R. P. Hunnicutt

Armored Car R. P. Hunnicutt, 2015-09-15 The armored car has played a major role in American military operations since the relatively early days of the 20th Century. In 1989 Col. Royal P. Davidson arranged for the installation of a .30 caliber Colt machine gun on a Duryea light three-wheeled car. In doing so, he jump-started the development and production of armored fighting vehicles that have served in the American military ever since. Although the very first armored cars were merely outfitted with a gunshield, they were soon fully protected by armor plating. In this installment of R. P. Hunnicutt's 10-volume series on the history of American armored vehicles he details their early development through WWI, WWII, Korea, and Vietnam. Beginning with the development of armored cars on American soil at the outbreak of WWI-although none were ever shipped overseas-Hunnicutt goes on to describe the production of armored cars based on commercial car and truck chassis in the 1920s. These vehicles eventually reached limited production as the armored car M4. With detailed drawings and photographs to illustrate the history, Hunnicutt describes the development of the armored car T3, which was also designated as scout car T1. The development of these lightweight scout cars, which met the needs of the cavalry, made the armored car unnecessary by 1937. Although production of armored cars stopped for the American military, American development continued on armored cars intended for British use. However, in 1942 as the Palmer Board decided to limit the weight of reconnaissance vehicles, the light armored car T22E2 was standardized as the M8 and put into production. The M8 and a variation, the M20, served in the U.S. Army until after the Korean War, with new models developed for use in Vietnam. Spanning the history of American wheeled combat vehicles, Hunnicutt's *Armored Car* is a must have for anyone with a keen interest in the history of American military operations and equipment.

Stuart Richard Pearce Hunnicutt, 2015-03-26 In *Stuart: A History of the American Light Tank* (Vol. I), Richard Hunnicutt outlines the development history of the American light tank and its associated self-propelled guns and support vehicles. Beginning with the modification of the French Renault in the midst of WWI, *Stuart* covers all pre-Stuart vehicles active during WWI in addition to light tank models and variations active during WWII, with emphasis on the wartime development of M3, M5, and M24 series of light tanks. A few other vehicles that are not technically light tanks, such as the M18 and LVT, also receive attention here as they share a number of key characteristics with the Stuart. In this comprehensive history, Hunnicutt also touches on postwar modifications and service of vehicles developed during WWII. In addition to detailing nearly all aspects of technical data and specifications, *Stuart* features images on nearly every page: photographs, full-color plates, line drawings, and cutaway diagrams, many of which are rare interior shots and diagrams from technical manuals. While Hunnicutt leaves the writing of the complete combat history of the Stuart to those who manned them in battle, he includes some of the Stuart's actions to demonstrate its uses in combat and attributes, both positive and negative. The definitive reference tome for the military historian, professional soldier, and tank restorer, *Stuart* remains the most comprehensive history on the American light tank's development from its beginnings through WWII. Richard Pearce Hunnicutt (1926-2011) enlisted in the 7th Infantry Division in 1944 and in 1945 was promoted to sergeant and awarded the Silver Star for his heroic actions. After WWII, Hunnicutt earned a Masters in engineering from Stanford University under the GI Bill. In addition to being one of the most respected metallurgists in California, Hunnicutt wrote the definitive 10-volume history of the development and employment of American armored vehicles. As a tank historian and leading expert in the field, Hunnicutt was one of the founders of the US Army Ordnance Museum at Aberdeen Proving Ground, MD and was a close friend and frequent contributor to the Patton Museum at Fort Knox, KY. Handbook of Antitrust Economics Paolo Buccirossi, 2008-03-21 Experts examine the application of economic theory to antitrust issues in both the United States and Europe, discussing mergers, agreements, abuses of dominance, and the impact of market features. Over the past twenty years, economic theory has begun to play a central role in antitrust matters. In earlier days, the application of antitrust rules was viewed almost entirely in formal terms; now it is widely accepted that the proper interpretation of these rules requires an understanding of how markets work and how firms can alter their efficient functioning. The Handbook of Antitrust Economics offers scholars, students, administrators, courts, companies, and lawyers the economist's view of the subject, describing the application of newly developed theoretical models and improved empirical methods to antitrust and competition law in both the United States and the European Union. (The book uses the U.S. term "antitrust law" and the European "competition law" interchangeably, emphasizing the commonalities between the two jurisdictions.) After a general discussion of the use of empirical methods in antitrust cases, the Handbook covers mergers, agreements, abuses of dominance (or unilateral conducts), and market features that affect the way firms compete. Chapters examine such topics as analyzing the competitive effects of both horizontal and vertical mergers, detecting and preventing cartels, theoretical and empirical analysis of vertical restraints, state aids, the relationship of competition law to the defense of intellectual property, and the application of antitrust law to "bidding markets," network industries, and two-sided markets. Somerfield Plc and Wm Morrison Supermarkets Plc Great Britain: Competition Commission, 2005-09-12 This Competition Commission report examines the purchase by Somerfield plc of 115 stores and other assets from Wm Morrisons plc in October 2004. The Office of Fair Trading referred this to the Commission in March 2005, with competition concerns. The Commission has concluded that the completed acquisition may be expected to result in a substantial lessening of competition in 12 local grocery retail markets, as well as 14 local markets where acquisition gave concern. To restore competition in these markets Somerfield will have to sell 12 stores to suitable grocery retailers approved by the Commission. Somerfield group is the fifth largest supermarket group with a UK annual turnover of approximately £4.7 billion. It has 750 mid-range stores under Somerfield, and 500 under Kwik Save. Morrisons is the fourth largest grocery retailer in the UK, operating about 500 stores. An earlier Competition Commission report on mergers issued as a Command Paper (Cm.5950) is also available on the subject of proposed mergers between Safeway plc and Asda Group Limited (owned by Wal-Mart Stores Inc); Wm Morrison

Supermarkets PLC; J Sainsbury plc; and Tesco plc (see ISBN 0101595026).
