Bespoke James Sherwood, 2017-09-26 The definitive story of the tailors, customers, and clothes of Savile Row, the international destination and renowned epicenter of gentlemen's style The skilled tailors of Savile Row in London have dressed kings, movie stars, rock legends, billionaires, and even a few regular guys. Told through eight chronological themes, this beautifully illustrated celebration brings together Savile Row's highlights and low-lives, the dramas and private tales, the suits and their accoutrements, the fabrics and the cuts, the history and future. Each chapter charts a stage of the Row's development and its contribution to men's fashion and culture. Throughout the book are dispersed twenty-six profiles of today's master tailors, providing insight into what makes their work, relationships, and clothes so special. Character Theology Tom Steffen, Ray Neu, 2024-02-21 Character Theology provides a natural, universal way for the world to engage God through his chosen cast of characters. As the media eras continue to change (oral to print to digital-virtual), too many Bible scholars, and consequently pastors and Bible teachers in the West and beyond, lack capability to effectively communicate Scripture to Millennials, Gen Z, and Gen Alpha. These generations find little if any relevance in the Christianity promoted by those stuck in modernity's sticky abstract systematic theology. Character Theology relates, sticks, and transforms these generations. Why? Because people grasp and engage God most naturally and precisely through his interaction with biblical characters and their interaction with each other! Characters communicate the Creator's characteristics. The roadmap to the recovery and expansion of Christianity in the twenty-first century will be through Bible characters.

That Time of Year Garrison Keillor, 2020-12-01 With the warmth and humor we've come to know, the creator and host of A Prairie Home Companion shares his own remarkable story. In That Time of Year, Garrison Keillor looks back on his life and recounts how a Brethren boy with writerly ambitions grew up in a small town on the Mississippi in the 1950s and, seeing three good friends die young, turned to comedy and radio. Through a series of unreasonable lucky breaks, he founded A Prairie Home Companion and put himself in line for a good life, including mistakes, regrets, and a few medical adventures. PHC lasted forty-two years, 1,557 shows, and enjoyed the freedom to do as it pleased for three or four million listeners every Saturday at 5 p.m. Central. He got to sing with Emmylou Harris and Renée Fleming and once sang two songs to the U.S. Supreme Court. He played a private eye and a cowboy, gave the news from his hometown, Lake Wobegon, and met Somali cabdrivers who'd learned English from listening to the show. He wrote bestselling novels, won a Grammy and a National Humanities Medal, and made a movie with Robert Altman with an alarming amount of improvisation. He says, "I was unemployable and managed to invent work for myself that I loved all my life, and on top of that I married well. That's the secret, work and love. And I chose the right ancestors, impoverished Scots and Yorkshire farmers, good workers. I'm heading for eighty, and I still get up to write before dawn every day."

Thinking in Systems Donella Meadows, 2008-12-03 The classic book on systems thinking—with more than half a million copies sold worldwide! This is a fabulous book... This book opened my mind and reshaped the way I think about investing.—Forbes Thinking in Systems is required reading for anyone hoping to run a successful company, community, or country. Learning how to think in systems is now part of change-agent literacy. And this is the best book of its kind.—Hunter Lovins In the years following her role as the lead author of the international bestseller, *Limits to Growth*—the first book to show the consequences of unchecked growth on a finite planet—Donella Meadows remained a pioneer of environmental and social analysis until her untimely death in 2001. Thinking in Systems is a concise and crucial book offering insight for problem solving on scales ranging from the personal to the global. Edited by the Sustainability Institute's Diana Wright, this essential primer brings systems thinking out of the realm of computers and equations and into the tangible world, showing readers how to develop the systems-thinking skills that thought leaders across the globe consider critical for 21st-century life. Some of the biggest problems facing the world—war, hunger, poverty, and environmental degradation—are essentially system failures. They cannot be solved by fixing one piece in isolation from the others, because even seemingly minor details have enormous power to undermine the best efforts of too-narrow thinking. While readers will learn the conceptual tools and methods of systems thinking, the heart of the book is grander than methodology. Donella Meadows was known as much for nurturing positive outcomes as she was for delving into the science behind global dilemmas. She reminds readers to pay attention to what is important, not just what is quantifiable, to stay humble, and to stay a learner. In a world growing ever more complicated, crowded, and interdependent, Thinking in Systems helps readers avoid confusion and helplessness, the first step toward finding proactive and effective solutions.
