Space Wars Michael J. Coumatos, William B. Scott, William J. Birnes, 2007-04-17 Michael J. Coumatos is a former U.S. Navy test pilot, ship's captain, and commodore; U.S. Space Command director of wargaming; and a government counterterrorism advisor. William Scott is a retired bureau chief of Aviation Week and Space Technology and a nine-year Air force veteran who served as aircrew on nuclear sampling missions. He is a six-time Royal Aeronautical Society Journalist of the Year finalist, and won the Society's 1998 Lockheed Martin Award for the Best Defense Submission. He also received both the 2006 and 2007 Messier-Dowty awards for Best Airshow Submission. With the help of New York Times bestselling author William J. Birnes, these renowned experts have joined forces to grippingly depict how the first hours of World War III might play out in the year 2010. Coumatos, Scott, and Birnes take the reader inside U.S. Strategic Command, where top military commanders, space-company executives, and U.S. intelligence experts are conducting a DEADSATS II wargame, exploring how the loss of critical satellites could lead to nuclear war. The players don't know that the war they are gaming has already begun, miles above them in the lifeless, silent cold of space. Jam-packed with the actual systems and secret technologies the United States has or will soon field to protect its space assets, Space Wars describes a near-future nuclear nightmare that terrorists will relish but politicians prefer to ignore. In a quieter, more peaceful time, Space Wars would be an exciting work of fiction. But with the United States now at war, Space Wars is all too real. . France Under de Gaulle Irwin Isenberg, 1967 A series of essays evaluating De Gaulle's considerable achievements and assessing his motives and his view of world politics.

Israeli Mirage III and Nesher Aces Shlomo Aloni, 2012-12-20 Israeli delta fighters pilots have been credited with almost 300 kills between 1966 and 1974, and dozens of them became aces. The Israeli aerial kill exchange rate and overall air-to-air performance was phenomenal. Although the Israeli pilots were flying Mach 2 fighters, they lacked any modern radar equipment and their MiG-21 flying opponents should have had a performance edge over them. This book details their most significant engagements, many of which were essentially World War 2 style dogfights fought with jet aircraft. Because neither side had the combat edge to disengage at will most engagements were a life and death struggle and the introduction of air-to-air missiles and the Israeli Nesher was to prove decisive in this theatre.

The Weapon Wizards Yaakov Katz, Amir Bohbot, 2017-01-31 A lively account of Israel's evolving military prowess...if The Weapon Wizards were a novel, it would be one written by Horatio Alger; if it were a biblical allegory, it would be the story of David and Goliath. —The New York Times Book Review From drones to satellites, missile defense systems to cyber warfare, Israel is leading the world when it comes to new technology being deployed on the modern battlefield. The Weapon Wizards shows how this tiny nation of 8 million learned to adapt to the changes in warfare and in the defense industry and become the new prototype of a 21st century superpower, not in size, but rather in innovation and efficiency—and as a result of its long war experience. Sitting on the front lines of how wars are fought in the 21st century, Israel has developed in its arms trade new weapons and retrofitted old ones so they remain effective, relevant, and deadly on a constantly-changing battlefield. While other countries begin to prepare for these challenges, they are looking to Israel—and specifically its weapons—for guidance. Israel is, in effect, a laboratory for the rest of the world. How did Israel do it? And what are the military and geopolitical implications of these developments? These are some of the key questions Yaakov Katz and Amir Bohbot address. Drawing on a vast amount of research, and unparalleled access to the Israeli defense establishment, this book is a report directly from the front lines.

The Culture of Military Innovation Dima Adamsky, 2010-01-27 This book studies the impact of cultural factors on the course of military innovations. One would expect that countries accustomed to similar technologies would undergo analogous changes in their perception of and approach to warfare. However, the intellectual history of the Revolution in Military Affairs (RMA) in Russia, the US, and Israel indicates the opposite. The US developed technology and weaponry for about a decade without reconceptualizing the existing paradigm about the nature of warfare. Soviet 'new theory of victory' represented a conceptualization which chronologically preceded technological procurement. Israel was the first to utilize the weaponry on the battlefield, but was the last to develop a conceptual framework that acknowledged its revolutionary implications. Utilizing primary sources that had previously been completely inaccessible, and borrowing methods of analysis from political science, history, anthropology, and cognitive psychology, this book suggests a cultural explanation for this puzzling transformation in warfare. The Culture of Military Innovation offers a systematic, thorough, and unique analytical approach that may well be applicable in other perplexing strategic situations. Though framed in the context of specific historical experience, the insights of this book reveal important implications related to conventional, subconventional, and nonconventional security issues. It is therefore an ideal reference work for practitioners, scholars, teachers, and students of security studies.

Towards a Brave New Arms Industry? Richard Bitzinger, 2014-08-27 In the post-Cold War era, most countries have been forced to radically reduce their arms industries, and abandoned self-sufficiency in favour of a subordinate role in an increasingly globalized worldwide defence industry. This has significant implications for the future of armaments production, for proliferation, and for arms control.

Market Economy and the State Dr. R. K. Sinha, 2001 Collection of articles presented at a conference.

Arming Asia Richard Bitzinger, 2016-12-19 Bitzinger examines the phenomenon of attempted self-reliance in arms production within Asia, and assesses the extent of success in balancing this independence with the growing requirements of next-generation weapons systems. He analyzes China, India, Japan, South Korea, and Southeast Asia. The overarching question in the book is whether self-reliance is a strategically viable solution for development and manufacturing of arms. Given the ever-changing dynamics and increasing demand for sophisticated next-generation weaponry, will these countries be able to individually sustain their domestic defense industries and constantly update their technologies? This is the first book to analyze arms production from a regional perspective.

Military Innovation in Small States Michael Raska, 2015-11-06 This book provides a comprehensive assessment of the global diffusion of the Revolution in Military Affairs (RMA) and its impact on military innovation trajectories in small states. Although the 'Revolution in Military Affairs' (RMA) concept has enjoyed significant academic attention, the varying paths and patterns of military innovation in divergent strategic settings have been overlooked. This book seeks to rectify this gap by addressing the broad puzzle of how the global diffusion of RMA-oriented military innovation – the process of international transmission, communication, and interaction of RMA-related military concepts, organizations, and technologies - has shaped the paths, patterns, and scope of military innovation of selected small states. In a reverse mode, how have selected small states influenced the conceptualization and transmission of the RMA theory, processes, and debate? Using Israel,

Singapore and South Korea as case studies, this book argues that RMA-oriented military innovation paths in small states indicate predominantly evolutionary trajectory, albeit with a varying patterns resulting from the confluence of three sets of variables: (1) the level of strategic, organizational, and operational adaptability in responding to shifts in the geostrategic and regional security environment; (2) the ability to identify, anticipate, exploit, and sustain niche military innovation – select conceptual, organizational, and technological innovation intended to enhance the military’s ability to prepare for, fight, and win wars, and (3) strategic culture. While the book represents relevant empirical cases for testing the validity of the RMA diffusion hypotheses, from a policy-oriented perspective, this book argues that these case studies offer lessons learned in coping with the security and defence management challenges posed by military innovation in general. This book will be of much interest for students of military innovation, strategic studies, defence studies, Asian politics, Middle Eastern politics and security studies in general.

The Modern Defense Industry Richard A. Bitzinger, 2009-10-15 Whether it's guns and ammunition or multidimensional anti-terrorism systems, the defense industry is dynamic, complex, and ubiquitous. It is also mysterious, powerful, and controversial, involving thousands of players worldwide—from suppliers and producers to government and military procurers to shadowy figures that trade in the black market. This comprehensive, two-volume reference will explore, on a global scale, the various issues, concepts, problems, and controversies surrounding the rise of the modern defense industry. Unparalleled in its scope and insight, *The Modern Defense Industry* will prove invaluable to the industry's critics and champions alike. The phenomenon of a more-or-less permanent defense industry—especially one so wide in scale, breadth (air, sea, land, and space), technology, and geography—is still relatively new. Until now, its implications for politics, economics, and technology have not been adequately discussed in an authoritative, accessible format for scholars and researchers, business people, journalists, policymakers, and interested laymen. *The Modern Defense Industry* addresses the period from 1945 to the present, covering the United States, Europe, Russia, China, Israel, and other important arms-producing and arms-procuring countries. Including essays by experts from around the world, a glossary, data on firms and governments, laws and policies, primary documents, case studies, and a host of other elements, this set will be a unique resource for anyone interested in the arms industry. It will also offer penetrating insights into topics like international relations and diplomacy, arms proliferation, and contemporary politics. Volume I comprises chapters by experts in the field on topics like the relationship between the industry, military, and government; how new modes of warfare are changing the industry; the implications of globalization on the industry; the black and gray areas of the arms trade; and much more. Volume II features an extensive A-Z glossary of terms, lists of defense firms and government agencies, annotated primary documents, lists of leading defense contractors and key weapons systems, an analysis of key legislation, and professional organizations. *The Modern Defense Industry* sets the standard for state of the art overviews of an industry that has, for better or worse, come to infuse nearly every aspect of world affairs in the early twenty-first century.

Loud and Clear Iftach Spector, 2009-06-15 A recently retired Israeli Air Force general and its second-highest-scoring fighter ace, Iftach Spector is one of Israel’s living legends. He was the leader of the flight that attacked the USS Liberty in 1967. After the 1967 and 1973 wars, in which he commanded a squadron of fighter-bombers, he rose to head the IAF’s Training and War Lessons Section and later became its Chief of Operations. He was one of the eight Israeli pilots who attacked Saddam Hussein’s nuclear reactor at Osirak in 1981. In 2003, his career took an even more dramatic turn: he was the senior signatory of the famous “Pilots’ Letter,” in which Spector and 27 other Israeli pilots stated their refusal to bomb targets in Palestine where collateral damage would likely be severe. His maverick conscience is well on display in this artfully written memoir, which is currently a 10-week-and-counting bestseller in Israel and has been licensed in Brazil as well. The son of a family that immigrated to Palestine at the turn of the 20th century, whose father and mother served in the Palmach, Israel’s early clandestine commando force, Spector has written a rich and reflective meditation on loyalty, on what is right and wrong in war, and on his dedication to the idea and reality of the state of Israel. The Pilots’ Letter ended Spector’s military career, but also made him one of the most compelling and celebrated defenders of the conscience of the Jewish state. In that battle, as in his previous battles against Nasser’s MiGs, his mother’s constant lesson to him sustained him: “All from within.” General Spector’s first book, *A DREAM IN BLACK AND AZURE* (1992; never translated into English), won the Sade Literary Award, given to him personally by Prime Minister Yitzhak Rabin. He has a B.A. in history and Middle East Studies from Tel Aviv University and a masters in political science from UCLA, both with honors.

Israeli A-4 Skyhawk Units in Combat Shlomo Aloni, 2013-01-20 The light and agile A-4 Skyhawk was the first modern American jet to be offered to the Israeli Air Force, marking the point where the US took over from France as Israel's chief military supplier. Deliveries began too late for the A-4 to fight in the Six-Day War, but it soon formed the backbone of the IAF's ground-attack force. From 1969 to 1970 it flew endless sorties against Egyptian forces in the War of Attrition. Then, during the Yom Kippur War, five squadrons of A-4s saw combat and 50 planes were lost as they battled against the Arab armored onslaught. Using previously unpublished first-hand accounts and rare photography from the IAF archives and pilots' private collections, Shlomo Aloni tells the definitive history of the IAF's A-4 squadrons, including the story of Ezra “BABAN” Dotan who became an ace with a unique double-kill of MiG17s.

The Political Resurgence of the Military in Southeast Asia Marcus Mietzner, 2012-11-12 In the late 1990s, prominent scholars of civil-military relations detected a decline in the political significance of the armed forces across Southeast Asia. A decade later, however, this trend seems to have been reversed. The Thai military launched a coup in 2006, the Philippine armed forces expanded their political privileges under the Arroyo presidency, and the Burmese junta successfully engineered pseudo-democratic elections in 2010. This book discusses the political resurgence of the military in Southeast Asia throughout the 2000s. Written by distinguished experts on military affairs, the individual chapters explore developments in Burma, Thailand, the Philippines, Vietnam, East Timor, Indonesia and Singapore. They not only assess, but also offer explanations for the level of military involvement in politics in each country. Consequently, the book also makes a significant contribution to the comparative debate about militaries in politics. Whilst conditions obviously differ from country to country, most authors in this book conclude that the shape of civil-military relations is not predetermined by historic, economic or cultural factors, but is often the result of intra-civilian conflicts and divisive or ineffective political leadership.

Coercion and Governance Muthiah Alagappa, 2001 This far-ranging volume offers both a broad overview of the role of the military in contemporary Asia and a close look at the state of civil-military relations in sixteen Asian countries. It discusses these relations in countries where the military continues to dominate the political realm as well as others where it is disengaging from politics.

Israeli F-4 Phantom II Aces Shlomo Aloni, 2013-02-20 The American manufactured F-4 Phantom II was used by the Israelis in air-to-ground missions, as an attack aircraft, and air-to-air missions as a fighter. Despite performing both roles with equal success the Israeli reliance on the Mirage III and Nesher delta fighters meant that the F-4 was used most regularly in its air-to-ground role.

The kill total of the Israeli F-4 community was, consequently, a modest 116.5; significantly lower than that of other Israeli aircraft types in service between 1969 and 1982. A handful of aces were, nevertheless, created and, using first hand accounts, this unique book tells their stories. Many F-4 pilots had previously flown the Mirage III but most of the navigators were either inexperienced flying school graduates or had been transferred from transport aircraft. The decision to create such teams may have appeared an odd one and it certainly led to a number of interesting experiences but proved, ultimately, to be so successful that by 2010 the Israeli air force will have more two-seat combat aircraft than single-seat fighters. The F-4 experience was, therefore, crucial to moulding the future of the Israeli air force.

Solitary Giora Romm,2014-06-04 “Fighter pilots tell the greatest stories and the great ones tell the best stories of all...” —PAT CONROY, bestselling author of The Great Santini and The Death of Santini “This book is not only among the finest war writing ever but, like Viktor Frankl’s Man’s Search for Meaning, Solitary sits alongside the most profound reflections on the resilience and capacity of the human soul.” —STEVEN PRESSFIELD, bestselling author of The Lion’s Gate and The War of Art “Solitary is a gutsy story of one man’s survival, endurance, and strength of will...” —LARRY ALEXANDER, bestselling co-author of A Higher Call “I anxiously await the day my own sons are old enough to read it.” —RICH COHEN, bestselling author of Tough Jews “You will tear through this book...” —RYAN HOLLIDAY, bestselling author of The Obstacle is the Way “It grabs you immediately, and doesn’t let go until you’re finished.” —TUCKER MAX, bestselling author of I Hope They Serve Beer in Hell “A magnificent triumph of the human spirit...I was captivated from the first page to the last.” —SEAN PARNELL, bestselling author of Outlaw Platoon Giora Romm was the Israeli Air Force's first fighter ace. As a twenty-two-year-old lieutenant he shot down five MiGs during the Six Day War of 1967. Fourteen months later over the Nile Delta, an Egyptian missile exploded beneath the tail of his Mirage IIIC. Within moments Romm found himself hanging by the straps of his parachute, with a broken arm and a leg shattered in a dozen places, looking down from 10,000 feet. Streams of farmers and field workers converged below onto the spot toward which his chute was descending, with the intention, he was certain, of hacking him to death as soon as his feet touched the earth. No other Israeli pilot had survived capture in Egypt or in any other Arab state. Solitary is Romm's story of his imprisonment, torture, interrogation, release, and return to service. Solitary is not a war book. It's not a tale of heroism, though if anyone ever qualified for that distinction, it is this story's author. Solitary is not even, in its deepest parts, about captivity or imprisonment. Solitary is about Romm's inner war. It's the story, in his phrase, of a fall from a great height, not only literally but metaphorically. Romm could not tell his captors the truth about who he was or what he had done. He had to invent an entire fictional biography and keep it straight in his head through months of beatings and interrogations, all the while being held in solitary confinement with his body sheathed from chest to toe in a plaster cast. Solitary is not a grim book. It's full of wry humor, keen self-observations and revelations. An ordeal such as Romm endured is a sojourn in hell, but it is also a passage. Romm fell, and he came back. Solitary is his indelible account of confronting, as few of us ever will, his own fears and limitations, and discovering, ultimately, his capacity to survive and to prevail. —From the Introduction by Steven Pressfield
