Papertoy Monsters Brian Castleforte, 2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own backstory. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

Papertoy Glowbots Brian Castleforte, 2016-08-23 Origami meets amazing creatures in a book of paper craft fun! Papertoy Glowbots introduces 46 robots that have the added cool factor of lighting up, whether using glow-in-the-dark stickers that come with the book or light sources like flashlights, Christmas tree lights, and electric tea lights. The 46 die-cut paper robots are created by Brian Castleforte, author of *Papertoy Monsters*, along with the hottest papertoy designers from around the world. Meet the robots and read about their entertaining backstories in the front, then turn to the

card stock section in the back to build them. The templates are die-cut and ready to pop out, fold, and glue. Bold, colorful graphics ensure the robots look as amazing in the daytime as they do with the lights off.

Mapping Chengde Philippe Foret, 2000-06-01 The imperial residence of Chengde was built by two powerful and ambitious Manchu emperors between 1703 and 1780 in the mountains of Jehol. This volume, the first scholarly publication in English on the Manchu summer capital, reveals how this unlikely architectural and landscape enterprise came to help forge a dynasty's multicultural

identity and concretize its claims of political legitimacy. Using both visual and textual materials, the author explores the hidden dimensions of landscape, showing how geographical imagination shaped the aesthetics of Qing court culture while proposing a new interpretation of the mental universe that conceived one of the world's most remarkable examples of imperial architecture.

Exchange in Ancient Greece Sitta von Reden, 1995 Exchange lies at the heart of the economic processes. It is also, as Aristotle maintained, an essential condition for political order. The separation of economic exchange from its social and political implications, commonplace in modern economic theory, would have been meaningless in Ancient Greece. This book is the first sustained attempt to describe the consequences of a cast of thought in which the exchange of goods and the payment of money were viewed as social and political practices. The distinction between reciprocity and redistribution on the one hand and market exchange on the other is abandoned in order to explore the social symbolism of exchange across the boundary between politics and economics. Dr

von Reden shows how economically motivated exchange emerged as morally inappropriate behaviour against a cultural background in which the political community was seen as a sacred order similar to that of the family. Drawing on literary and archaeological evidence, including vase painting and the iconography of coinage, she emphasises the overriding importance of the Greek city-state in shaping a notion of commerce opposed to other forms of exchange.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Major Aspects of Chinese Religion and Philosophy Chun Shan, 2012-06-26 The book addresses academically the major aspects of Chinese religion and philosophy, designated as the doctrine of being internal sage and external king. The perspective applied is the integration between western and Chinese scholarship and English readers may gain an easy and interesting access to Chinese intellectual tradition, distinctive itself in a harmony between being holy and secular in any mundane human being to the western tradition of "Give to Caesar what is Caesar's, and to God what is God's". By this contrast the intellectual charms and spiritual merits of Chinese tradition will be better appreciated, hence conducive to the much anticipated dialogues between western and eastern civilizations at this globalized yet conflicted world.

National Trade Estimate ... Report on Foreign Trade Barriers United States. Office of the U.S. Trade Representative, 1986

Language Shattered Maghiel van Crevel, 1996 Language Shattered is both a history of poetry from the People's Republic of China and a case study of the oeuvre of a leading Chinese poet. After the stifling orthodoxy of the 1950s and early 1960s, the terror of the Cultural Revolution (1966-1976) brought official Chinese literature to a total standstill. At the same time, disillusioned youths were more or less accidentally exposed to a varied body of foreign literature and began

writing underground poetry. In the 1980s this poetry scene, now above ground, became one of pluriformity and proliferation in both official and unofficial circuits. The brutal suppression of the 1989 Protest Movement gave it an exile offshoot. The historical overview in Part I of this book is complemented in Part II by a discussion of Duoduo's poetry. Duoduo's career as a poet reflects the vicissitudes of Chinese Experimental poetry - and his beautiful, headstrong poems merit attention in themselves. They show that Chinese poetry is not just of interest as a chronicle of Chinese politics, but as literature in its own right.

100 Restaurant Design Principles Arthur Gao, 2014-09-15 Home design combines the essence of architecture and art, and designers do their best to find the new ways in the various contradictions and conflicts to perfectly express their understanding of space and the owners' initial imagination. At the same time, each case built always contains many certain or uncertain factors that refer to the furnishings or even space composition. Each of these factors seems to tell a never ending story and records people's feeling of excitement, confusion, recalling and longing. It is precisely because of these vivid emotional experiences that make home design to be charming and attractive. In order to illustrate the essence of each case in a more accurate way, this book has systematically deconstructed every aspect of the home design that refers to space, structure, interface, decoration as well as special areas. Each of the case is illustrated detailedly from the point of functional area, besides, descriptive text and the corresponding plan vividly recur the transformation from plane to space, from the abstract to the intuition. Reading along the layout of the book, readers not only find inspiration from the cases, but also would experience the peculiarity of the home design and enjoy the tactile sensation of the textured space.
