**Militarizing Outer Space** Alexander C.T. Geppert,Daniel Brandau,Tilmann Siebeneichner,2020-12-02 Militarizing Outer Space explores the dystopian and destructive dimensions of the Space Age and challenges conventional narratives of a bipolar Cold War rivalry. Concentrating on weapons, warfare and violence, this provocative volume examines real and imagined endeavors of arming the skies and conquering the heavens. The third and final volume in the groundbreaking "European Astroculture trilogy," Militarizing Outer Space zooms in on the interplay between security, technopolitics and knowledge from the 1920s through the 1980s. Often hailed as the site of heavenly utopias and otherworldly salvation, outer space transformed from a promised sanctuary to a present threat, where the battles of the future were to be waged. Astroculture proved instrumental in fathoming forms and functions of warfare's futures past, both on earth and in space. The allure of dominating outer space, the book shows, was neither limited to the early twenty-first century nor to current American space force rhetorics.

**Moon** Viorel Badescu,2012-03-22 The Earth has limited material and energy resources. Further development of the humanity will require going beyond our planet for mining and use of extraterrestrial mineral resources and search of power sources. The exploitation of the natural resources of the Moon is a first natural step on this direction. Lunar materials may contribute to the betterment of conditions of people on Earth but they also may be used to establish permanent settlements on the Moon. This will allow developing new technologies, systems and flight operation techniques to continue space exploration. In fact, a new branch of human civilization could be established permanently on Moon in the next century. But, meantime, an inventory and proper social assessment of Moon's prospective energy and material resources is required. This book investigates the possibilities and limitations of various systems supplying manned bases on Moon with energy and other vital resources. The book collects together recent proposals and innovative options and solutions. It is a useful source of condensed information for specialists involved in current and impending Moon-related activities and a good starting point for young researchers.

**The Rational Optimist** Matt Ridley,2011-06-07 For two hundred years the pessimists have dominated public discourse, insisting that things will soon be getting much worse. But in fact, life is getting better—and at an accelerating rate. Food availability, income, and life span are up; disease, child mortality, and violence are down all across the globe. Africa is following Asia out of poverty; the Internet, the mobile phone, and container shipping are enriching people's lives as never before. In his bold and bracing exploration into how human culture evolves positively through exchange and specialization, bestselling author Matt Ridley does more than describe how things are getting better. He explains why. An astute, refreshing, and revelatory work that covers the entire sweep of human history—from the Stone Age to the Internet—The Rational Optimist will change your way of thinking about the world for the better.

*Shaken, Not Stirred!* Metin Tolan,Joachim Stolze,2020-09-08 How do James Bond's X-ray glasses work, the ones he uses to see whether the lady at the roulette table has a pistol concealed in her underwear? Is it really possible to launch oneself into the air and catch up with a plane that is free-falling towards the earth? Or to shoot down a helicopter with a pistol? In this lively and informative book, Germany's boldest physics professor Metin Tolan analyses the stunts and gadgets of the 007 films and even answers the question of all questions: Why does Bond drink his vodka martini shaken, not stirred? So much entertaining science is a rare thing. Spiegel Online

**James Bond Uncovered** Jeremy Strong,2018-05-29 This volume brings fresh perspectives to the study of James Bond. With a strong emphasis on the process of Bond's incarnation on screen and his transit across media forms, chapters examine Bond in terms of adaptation, television, computer games, and the original novels. Film nonetheless provides the central focus, with analysis of both the corpus as a whole—from Dr. No to Spectre—and of particular films, from popular and much-discussed movies such as Goldfinger and Skyfall to comparatively under-examined texts such as the 1967 Casino Royale and A View to a Kill. Contributors' expertise and interests encompass such diverse aspects of and approaches to the Bond stories as Sound Design, Empire, Food and Taste, Geo-politics, Feminist re-reading, Tarot, Landscape and Sets.

**Exploring Science Through Science Fiction** Barry B. Luukkala,2013-10-23 The material in this book forms the basis of an interdisciplinary, college-level course, which uses science fiction film as a vehicle for exploring science concepts. Unlike traditional introductory-level courses, the science content is arranged according to major themes in science fiction, with a deliberate progression from the highly objective and discipline-specific (e.g. Reference Frames; Physics of Space Travel and Time Travel) to the very multi-disciplinary and thought-provoking (e.g. Human Teleportation; Science and Society). Over 100 references to science fiction films

and television episodes are included, spanning more than 100 years of cinematic history. Some of these are conducive to calculations (solutions included).

**Geographies, Genders and Geopolitics of James Bond** Lisa Funnell, Klaus Dodds, 2016-12-27 This book discusses the representational geographies of the Bond film franchise and how they inform our reading of 007 as a hero. Offering a new and interdisciplinary lens through which the franchise can be analyzed, Funnell and Dodds explore a range of topics that have been largely, if not entirely, overlooked in Bond film scholarship. These topics include: the shifting and gendering of geopolitical relations; the differing depiction and evaluation of vertical/modern and horizontal/pre-modern spaces; the use of classical elements in defining gender, sexuality, heroic competency, and geopolitical conflict; and the ongoing importance of haptics (i.e. touch), kinesics (i.e. movement), and proxemics (i.e. the use of space) in defining the embodied and emotive world of Bond. This book is comprehensive in nature and scope as it discusses all 24 films in the official Bond canon and theorizes about the future direction of the franchise.

**A Risk Reduction Strategy for Human Exploration of Space** National Research Council, Institute of Medicine, Aeronautics and Space Engineering Board, Space Studies Board, Board on Health Sciences Policy, Committee on Review of NASA's Bioastronautics Roadmap, 2006-03-16 Extending the spatial and temporal boundaries of human space flight is an important goal for the nation and for the National Aeronautics and Space Administration (NASA). However, human space flight remains an endeavor with substantial risks, and these risks must be identified, managed, and mitigated appropriately to achieve the nation's goals in space. The Bioastronautics Roadmap (BR) is the result of extensive, commendable efforts on the part of NASA to prioritize research efforts to meet these challenges. In 2003, NASA asked the Institute of Medicine (IOM), in collaboration with the Division on Engineering and Physical Sciences of the National Academies, to conduct a review of the BR. Specifically, NASA asked the committee to (1) conduct a comprehensive assessment and report of the strengths and weaknesses of the content and processes of the Bioastronautics Roadmap as applied to the missions described in the President's exploration initiative and (2) identify the unique challenges for accomplishing its goals and objectives. In September 2004, the committee released its preliminary report to NASA entitled Preliminary Considerations Regarding NASA's Bioastronautics Critical Path Roadmap. That document presented the committee's preliminary conclusions about the strengths and weaknesses of the April 2004 version of the BR. This report, A Risk Reductions Strategy for Human Exploration of Space, builds on those preliminary conclusions and provides recommendations to NASA about how to address the issues identified by the committee.

Alan Partridge: Nomad Alan Partridge, 2016-10-20 As seen on This Time with Alan Partridge on BBC One. THE SUNDAY TIMES BESTSELLER Praise for Nomad: 'Funniest book of the year' Sunday Telegraph 'Alan Partridge's Nomad is almost certainly the funniest book ever written' Caitlin Moran 'Sensationally funny. What brilliant writing' Richard Osman 'Sensational' Jenny Colgan 'Hilarious' Jon Ronson 'Brilliantly funny' Marcus Brigstocke In ALAN PARTRIDGE: NOMAD, Alan dons his boots, windcheater and scarf and embarks on an odyssey through a place he once knew - it's called Britain - intent on completing a journey of immense personal significance. Diarising his ramble in the form of a 'journey journal', Alan details the people and places he encounters, ruminates on matters large and small and, on a final leg fraught with danger, becomes - not a man (because he was one to start off with) - but a better, more inspiring example of a man. This deeply personal book is divided into chapters and has a colour photograph on the front cover. It is deeply personal. Through witty vignettes, heavy essays and nod-inducing pieces of wisdom, Alan shines a light on the nooks of the nation and the crannies of himself, making this a biography that biographs the biographer while also biographing bits of Britain.

**The Rough Guide to Comedy Movies** Bob McCabe, 2005 This guide discusses laughter in the cinema, from Airplane! to Withnail and I and from John Belushi to Billy Wilder.

**Bond by Design** Meg Simmonds, 2015 Bond By Design gives an exclusive tour through EON Productions' James Bond archives - a treasure trove of set, storyboard, vehicle, gadget and costume designs, many of which have never been published before. The book provides a unique, spectacular and fascinating insight into the longest-running film franchise of all time. It reveals the craft behind the creation of famous sets, such as Stromberg's Atlantis base in The Spy Who Loved Me and Drax's shuttle launch site in Moonraker, as well as technical drawings of Bond's gadget-laden Aston Martin DB5. Includes two exclusive, full-colour prints of Bond film designs.

**Limiting Outer Space** Alexander C.T. Geppert, 2018-04-18 Limiting Outer Space propels the historicization of outer space by focusing on the Post-Apollo period. After the moon landings, disillusionment set in. Outer space, no longer considered the inevitable destination of human expansion, lost much of its popular appeal, cultural significance and political urgency. With the rapid waning of the worldwide Apollo frenzy, the optimism of the Space Age gave way to an era of space fatigue and planetized limits. Bringing together the history of European astroculture and American-Soviet spaceflight with scholarship on the 1970s, this cutting-edge volume examines the reconfiguration of space imaginaries from a multiplicity of disciplinary perspectives. Rather than invoking oft-repeated narratives of Cold War rivalry and an escalating Space Race, Limiting Outer Space breaks new ground by exploring a hitherto underrated and understudied decade, the Post-Apollo period.
