume reference will explore, on a global scale, the various issues, concepts, problems, and controversies surrounding the rise of the modern defense industry. Unparalleled in its scope and insight, The Modern Defense Industry will prove invaluable to the industry's critics and champions alike. The phenomenon of a more-or-less permanent defense industry—especially one so wide in scale, breadth (air, sea, land, and space), technology, and geography—is still relatively new. Until now, its implications for politics, economics, and technology have not been adequately discussed in an authoritative, accessible format for scholars and researchers, business people, journalists, policymakers, and interested laymen. The Modern Defense Industry addresses the period from 1945 to the present, covering the United States, Europe, Russia, China, Israel, and other important arms-producing and arms-procuring countries. Including essays by experts from around the world, a glossary, data on firms and governments, laws and policies, primary documents, case studies, and a host of other elements, this set will be a unique resource for anyone interested in the arms industry. It will also offer penetrating insights into topics like international relations and diplomacy, arms proliferation, and contemporary politics.

Volume I comprises chapters by experts in the field on topics like the relationship between the industry, military, and government; how new modes of warfare are changing the industry; the implications of globalization on the industry; the black and gray areas of the arms trade; and much more. Volume II features an extensive A-Z glossary of terms, lists of defense firms and government agencies, annotated primary documents, lists of leading defense contractors and key weapons systems, an analysis of key legislation, and professional organizations. The Modern Defense Industry sets the standard for state of the art overviews of an industry that has, for better or worse, come to infuse nearly every aspect of world affairs in the early twenty-first century.

The Political Resurgence of the Military in Southeast Asia Marcus Mietzner, 2012-11-12  
In the late 1990s, prominent scholars of civil-military relations detected a decline in the political significance of the armed forces across Southeast Asia. A decade later, however, this trend seems to have been reversed. The Thai military launched a coup in 2006, the Philippine armed forces expanded their political privileges under the Arroyo presidency, and the Burmese junta successfully engineered pseudo-democratic elections in 2010. This book discusses the political resurgence of the military in Southeast Asia throughout the 2000s. Written by distinguished experts on military affairs, the individual chapters explore developments in Burma, Thailand, the Philippines, Vietnam, East Timor, Indonesia and Singapore. They not only assess, but also offer explanations for the level of military involvement in politics in each country. Consequently, the book also makes a significant contribution to the comparative debate about militaries in politics. Whilst conditions obviously differ from country to country, most authors in this book conclude that the shape

of civil-military relations is not predetermined by historic, economic or cultural factors, but is often the result of intra-civilian conflicts and divisive or ineffective political leadership.

Coercion and Governance Muthiah Alagappa, 2001 This far-ranging volume offers both a broad overview of the role of the military in contemporary Asia and a close look at the state of civil-military relations in sixteen Asian countries. It discusses these relations in countries where the military continues to dominate the political realm as well as others where it is disengaging from politics.

**The Global Arms Trade** Andrew T. H. Tan, 2014-05-22 The Global Arms Trade is a timely, comprehensive and in-depth study of this topic, a phenomenon which has continued to flourish despite the end of the Cold War and the preoccupation with global terrorism after 11 September 2001. It provides a clear description and analysis of the demand for, and supply of, modern weapons systems, and assess key issues of concern. This book will be especially useful to scholars, policy analysts, those in the arms industry, defence professionals, students of international relations and security studies, media professionals, government officials, and those generally interested in the arms trade.

**Weaponomics: the global market for assault rifles** Phillip Killicoat, 2007 Abstract: This paper introduces the first effort to quantitatively document the small arms market by collating field reports and journalist accounts to produce a cross-country time-series price index of Kalashnikov assault rifles. A model of the small arms market is developed and empirically estimated to identify the key determinants of assault rifle prices. Variables which proxy the effective height of trade barriers for illicit trade are consistently significant in determining weapon price variation. When controlling for other factors, the collapse of

the Soviet Union does not have as large an impact on weapon prices as is generally believed.

**Strategic Cultures in the Asia-Pacific Region** Ken Booth, Russell Trood, 1999-02-26

In this book a multinational and inter-disciplinary group of contributors have written original essays seeking to provide the first profile of the strategic cultures of the states of the Asia-Pacific region. Strategic culture consists of the traditional cultural, historical, political and societal factors that help shape the defence policies and strategic behaviour of countries. As such, it is a necessary element in understanding the security issues of this changing and increasingly significant region in world politics. In addition to contributing to a better understanding of the security problems and prospects of the Asia-Pacific, the book gives additional empirical flesh to the developing concept of strategic culture and also relates it to the prospects for conflict management in the region, as well as military strategy.

**AK-47** Larry Kahaner, 2010-12-22 No single weapon has spread so much raw power to so many people in so little time—and had such a devastating effect—as the AK-47 assault rifle. This book examines the legacy of this world-changing weapon, from its creation as means of fighting the Nazis to its ubiquity today in every kind of conflict, from civil wars in Africa to gang wars in L.A.

web the answer to your  
problem is actually 9 you  
are correct about  
multiplying the square root  
of 3 2 by the hypotenuse 6  
root of 3 but your answer is  
incorrect this is because if  
you multiply the square root  
of 3 by 6 times the root of  
three that would be the  
same as multiplying 3 by 6  
because the square root of 3  
squared is 3 3 by 6 is 18 and  
that
