The Clive Cussler Adventures Steven Philip Jones,2014-05-14 The author of more than 50 books—125 million copies in print—Clive Cussler is the current grandmaster of adventure literature. Dirk Pitt, the sea-loving protagonist of 22 of Cussler’s novels, remains among the most popular and influential adventure series heroes of the past half-century. This first critical review of Cussler’s work features an overview of Pitt and the supporting characters and other heroes, an examination of

Cussler's themes and influences, a review of his most important adventures, such as *Raise the Titanic!* and *Iceberg*, and a look at adaptations of his work in other media. Cussler joins the pantheon of such as Rudyard Kipling, Sir Arthur Conan Doyle and Ian Fleming, and this overdue volume demonstrates that beneath Cussler's immense popularity lies a literary depth that well merits scholarly attention.

Galactic Heritage Cards Lyssa Royal Holt, 2013-04-02 The Galactic Heritage Cards were first introduced in Japan, where hundreds of Lyssa's students have since used them with profound results. USING THE CARDS: The overall concept of the cards is to explore the journey from unity to fragmentation/polarity and back to reintegration. Since each of us is part of the same one consciousness, this is a holographic journey that unifies us all. The card system uses the holographic concept that we are experiencing both unity and separation simultaneously. The components of the cards explore this journey in a variety of ways, including: SPECIES or STAR SYSTEM: Twenty-one different species or star systems are represented in the four suits (or time streams) of cards to symbolize the main archetypal groups who have influenced the development of our galactic family. THEME: Each card has a theme or lesson that is connected to the civilization it depicts. Contemplative text and deeper commentary are presented for each card to help users understand how to apply this wisdom in their current lives. ARTWORK: The architect of these cards, the multidimensional consciousness Germane channeled through Lyssa, also assisted Hong Kong artist David Cow in the channeling of the images. Contemplating the artwork allows more information and energy to be transmitted that goes beyond the text for each card. The art works deeply with the subconscious and adds a powerful dimension to the user's inner work with the cards. In addition to the individual card art, an underlying image spans all the cards when they're laid out on a grid with 18 cards per row. This image represents our journey back to integration, and thus each card carries an embedded energy of unity even within the uniqueness and separate journey of each card. When the final card was channeled, the total number was 108 -- a sacred number in many traditions that reflects the idea of wholeness and completion. GETTING STARTED: In the accompanying booklet we offer more information, the text and commentary for each card, and several recommended spreads to help you get started.

How Children Make Art George Székely, 2006 With his unique and refreshing perspective, Székely shows educators how to use ideas from home art and play activities as the basis for a school art program that is meaningful to children. The author presents memorable descriptions and inspiring moments from a lifetime of studying children's home art--all to introduce readers to a wealth of art teaching possibilities. In these pages we learn what happens when children entering the art room are treated as colleagues, bringing their own ideas to an art curriculum that doesn't overshadow them with adult art plans and teachings about adult artists.

Berserker Saberhagen, Fred, 2020-01-10 Long ago, in a distant part of the galaxy, two alien races met—and fought a war of mutual extinction. The sole legacy of that war was the weapon that ended it: the death machines, the BERSERKERS. Guided by self-aware computers more intelligent than any human, these world-sized battle craft carved a swath of death through the galaxy—until

they arrived at the outskirts of the fledgling Empire of Man. These are the stories of the frail creatures who must meet this monstrous and implacable enemy—and who, by fighting it to a standstill, become the saviors of all living things. This is Saberhagen’s classic book length collection of the first eleven Berserker stories. Meet Berserker hunter extraordinaire Johann Karlsen, his evil brother Felipe Nogara, The Third Historian of the Carmpan Race, gallant fighters of the killer machines and the deranged killer machine, Mr. Jester.

Galactic Derelict Andre Norton, 2017-12-03 When a group of archeologists uncover the remains of an interstellar spaceship, they plan a trip to the past for additional information on their find. But their starship goes haywire and the explorers are trapped in a void between the past and present. Not even guide Travis Fox can predict if they'll make it home--or wander through space and time forever.

Extragalactic Astronomy and Cosmology Peter Schneider, 2014-10-08 This second edition has been updated and substantially expanded. Starting with the description of our home galaxy, the Milky Way, this cogently written textbook introduces the reader to the astronomy of galaxies, their structure, active galactic nuclei, evolution and large scale distribution in the Universe. After an extensive and thorough introduction to modern observational and theoretical cosmology, the focus turns to the formation of structures and astronomical objects in the early Universe. The basics of classical astronomy and stellar astrophysics needed for extragalactic astronomy are provided in the appendix. While this book has grown out of introductory university courses on astronomy and astrophysics and includes a set of problems and solutions, it will not only benefit undergraduate students and lecturers; thanks to the comprehensive coverage of the field, even graduate students and researchers specializing in related fields will appreciate it as a valuable reference work.

Star Wars Michael Searle, 2011 An atlas to the game Star Wars: the Old Republic with maps to navigate every planet. Includes concept art.

Legend of the Galactic Heroes, Vol. 1: Dawn Yoshiki Tanaka, 2016-03-08 The “golden brat” Reinhard von Lohengramm, a military prodigy and admiral of the Galactic Empire, has ambitions beyond protecting the borders or even defeating the empire’s enemies. He seeks to overthrow the old order and become a truly absolute—yet benevolent—dictator. His rival, the humble Yang Wen-li of the Free Planets Alliance, wishes to preserve democracy even if he must sacrifice his political ideals to defeat the empire. Their political and military battles play out over a galactic chessboard in an epic saga fifteen centuries in the making! -- VIZ Media
