Iron Man John Byrne,2018-11-22 When industrial villains Kearson DeWitt and the Marrs twins seize control of Tony Stark's central nervous system, he finds himself paralyzed during a battle with the Living Laser.

Iron Man David Michelinie,2007-01-03 Millionaire industrialist Tony Stark is an inventive genius who has dedicated all of his enormous financial and intellectual resources to a single guiding principle: the creation of technology for the betterment of humanity. Stark's greatest creation is a modern-day miracle: a suit of form-fitting, strength-enhancing, steel-mesh armor he dons to become the living symbol of his ideals, the Invincible Iron Man! But when Stark discovers that the same technology he used to create the Iron Man armor - technology so secret he didn't even dare patent it - is now in the hands of several deadly super-villains, he feels responsible for the evil they have done with the high-tech tools he unwittingly provided. In the face of objections from his government, friends, colleagues and fellow super heroes, Stark swears to use the power of Iron Man to bring the evil to an end - and

to take back what's his. The Beatle, Stilt Man, the Controller, Stingray, the Mandroids, the Guardsmen and Firepower don't know it yet, but they've got a problem. The world's most powerful force for good isn't playing by the rules anymore. And he's coming for them. Collects Iron Man (1968) #225-232.

From Cave Man to Cave Martian Manfred "Dutch" von Ehrenfried,2019-04-05 This book explores

the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a “Short Stay” Opposition Class mission to Mars as the first mission rather than the “Long Stay” concept requiring a mission that is too long, too dangerous and too costly for man’s first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

If Anything Happens I Love You Will McCormack, Michael Govier, 2022-09-27 Unimaginable loss yields to the power of human connection in this simple, moving story from the filmmakers of the eponymous Oscar-winning film. An elegy on grief. Heavy pain exquisitely rendered. Kirkus Starred Review Based on the Academy Award-winning animated short by the same name, *If Anything Happens I Love You* is a young adult graphic novel that follows two parents as they reckon with the loss of their young daughter, Rose, in a school shooting. Readers follow Rose from “above” as she watches her parents slowly break down under the weight and pain of their loss. Throughout the novel, Rose’s soul seeks to help her parents reconnect. We learn who Rose was and how much life she lived in her short time. By incorporating a wide range of characters, her boyfriend, teacher, and her cat, Rose is able to introduce healing into the lives of the people she left behind. *If Anything Happens I Love You* may be a story about loss, but in it we see ourselves—in the grief, the pain, and, most importantly, in the fight toward human connection, love, and acceptance.
