*Migration and Remittances During the Global Financial Crisis and Beyond* Ibrahim Sirkeci,Jeffrey H. Cohen,Dilip Ratha,2012-05-30 During the 2008 financial crisis, the possible changes in remittance-sending behavior and potential avenues to alleviate a probable decline in remittance flows became concerns. This book brings together a wide array of studies from around the world focusing on the recent trends in remittance flows. The authors have gathered a select group of researchers from academic, practitioner and policy making bodies. Thus the book can be seen as a conversation between the different stakeholders involved in or affected by remittance flows globally. The book is a first-of-its-kind attempt to analyze the effects of an ongoing crisis on remittance flows globally. Data analyzed by the book reveals three trends. First, The more diversified the destinations and the labour markets for migrants the more resilient are the remittances sent by migrants. Second, the lower the barriers to labor mobility, the stronger the link between remittances and economic cycles in that corridor. And third, as remittances proved to be relatively resilient in comparison to private capital flows, many remittance-dependent countries became even more dependent on remittance inflows for meeting external financing needs. There are several reasons for migration and remittances to be relatively resilient to the crisis. First, remittances are sent by the stock (cumulative flows) of migrants, not only by the recent arrivals (in fact, recent arrivals often do not remit as regularly as they must establish themselves in their new homes). Second, contrary to expectations, return migration did not take place as expected even as the financial crisis reduced employment opportunities in the US and Europe. Third, in addition to the persistence of migrant stocks that lent persistence to remittance flows, existing migrants often absorbed income shocks and continued to send money home. Fourth, if some migrants did return or had the intention to return, they tended to take their savings back to their country of origin. Finally, exchange rate movements during the crisis caused unexpected changes in remittance behavior: as local currencies of many remittance recipient countries depreciated sharply against the US dollar, they produced a “sale” effect on remittance behavior of migrants in the US and other destination countries.

**Tracking and Disrupting the Illicit Antiquities Trade with Open Source Data** Matthew Sargent,James V. Marrone,Alexandra T. Evans,Bilyana Lilly,Erik Nemeth,Stephen Dalzell,2020-05-12 The illicit antiquities market is fueled by a well-documented rise in looting at archaeological sites and a fear that the proceeds of such looting may be financing terrorism or rogue states. In this report, the authors compile evidence from numerous open sources to outline the major policy-relevant characteristics of that market and to propose the way forward for developing policies intended to disrupt illicit networks.

The Leatherback Turtle James R. Spotila, Pilar Santidrián Tomillo, 2015-10-30 The most comprehensive book ever written on leatherback sea turtles. Weighing as much as 2,000 pounds and reaching lengths of over seven feet, leatherback turtles are the world's largest reptile. These unusual sea turtles have a thick, pliable shell that helps them to withstand great depths—they can swim more than one thousand meters below the surface in search of food. And what food source sustains these goliaths? Their diet consists almost exclusively of jellyfish, a meal they crisscross the oceans to find. Leatherbacks have been declining in recent decades, and some predict they will be gone by the end of this century. Why? Because of two primary factors: human redevelopment of nesting beaches and commercial fishing. There are only twenty-nine index beaches in the world where these turtles nest, and there is immense pressure to develop most of them into homes or resorts. At the same time, longline and gill net fisheries continue to overwhelm waters frequented by leatherbacks. In *The Leatherback Turtle*, James R. Spotila and Pilar Santidrián Tomillo bring together the world's leading experts to produce a volume that reveals the biology of the leatherback while putting a spotlight on the conservation problems and solutions related to the species. The book leaves us with options: embark on the conservation strategy laid out within its pages and save one of nature's most splendid creations, or watch yet another magnificent species disappear.

September 11 Fiction of Matrix Faruk Arslan, 2005-08-01 I was inspired by Hollywood movie in giving a name to this book. Matrix is the name of a fake world which is believed to be fictitious. September 11 was a starting point which differentiates between those who resist and those who don't and between those who believe and those who don't. I agree with war on terrorism, blame all kind of terrorist and terror acts, but I disagree with the fiction of Matrix. Absolutely, Al Qaeda is a terrorist organization and Laden is the mastermind of terrorism. Thank you Canada. I am proud of being Canadian, otherwise I would not feel free to write this book in US. Social Media in Politics Bogdan Pătruț, Monica Pătruț, 2014-05-05 This volume sets out to analyse the relation between social media and politics by investigating the power of the internet and more specifically social media, in the political and social discourse. The volume collects original research on the use of social media in political campaigns, electoral marketing, riots and social revolutions, presenting a range of case studies from across the world as well as theoretical and methodological contributions. Examples that explore the use of social media in electoral campaigns include, for instance, studies on the use of Face book in the 2012 US presidential campaign and in the 2011 Turkish general elections. The final section of the book debates the usage of Twitter and other Web 2.0 tools in mobilizing people for riots and revolutions, presenting and analysing recent events in Istanbul and Egypt, among others.

**Your Sons Are at Your Service** Aaron Y. Zelin, 2020-02-11 Tunisia became one of the largest sources of foreign fighters for the Islamic State—even though the country stands out as a democratic bright spot of the Arab uprisings and despite the fact that it had very little history of terrorist violence within its borders prior to 2011. In *Your Sons Are at Your Service*, Aaron Y. Zelin uncovers the longer history of Tunisian involvement in the jihadi movement and offers an in-depth examination of the reasons why so many Tunisians became drawn to jihadism following the 2011 revolution. Zelin highlights the longer-term causes that affected jihadi recruitment in Tunisia, including the prior history of Tunisians joining jihadi organizations and playing key roles in far-flung parts of the world over the past four decades. He contends that the jihadi group Ansar al-Sharia in Tunisia was able to take advantage of the universal prisoner amnesty, increased openness, and the lack of governmental policy toward it after the revolution. In turn, this provided space for greater recruitment and subsequent mobilization to fight abroad once the Tunisian government cracked down on the group in 2013. Zelin marshals cutting-edge empirical findings, extensive primary source research, and on-the-ground fieldwork, including a variety of documents in Arabic going as far back as the 1980s and interviews with Ansar al-Sharia members and Tunisian fighters returning from Syria. The first book on the history of the Tunisian jihadi movement, *Your Sons Are at Your Service* is a meticulously researched account that challenges simplified views of jihadism's appeal and success.

*Critical Perspectives on Cultural Memory and Heritage* Veysel Apaydin i, 2020-02-18 *Critical Perspectives on Cultural Memory and Heritage* focuses on the importance of memory and heritage for individual and group identity, and for their sense of belonging. It aims to expose the motives and discourses related to the destruction of memory and heritage during times of war, terror, sectarian conflict and through capitalist policies. It is within these affected spheres of cultural heritage where groups and communities ascribe values, develop memories, and shape their collective identity.

**Migration and Remittances** John Connell, Richard P. C. Brown, 2015 In this title, the editors draw together key articles by leading scholars which

investigate the significance and role of remittances in economic and social development. They examine topics including reflections on methodology, the motives and determinants of remittances, their socio-economic impacts (especially at the household level), the role of community organisations and social remittances, and the broad social and cultural impacts of remittances. Special attention is given to small island and Central Asian states, where remittances are of particular significance. The collection traces the recent historical evolution of remittances and concludes with an examination of policy implications in both sending and receiving countries.

**Fleet Management and Logistics** Teodor G. Crainic, Gilbert Laporte, 2012-12-06 TEODOR GABRIEL CRAINIC, DIRECTOR The Centre for Research on Transportation (C.R.T.) was founded in 1971 by the Universite de Montreal. From 1988 on, it is jointly managed by the Universite de Montreal and its affiliated schools, the Ecole des Hautes Etudes Commerciales and Ecole Poly technique. Professors, students and researchers from many institutions in the Montreal area join forces at the C.R.T. to analyze transportation, logistics and telecommunication systems from a multidisciplinary perspective. The C.R.T. pursues three major, complementary objectives: training of high-level specialists; the advancement of knowledge and technology; the transfer of technology towards industry and the public sector. Its main field of expertise is the development of quantitative and computer-based models and methods for the analysis of urban, regional and intercity transportation networks, as well as telecommunication systems. This applies to the study of passenger and commodity flows, as well as to the socioeconomic aspects of transportation: policy, regulation, economics. The twenty-fifth anniversary of the C.R.T. offered the opportunity to evaluate past accomplishments and to identify future trends and challenges. Five colloquia were thus organized on major research and application themes that also reflected our main research areas. They gathered together internationally renowned researchers who linked recent scientific and technological advances to modeling and methodological challenges waiting to be tackled, particularly concerning new problems and applications, and the increasingly widespread use of new technologies.
