**Native Peoples of the Plains** Linda Lowery,2016-08-01 A long time ago, before the Plains region of the United States was divided up into states such as Nebraska, Colorado, and Wyoming, this land was home to American Indians. Twenty-eight unique Indian nations built homes and gathered food in the Plains. They spoke distinct languages, set up political systems, and made art. They used the natural resources available in their region in order to thrive. • The Wichita lived in houses made of grass. From the outside, they looked like giant haystacks. • Omaha and Ponca people wore caps made from eagleskin. • Lakota men carved flutes to play songs for the girls they hoped to marry. Many American Indians still live in the Plains region. Explore the history of these various nations and find out how their culture is still alive today.

**Icons Unmasked** Alex Solis,2016-02-14 Ever wonder if the characters you see on TV, in movies and in comic books are hiding something behind their masks? That perhaps they're really someone -- or something -- else? When pop culture is such a huge part of our lives, we're bombarded with these characters everywhere we turn. Each time we see a new character in a movie, video game or commercial, we feel a sudden sense deja vu. There's something about their goofy grin, that creepy laugh, or those boogly eyes that feels eerily familiar...This got me thinking. Is anything we see ever 100% original? Or is everything we experience really just our minds piecing together past experiences to create something that feels unique and new?In Icons Unmasked, I'm trying to bring a new sense of discovery to characters everyone has seen hundreds of times. I wanted to recreate the experience of what it might be like to see one iconic character from your childhood for the first time as an adult. Proceed at your own caution and keep in mind the following illustrations cannot be unseen. Your childhood might possibly be destroyed forever

**Output Measures for Public Library Service to Children** Virginia A. Walter,Association for Library Service to Children,Public Library Association,1992 This manual has been designed as a practical guide to quantifying and measuring the results, or outputs, of public library service to children. The basic output measures presented are tailored to reflect library services to children (defined as persons 14 years old and younger) and their care givers. Six categories of measures are presented: (1) library use (children's library visits per child, building use by children, and furniture/equipment use by children); (2) materials use (circulation of children's materials per child, in-library use of children's materials per child, and turnover rate of children's materials); (3) materials availability (children's fill rate, homework fill rate, and picture book fill rate); (4) information services (children's information transactions per child and children's information transaction completion rate); (5) programming (children's program attendance per child); and (6) community

relations (class visit rate, child care center contact rate, and annual number of community contacts). The first of three parts of the manual provides an overview of measurement and evaluation, basic information about statistics and data collection and analysis, and suggestions for managing the measurement effort in a particular library. The second part presents each output measure in detail, including the data elements needed and instructions for calculating the measure. The third part presents some techniques for collecting more subjective data, such as focus groups and user surveys, that may help to understand and interpret the quantitative output measure data. Copies of all of the blank forms needed are appended. (4 references) (BBM)
