*Israeli Air Force Operations in the 1956 Suez War* Shlomo Aloni, 2016-01-20  
By participating in 1956 Suez Crisis Israel exploited an opportunity to join forces with France and the United Kingdom in an attack against Egypt in order to accomplish diplomatic, military and political objectives: to open the Red Sea international shipping lane to ships sailing from and to Eilat; to strengthen its alliance with France; to end - or at least to scale down - Egyptian hosted Palestinian terror attacks against Israel; to launch a preventive war in order to crush Egyptian military power before its completion of the transition to Soviet weapons could tempt Egypt to attack Israel and in order to accomplish a profound victory to deter Egypt from pursuing a another round of war policy. Operation KADESH was the Israeli part in the Anglo-French attack and this title chronicles Israeli Air Force operations along the timeline of Operation KADESH - from day 1 on 29 October 1956 until day 11 on 8 November 1956 - in thus far unmatched depth and detail; all known Israel Air Force missions and sorties are listed and described and all air combats between Israeli Mysteres and Egyptian MiGs and Vampires are presented and analyzed. The large variety of aircraft flown - Dassault Mysteres, Dassault Ouragans and Gloster Meteors; B-17 Flying Fortresses, P-51 Mustangs and De Havilland Mosquitoes; T-6 Texans (Harvards) and T-17 Kaydets (Stearmans); Nord 2501 Noratlases, C-47 Skytrains (Dakotas), Pipers and Consuls and even a pair of Sikorsky S-55 helicopters - are all covered in this title, which presents Israeli Air Force operations during the Suez War in a depth and detail unseen in previous publications. The text is supported by numerous photographs and color profiles. Middle East@War - following on from our highly successful Africa@War series, Middle East@War replicates the same format - concise, incisive text, rare images and high quality color artwork providing fresh accounts of both well-known and more esoteric aspects of conflict in this part of the world since 1945.

**Israeli F-15 Eagle Units in Combat** Shlomo Aloni, 2013-01-20 Post-Yom Kippur War, Israel purchased the F-15 Eagle, the then world's best air-to-air fighter, in an effort to prevent another surprise attack from the air. For the first time in its history the IDF/AF operated a fighter that was a full generation ahead of opposing interceptors in the region. The first 'kill' F-15 Baz (Buzzard) arrived in Israel in 1976 and soon proved its worth in combat. Israeli Baz pilots were credited with 12.5 kills between 1979 and 1981, with 33 victories following during the June 1982 Lebanon War. Despite substantial combat, no Israeli F-15 has ever been lost to enemy action. In the 1990s the US government supplied the IDF/AF with the F-15I Ra'am (Thunder) to fulfill the long-range surface-to-surface missile mission post-Desert Storm. From A to I, the extremely capable, and combat-tested, Israeli F-15 force will continue to deter potential enemies well into the foreseeable future. This book examines the history and development of these units.

*Lavi* John W. Golan, 2016-01-01 The Lavi fighter program, the largest weapons-development effort ever undertaken by the State of Israel, envisioned a new generation of high-performance aircraft. In a controversial strategy, Israel Aircraft Industries intended to develop and manufacture the fighters in Israel with American financial support. The sophisticated planes, developed in the mid-1980s, were unique in design and intended to make up the majority of the Israeli air force. Though considerable prestige and money were at stake, developmental costs increased and doubts arose as to whether the Lavi could indeed be the warplane it was meant to be. Eventually the program became a microcosm for the ambitions, fears, and internal divisions that shaped both the U.S.-Israeli relationship and Israeli society itself. But the fighter never made it to operational service, and until now, the full breadth and significance of the Lavi story have never been examined and presented. *Lavi: The United States, Israel, and a Controversial Fighter Jet* traces the evolution of the Lavi fighter from its genesis in the 1970s to its scrapping in August 1987. John W. Golan examines the roles of Israeli

military icons and political leaders such as Ezer Weizman, Ariel Sharon, Menachem Begin, and Yitzhak Rabin in the program and in relation to their counterparts in the United States. On the American side, Golan traces the evolution of government policy toward the program, detailing the complex picture of the U.S. foreign policy apparatus and of U.S.-Israeli relations in general—from President Reagan's public endorsement of the program on the White House lawn to Defense Secretary Caspar Weinberger's unremitting attempts to cancel it in succeeding years.

**North American P51D/K Mustang and Cavalier F51D Conversion** Paweł Matysiak, 2011-10-15 An invaluable modelers guide to the P-51D/K Mustang and Cavalier F-51D conversion The North American Aviation P-51 Mustang, designed and built by North American Aviation, was a long-range single-seat World War II fighter aircraft. Less than three months after the contract was signed, the prototype NA-73X airframe was rolled out, and although it was still minus an engine, this was a remarkable feat of aviation engineering that changed the face of aerial warfare. The first production Mustangs were used by the Royal Air Force as tactical-reconnaissance aircraft and fighter-bombers; then as bomber escorts in raids over Germany by the USAAF's Eighth Air Force. The D- model development began in 1943, with a view to improving the poor rearward visibility and inadequate firepower of the four machine guns, which were prone to jamming. The P-51D included a Plexiglass bubble canopy mounted in a very deep, rubber-lined metal sill and six .50 caliber machine guns, mounted upright instead of at an angle to minimize jams. The P-51K Mustang was similar to the P-51D, but had a Aeroproducts propeller instead of the Hamilton propeller used for the B, C and D models. Many P-51Ds were refurbished and renamed as Cavaliers F-51Ds after their military service, gaining a new lease of life as well equipped civilian business aircraft. This book contains invaluable information on these two lives of the P-51 Mustang for the enthusiast and modeler, including many black and white photos never seen before, and highly detailed color profiles of the D/K variant, by far the most numerous P-51 model and also the best known.

**Sierra Hotel : flying Air Force fighters in the decade after Vietnam** , 2001

In February 1999, only a few weeks before the U.S. Air Force spearheaded NATO's Allied Force air campaign against Serbia, Col. C.R. Anderegg, USAF (Ret.), visited the commander of the U.S. Air Forces in Europe. Colonel Anderegg had known Gen. John Jumper since they had served together as jet forward air controllers in Southeast Asia nearly thirty years earlier. From the vantage point of 1999, they looked back to the day in February 1970, when they first controlled a laser-guided bomb strike. In this book Anderegg takes us from glimmers of hope like that one through other major improvements in the Air Force that came between the Vietnam War and the Gulf War. Always central in Anderegg's account of those changes are the people who made them. This is a very personal book by an officer who participated in the transformation he describes so vividly. Much of his story revolves around the Fighter Weapons School at Nellis Air Force Base (AFB), Nevada, where he served two tours as an instructor pilot specializing in guided munitions.

**Technology and the Air Force** Jacob Neufeld, 2009-06 Proceedings of a symposium co-sponsored by the Air Force Historical Foundation and the Air Force History and Museums Program. The symposium covered relevant Air Force technologies ranging from the turbo-jet revolution of the 1930s to the stealth revolution of the 1990s. Illustrations.

**Start-up Nation** Dan Senor, Saul Singer, 2011-09-07 What the world can learn from Israel's meteoric economic success. Start-Up Nation addresses the trillion dollar question: How is it that Israel -- a country of 7.1 million, only 60 years old, surrounded by enemies, in a constant state of war since its founding, with no natural resources-- produces more start-up companies than large, peaceful, and stable nations like Japan, China, India, Korea, Canada and the UK? With the savvy of foreign policy insiders, Senor and

Singer examine the lessons of the country's adversity-driven culture, which flattens hierarchy and elevates informality-- all backed up by government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and Dubai have tried to re-create the Israel effect, there are entrepreneurial lessons well worth noting. As America reboots its own economy and can-do spirit, there's never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues.

Archie to Sam Kenneth R. Werrell, Air University Press, 2005-08 Archie to SAM is an update to Kenneth Werrell's Archie, Flak, AAA, and SAM published in 1988. He continues to study ground-based air defense systems in new events, including the Gulf War. In rescuing ground-based air defense systems from long neglect, Werrell delves into such topics as tactics, leadership, change, and innovation

*Flying beyond the stall* Douglas A. Joyce, 2014 The X-31 Enhanced Fighter Maneuverability Demonstrator was unique among experimental aircraft. A joint effort of the United States and Germany, the X-31 was the only X-plane to be designed, manufactured, and flight tested as an international collaboration. It was also the only X-plane to support two separate test programs conducted years apart, one administered largely by NASA and the other by the U.S. Navy, as well as the first X-plane ever to perform at the Paris Air Show. *Flying Beyond the Stall* begins by describing the government agencies and private-sector industries involved in the X-31 program, the genesis of the supermaneuverability concept and its initial design breakthroughs, design and fabrication of two test airframes, preparation for the X-31's first flight, and the first flights of Ship #1 and Ship #2. Subsequent chapters discuss envelope expansion, handling qualities (especially at high angles of attack), and flight with vectored thrust. The book then turns to the program's move to NASA's Dryden Flight Research Center and actual flight test data. Additional tasking, such as helmet-mounted display evaluations, handling quality studies, aerodynamic parameter estimation, and a tailless study are also discussed. The book describes how, in the aftermath of a disastrous accident with Ship #1 in 1995, Ship #2 was prepared for its outstanding participation in the Paris Air Show. The aircraft was then shipped back to Edwards AFB and put into storage until the late 1990s, when it was refurbished for participation in the U. S. Navy's VECTOR program. The book ends with a comprehensive discussion of lessons learned and includes an Appendix containing detailed information.

*The Cutting Edge* Mark A. Lorell, Hugh P. Levaux, 1998 The proposition that innovation is critical in the cost-effective design and development of successful military aircraft is still subject to some debate. RAND research indicates that innovation is promoted by intense competition among three or more industry competitors. Given the critical policy importance of this issue in the current environment of drastic consolidation of the aerospace defense industry, the authors here examine the history of the major prime contractors in developing jet fighters since World War II. They make use of an extensive RAND database that includes nearly all jet fighters, fighter-attack aircraft, and bombers developed and flown by U.S. industry since 1945, as well as all related prototypes, modifications, upgrades, etc. The report concludes that (1) experience matters, because of the tendency to specialize and thus to develop system-specific expertise; (2) yet the most dramatic innovations and breakthroughs came from secondary or marginal players trying to compete with the industry leaders; and (3) dedicated military R&D conducted or directly funded by the U.S. government has been critical in the development of new higher-performance fighters and bombers.

*The War in the Air, 1914-1994* Alan Stephens,2001 This book contains the proceedings of a conference held by the Royal Australian Air Force (RAAF) in Canberra in 1994. Since its publication by the RAAF's Air Power Studies Center in that year, the book has become a widely used reference at universities, military academies, and other educational institutions around the world. The application of aerospace power has seen significant developments since 1994, most notably through American-led operations in Central Europe and continuing technological advances with weapons, uninhabited vehicles, space-based systems, and information systems. But notwithstanding those developments and the passing of six years, the value of this anthology of airpower in the twentieth century seems undiminished.

**The Ash Warriors** C. R. Anderegg,2000 In November 1991 the American flag was lowered for the last time at Clark Air Base in the Philippines. This act brought to an end American military presence in the Philippines that extended back over 90 years. It also represented the final act in a drama that began with the initial rumblings in April of that year of the Mount Pinatubo volcano, located about nine miles to the east of Clark. This book tells the remarkable story of the men and women of the Clark community and their ordeal in planning for and carrying out their evacuation from Clark in face of the impending volcanic activity. It documents the actions of those who remained on the base during the series of Mount Pinatubo's eruptions, and the packing out of the base during the subsequent months. This is the story of the Ash Warriors, those Air Force men and women who carried out their mission in the face of an incredible series of natural disasters, including volcanic eruption, flood, typhoons, and earthquakes, all of which plagued Clark and the surrounding areas during June and July 1991.

**The Central Intelligence Agency and Overhead Reconnaissance** Gregory Pedlow,Donald Welzenbach,2016-03-15 The CIA's 2013 release of its book *The Central Intelligence Agency and Overhead Reconnaissance 1954-1974* is a fascinating and important historical document. It contains a significant amount of newly declassified material with respect to the U-2 and Oxcart programs, including names of pilots; codenames and cryptonyms; locations, funding, and cover arrangements; electronic countermeasures equipment; cooperation with foreign governments; and overflights of the Soviet Union, Cuba, China, and other countries. Originally published with a Secret/No Foreign Dissemination classification, this detailed study describes not only the program's technological and bureaucratic aspects, but also its political and international context, including the difficult choices faced by President Eisenhower in authorizing overflights of the Soviet Union and the controversy surrounding the shoot down there of U-2 pilot Francis Gary Powers in 1960. The authors discuss the origins of the U-2, its top-secret testing, its specially designed high-altitude cameras and complex life-support systems, and even the possible use of poison capsules by its pilots, if captured. They call attention to the crucial importance of the U-2 in the gathering of strategic and tactical intelligence, as well as the controversies that the program unleashed. Finally, they discuss the CIA's development of a successor to the U-2, the Oxcart, which became the world's most technologically advanced aircraft. For the first time, the more complete 2013 release of this historical text is available in a professionally typeset format, supplemented with higher quality photographs that will bring alive these incredible aircraft and the story of their development and use by the CIA. This edition also includes a new preface by author Gregory W. Pedlow and a foreword by Chris Pocock. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books

about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

**The Grand Designers** John D. Anderson Jr, 2018-03-22 The airplane has experienced phenomenal advancement in the twentieth century, changing at an exponential rate from the Wright brothers to the present day. In this groundbreaking work based on new research, Dr John D. Anderson, Jr, a curator at the National Air and Space Museum, analyzes the historical development of the conceptual design process of the airplane. He aims to answer the question of whether airplane advancement has been driven by a parallel advancement in the intellectual methodology of conceptual airplane design. In doing so, Anderson identifies and examines six case histories of 'grand designers' in this field, and challenges some of the preconceived notions of how the intellectual methodology of conceptual airplane design advanced. Filled with over one hundred illustrations which bring his words to life, Anderson unfolds the lives and thoughts of these grand designers.

**Fighter Combat** Robert L. Shaw, 1985 This book provides a detailed discussion of one-on-one dog-fights and multi-fighter team work tactics. Full discussions of fighter aircraft and weapons systems performance are provided along with an explanation of radar intercept tactics and an analysis of the elements involved in the performance of fighter missions.

Unrestricted Warfare Liang Qiao, Xiangsui Wang, 2002 Three years before the September 11 bombing of the World Trade Center—a Chinese military manual called Unrestricted Warfare touted such an attack—suggesting it would be difficult for the U.S. military to cope with. The events of September 11 were not a random act perpetrated by independent agents. The doctrine of total war outlined in Unrestricted Warfare clearly demonstrates that the People's Republic of China is preparing to confront the United States and our allies by conducting asymmetrical or multidimensional attack on almost every aspect of our social, economic and political life.

Historical Dictionary of Israeli Intelligence Ephraim Kahana, 2006-04-19 For Israel more so than for any other state, an effective Intelligence Community has been a matter of life and death. Over the past half-century or so, Israel has created and refined what is broadly regarded as one of the best intelligence networks in the world. It has repeatedly undone efforts by hostile Arab neighbors to defeat it in war, foiled countless terrorist attacks, contributed to military preparedness and armament production, and helped millions of Jews to reach the Promised Land. Unfortunately, it has also committed some terrible mistakes and made blunders it can ill afford. With all of this activity, it is no wonder so much has been written about Israeli Intelligence. However, a handy reference work bringing the various strands together has been sorely needed yet unavailable, until now. The Historical Dictionary of Israeli Intelligence provides detailed information on the various agencies, operations, important leaders and operatives, and special aspects of tradecraft through a chronology, an introduction, a dictionary full of cross-referenced entries, and a bibliography suggesting further reading.
