A life cycle approach to buildings Niklaus Kohler, Holger König, Johannes Kreissig, Thomas Lützkendorf, 2010-01-01 A building's entire life cycle from construction through occupation, cycles of renovation and repairs, up to demolition and disposal, impacts the flow of materials thereby created. The decisive path of a building's environmental impact is however usually set early in the planning phase, at a time when planners often still lack knowledge about the sustainability characteristics of different building materials and constructions.

Queering Bathrooms Sheila L. Cavanagh, 2010-10-30 The intersection of public washrooms and gender has become increasingly politicized in recent years: queer and trans folk have been harassed for allegedly using the 'wrong' washroom, while widespread campaigns have advocated for more gender-neutral facilities. In *Queering Bathrooms*, Sheila L. Cavanagh explores how public toilets demarcate the masculine and the feminine and condition ideas of gender and sexuality. Based on 100 interviews with GLBT and/or intersex peoples in major North American cities, Cavanagh delves into the ways that queer and trans communities challenge the rigid gendering and heteronormative composition of public washrooms. Incorporating theories from queer studies, trans studies, psychoanalysis, and the work of Michel Foucault, Cavanagh argues that the cultural politics of excretion is intimately related to the regulation of gender and sexuality. Public toilets house the illicit and act as repositories for the social unconscious. Also offering suggestions for imagining a more inclusive public washroom, *Queering Bathrooms* asserts that although toilets are not typically considered within traditional scholarly bounds, they form a crucial part of our modern understanding

of sex and gender.

Ladies and Gents Olga Gershenson, Barbara Penner, 2009-07-15 Public toilets provide a unique opportunity for interrogating how conventional assumptions about the body, sexuality, privacy, and technology are formed in public spaces and inscribed through design across cultures. This collection of original essays from international scholars is the first to explore the cultural meanings, histories, and ideologies of public toilets as gendered spaces. Ladies and Gents consists of two sets of essays. The first, Potty Politics: Toilets, Gender and Identity, establishes the importance of accessible, secure public toilets to the creation of inclusive cities, work, and learning environments. The second set of essays, Toilet Art: Design and Cultural Representations, discusses public toilets as spaces of representation and representational spaces, with reference to architectural design, humor, film, theater, art, and popular culture. Compelling visual materials and original artwork are included throughout, depicting subjects as varied as female urinals, art installations sited in public restrooms, and the toilet in contemporary art. Taken together, these seventeen essays demonstrate that public toilets are often sites where gendered bodies compete for resources and recognition—and the stakes are high. Contributors include: Nathan Abrams, Jami L. Anderson, Johan Andersson, Kathryn H. Anthony, Kathy Battista, Andrew Brown-May, Ben Campkin, Meghan Dufresne, Peg Fraser, Deborah Gans, Clara Greed, Robin Lydenberg, Claudia Mitchell, Alison Moore, Frances Pheasant-Kelly, Bushra Rehman, Alex Schweder, Naomi Stead, and the editors.

Libraries: A Design Manual Nolan Lushington, Wolfgang Rudolf, Liliane Wong, 2016-04-25 Libraries as a building type have been subjected to substantial changes in particular in the past ten years. Milestones such as Rem Koolhaas' Seattle Central Library from 2004 reinvented the typology completely and reflected a development from elitist temple of learning to a public living room. Hybrids between library and department store or theater were conceived. Today, the ubiquity of electronic devices and media needs to be taken into account by the designer: every new library has areas without any books now. This work of reference explains systematically all technological and planning requirements of library design. Special features such as RFID, signage, acoustics or specific structural load issues are explained in texts by experts from the fields of architecture and library science. Finally, approximately 40 best-practice case studies of contemporary library design are documented extensively. They are organized in four categories – national libraries, large public libraries, small public libraries, university libraries – and comprise high-profile examples such as Jo Coenen's Openbare Bibliotheek Amsterdam, Alvaro Siza's Public Library Viana do Castelo in Portugal or Mecanoo's Library of Birmingham from 2013.

Creating Country Music Richard A. Peterson, 2013-04-26 In Creating Country Music, Richard Peterson traces the development of country music and its institutionalization from Fiddlin' John Carson's pioneering recordings in Atlanta in 1923 to the posthumous success of Hank Williams. Peterson captures the free-wheeling entrepreneurial spirit of the era, detailing the activities of the key promoters who sculpted the emerging country music scene. More than just a history of the music and its performers, this book is the first to explore what it means to be authentic within popular culture. [Peterson] restores to the music a sense of fun and diversity and possibility that more naive fans (and

performers) miss. Like Buck Owens, Peterson knows there is no greater adventure or challenge than to 'act naturally.'—Ken Emerson, Los Angeles Times Book Review A triumphal history and theory of the country music industry between 1920 and 1953.—Robert Crowley, International Journal of Comparative Sociology One of the most important books ever written about a popular music form.—Timothy White, Billboard Magazine

Positive Energy Buildings Rita Lavikka, Hassam Ur Rehman, Francesco Reda, Abdul Samad Kazi, 2022 This book investigates positive energy buildings (PEBs).
