Shlomo Aloni

**Lavi** John W. Golan,2016-01-01 The Lavi fighter program, the largest weapons-development effort ever undertaken by the State of Israel, envisioned a new generation of high-performance aircraft. In a controversial strategy, Israel Aircraft Industries intended to develop and manufacture the fighters in Israel with American financial support. The sophisticated planes, developed in the mid-1980s, were unique in design and intended to make up the majority of the Israeli air force. Though considerable prestige and money were at stake, developmental costs increased and doubts arose as to whether the Lavi could indeed be the warplane it was meant to be. Eventually the program became a microcosm for the ambitions, fears, and internal divisions that shaped both the U.S.-Israeli relationship and Israeli society itself. But the fighter never made it to operational service, and until now, the full breadth and significance of the Lavi story have never been examined and presented. Lavi: The United States, Israel, and a Controversial Fighter Jet traces the evolution of the Lavi fighter from its genesis in the 1970s to its scrapping in August 1987. John W. Golan examines the roles of Israeli military icons and political leaders such as Ezer Weizman, Ariel Sharon, Menachem Begin, and Yitzhak Rabin in the program and in relation to their counterparts in the United States. On the American side, Golan traces the evolution of government policy toward the program, detailing the complex picture of the U.S. foreign policy apparatus and of U.S.-Israeli relations in general—from President Reagan's public endorsement of the program on the White House lawn to Defense Secretary Caspar Weinberger's unremitting attempts to cancel it in succeeding years.

**Israeli F-15 Eagle Units in Combat** Shlomo Aloni,2013-01-20 Post-Yom Kippur War, Israel purchased the F-15 Eagle, the then world's best air-to-air fighter, in an effort to prevent another surprise attack from the air. For the first time in its history the IDF/AF operated a fighter that was a full generation ahead of opposing interceptors in the region. The first 'kill' F-15 Baz (Buzzard) arrived in Israel in 1976 and soon proved its worth in combat. Israeli Baz pilots were credited with 12.5 kills between 1979 and 1981, with 33 victories following during the June 1982 Lebanon War. Despite substantial combat, no Israeli F-15 has ever been lost to enemy action. In the 1990s the US government supplied the IDF/AF with the F-15I Ra'am (Thunder) to fulfill the long-range surface-to-surface missile mission post-Desert Storm. From A to I, the extremely capable, and combat-tested, Israeli F-15 force will continue to deter potential enemies well into the foreseeable future. This book examines the history and development of these units.

**Israeli Air Force Operations in the 1956 Suez War** Shlomo Aloni,2016-01-20 By participating in 1956 Suez Crisis Israel exploited an opportunity to join forces with France and the United Kingdom in an attack against Egypt in order to accomplish diplomatic, military and political objectives: to open the Red Sea international shipping lane to ships sailing from and to Eilat; to strengthen its alliance with France; to end - or at least to scale down - Egyptian hosted Palestinian terror attacks against Israel; to launch a preventive war in order to crush Egyptian military power before its completion of the transition to Soviet weapons could tempt Egypt to attack Israel and in order to accomplish a profound victory to deter Egypt from pursuing a another round of war policy. Operation KADESH was the Israeli part in the Anglo-French attack and this title chronicles Israeli Air Force operations along the timeline of Operation KADESH - from day 1 on 29 October 1956 until day 11 on 8 November 1956 - in thus far unmatched depth and detail; all known Israel Air Force missions and sorties are listed and described and all air combats between Israeli Mysteres and Egyptian MiGs and Vampires are presented and analyzed. The large variety of aircraft flown - Dassault Mysteres, Dassault Ouragans and Gloster Meteors; B-17 Flying Fortresses, P-51 Mustangs and De Havilland Mosquitoes; T-6 Texans (Harvards) and T-17 Kaydets (Stearmans); Nord 2501 Noratlases, C-47 Skytrains (Dakotas), Pipers and Consuls and even a pair of Sikorsky S-55 helicopters - are all covered in this title, which presents Israeli Air Force operations during the Suez War in a depth and detail unseen in previous publications. The text is supported by numerous photographs and color profiles. Middle East@War - following on from our highly successful Africa@War series, Middle East@War replicates the same format - concise, incisive text, rare images and high quality color artwork providing fresh accounts of both well-known and more esoteric aspects of conflict in this part of the world since 1945.

**Modern Israeli Air Power** Thomas Newdick,Ofer Zidon,2013 Israel remains the cornerstone of Middle East conflicts and tensions, and the spearhead of Israeli military might remain the Air Corps (Kheil Ha'Avir) of the Israeli Defense Forces. Renowned for its continuous efforts to maintain dominance in every dimension of air warfare, improve its capabilities, and outsmart its opponents, the Israeli Air Force has recently been moving away from preparations for interstate wars towards improving its potential to wage asymmetric conflicts, counterinsurgency campaigns and special operations. It has become smaller and leaner, but also much more efficient, and is foremost a force with much improved quick-reaction capabilities. Nowadays the IAF employs cutting-edge domestic and imported technology for gathering intelligence, in its command and communication systems, and in its flying units, with the aim of obtaining real-time targeting information, making it prepared for every eventuality, no matter when or where. This book provides a compact yet comprehensive, up-to-date, and in-depth analysis and directory of modern Israeli air power, detailing flying units and relevant infrastructure, its aircraft and the armament they use. Using text and superb illustrations, the title covers every flying unit and every base, every aircraft type flown and every weapons system, offering a unique insight into what Israel considers its 'best defense'.

**Israeli F-4 Phantom II Aces** Shlomo Aloni,2004-04-27 The American manufactured F-4 Phantom II was used by the Israelis in air-to-ground missions, as an attack aircraft, and air-to-air missions as a fighter. Despite performing both roles with equal success the Israeli reliance on the Mirage III and Nesher delta fighters meant that the F-4 was used most regularly in its air-to-ground role. The kill total of the Israeli F-4 community was, consequently, a modest 116.5; significantly lower than that of other Israeli aircraft types in service between 1969 and 1982. A handful of aces were, nevertheless, created and, using first hand accounts, this unique book tells their stories. Many F-4 pilots had previously flown the Mirage III but most of the navigators were either inexperienced flying school graduates or had been transferred from transport aircraft. The decision to create such teams may have appeared an odd one and it certainly led to a number of interesting experiences but proved, ultimately, to be so successful that by 2010 the Israeli air force will have more two-seat combat aircraft than single-seat fighters. The F-4 experience was, therefore, crucial to moulding the future of the Israeli air force.

**No Margin for Error** Ehud Yonay,1993 The Israeli-born, award-winning investigative reporter, whose story about U.S. Navy fighters was made into the movie Top Gun, presents an important military history, with all the excitement of a high-tech adventure, focusing on a heroic group of youngsters as they are molded into the highly-skilled pilots of one of the world's most sophisticated air forces. **Hammers** Shlomo Aloni,Zvi Avridror,2010 From the B-17 Flying Fortress and PBY Catalina, via the F-4 Phantom to the F-15I Thunder, Israeli Air Force 69 Squadron, the Hammers, have always been the long-range, heavy bombing element of Israeli air power. 69 Sqdn. fought in six wars and flew thousands of missions. The first Hammers mission was the bombardment of Cairo in July 1948. The final B-17 missions were flown during the 1956 Suez War, the last of the Flying Fortresses to bomb operationally anywhere. From 1969, the Hammers flew the legendary F-4 through participation in the War of Attrition, the Yom Kippur War and the Lebanon War. Flying the F-15I since 1998, the Hammers story of operations, aircraft and persons is the essence of this book that unveils, for the first time ever, the full story of Israeli B-17 operations, the complete story of how the Israeli Phantoms defeated the Syrian SAM network in Lebanon, the thundering introduction of the F-15I into Israeli service, and much more.

*Flying beyond the stall* Douglas A. Joyce,2014 The X-31 Enhanced Fighter Maneuverability Demonstrator was unique among experimental aircraft. A joint effort of the United States and Germany, the X-31 was the only X-plane to be designed, manufactured, and flight tested as an international collaboration. It was also the only X-plane to support two separate test programs conducted years apart, one administered largely by NASA and the other by the U.S. Navy, as well as the first X-plane ever to perform at the Paris Air Show. *Flying Beyond the Stall* begins by describing the government agencies and private-sector industries involved in the X-31 program, the genesis of the supermaneuverability concept and its initial design breakthroughs, design and fabrication of two test airframes, preparation for the X-31's first flight, and the first flights of Ship #1 and Ship #2. Subsequent chapters discuss envelope expansion, handling qualities (especially at high angles of attack), and flight with vectored thrust. The book then turns to the program's move to NASA's Dryden Flight Research Center and actual flight test data. Additional tasking, such as helmet-mounted display evaluations, handling quality studies, aerodynamic parameter estimation, and a tailless study are also discussed. The book describes how, in the aftermath of a disastrous accident with Ship #1 in 1995, Ship #2 was prepared for its outstanding participation in the Paris Air Show. The aircraft was then shipped back to Edwards AFB and put into storage until the late 1990s, when it was refurbished for participation in the U. S. Navy's VECTOR program. The book ends with a comprehensive discussion of lessons learned and includes an Appendix containing detailed information.
