Japan's Foreign Policy Making Karol Zakowski, Beata Bochorodycz, Marcin Socha, 2018-08-11 This book evaluates the impact of the 2001 central government reforms on effective foreign policy making in Japan. It puts a special focus on the evolution of the domestic institutional factors and decision-making processes behind Japan's foreign policy, while also analyzing the development of Japan's external relations with various other countries, such as the US, China and North Korea. Adhering to the neoclassical realist approach, the authors show that, thanks to a more independent Kantei-based form of diplomacy, Japan's prime ministers were able to strategically respond to international developments, and to pursue their own diplomatic endeavors more boldly. At the same time, they demonstrate that the effectiveness of this proactive posture was still heavily dependent on the decision-makers' ability to form cohesive coalitions and select suitable institutional tools, which enabled them to influence domestic and international affairs.

Japan's Arduous Rejuvenation as a Global Power Victor Teo, 2019-04-08 This open access book assesses the profound impact of Japan's aspirations to become a great power on Japanese security, democracy and foreign relations. Rather than viewing the process of normalization and rejuvenation as two decades of remilitarization in face of rapidly changing strategic environment and domestic political circumstances, this volume contextualizes Japan's contemporary international relations against the longer grain of Japanese historical interactions. It demonstrates that policies and statecraft in the Prime Minister Shinzo Abe's era are a continuation of a long, unbroken and arduous effort by successive generations of leaders to preserve Japanese autonomy, enhance security and advance Japanese national interests. Arguing against the notion that Japan cannot work with China as long as the US-Japan alliance is in place, the book suggests that Tokyo could forge constructive relations with Beijing by engaging China in joint projects in and outside of the Asia-Pacific in issue areas such as infrastructure development or in the provision of international public goods. It also submits that an improvement in Japan-China relations would enhance rather than detract Japan-US relations and that Tokyo will find that her new found autonomy in the US-Japan alliance would not only accord her more political respect and strategic latitude, but also allow her to ameliorate the excesses of American foreign policy adventurism, paving for her to become a truly normal great power.

Postwar Japan Michael J. Green, Zack Cooper, 2017-02-02 Japanese security, economic, institutional, and developmental policies have undergone a remarkable evolution in the 70 years since the end of World War II. In this volume, distinguished Japanese scholars reflect on the evolution of these policies and draw lessons for the coming decades. The pillars of Japan's reentry into the international community since 1945 remain no less important seven decades later as Japan's economy and society enter the next phase of maturity. The authors demonstrate the continuing viability of Japan's postwar strategic choices, as well as the inevitability of adaptation to challenging new circumstances. This book will be of interest to historians of U.S.-Japan relations and policy makers seeking to place today's policy issues in a historical context. Contributions by Akiko Imai, Akiko Fukushima, Jun Saito, Kazuya Sakamoto, Yoshihide Soeya, and Yoko Takeda

Victors' Justice Richard H. Minear, 2015-03-08 The klieg-lighted Tokyo Trial began on May 3, 1946, and ended on November 4, 1948, a majority of the eleven judges from the victorious Allies finding the twenty-five surviving defendants, Japanese military and state leaders, guilty of most, if not all, of the charges. As at Nuremberg, the charges included for the first time crimes against peace and crimes against humanity, as well as conventional war crimes. In a polemical account, Richard Minear reviews the background, proceedings, and judgment of the Tokyo Trial from its Charter and simultaneous Nuremberg precedent to its effects today. Mr. Minear looks at the Trial from the aspects of international law, of legal process, and of history. With compelling force, he discusses the motives of the Nuremberg and Tokyo proponents, the Trial's prejudged course—its choice of judges, procedures, decisions, and omissions—General MacArthur's review of the verdict, the criticisms of the three dissenting judges, and the dangers

inherent in such an international, political trial. His systematic, partisan treatment pulls together evidence American lawyers and liberals have long suspected, feared, and dismissed from their minds. Contents: Preface. I. Introduction. II. The Tokyo Trial. III. Problems of International Law. IV. Problems of Legal Process. V. Problems of History. VI. After the Trial. Appendices. Originally published in 1971. Society 5.0 Hitachi-UTokyo Laboratory(H-UTokyo Lab.),2020-05-29 This open access book introduces readers to the vision on future cities and urban lives in connection with “Society 5.0”, which was proposed in the 5th Basic Science and Technology Plan by Japan’s national government for a technology-based, human-centered society, emerging from the fourth industrial revolution. The respective chapters summarize the findings and suggestions of joint research projects conducted by H-UTokyo Lab. Through the research collaboration and discussion, this book explores the future urban lives under the concept of “Society 5.0”, characterized by the key phrases of data-driven society, knowledge-intensive society, and non-monetary society, and suggests the directionality to which the concept should aim as Japan’s technology-led national vision. Written by Hitachi’s researchers as well as academics from a wide range of fields, including engineering, economics, psychology and philosophy at The University of Tokyo, the book is a must read for members of the general public interested in urban planning, students, professionals and researchers in engineering and economics.

Trends and Factors in Japan's Long-Term Care Insurance System Pedro Olivares-Tirado,Nanako Tamiya,2013-11-19 Ageing population poses a set of complex policy and dilemmas for social security systems, intensifying the concerns about rising expenditures in health care and long-term care for elderly. In this context, ageing societies has many valuable lessons to learn by studying Japan's experience dealing with its hyper-aged society and particularly from its strategies to ensure the financial sustainability of the Long-Term Care Insurance (LTCI) system. Based on an exhaustive literature review, and the results from six original researches on long-term care expenditures in Japan (LTCE) conducted during a doctoral program, the book provides a comprehensive view in analyzing trends and factors associated with increasing expenditures in the Long-Term Care Insurance system in Japan. The book address relevant topics such as; the main socio-demographic changes experienced by the Japanese society during the last three decades, predictors of the LTCE, measuring efficiency in nursing homes, the impact of the LTCI 2005-reform to contain expenditures, cost-effectiveness of the in-home and community based services and institutional LTCE in the last year of life. The book end with a discussion on futures challenges and strategies oriented to contribute with the sustainability of LTCI system in Japan.

The History Problem Hiro Saito,2017-04-01 Seventy years have passed since the end of the Asia-Pacific War, yet Japan remains embroiled in controversy with its neighbors over the war’s commemoration. Among the many points of contention between Japan, China, and South Korea are interpretations of the Tokyo War Crimes Trial, apologies and compensation for foreign victims of Japanese aggression, prime ministerial visits to the Yasukuni Shrine, and the war’s portrayal in textbooks. Collectively, these controversies have come to be called the “history problem.” But why has the problem become so intractable? Can it ever be resolved, and if so, how? To answer these questions author Hiro Saito mobilizes the sociology of collective memory and social movements, political theories of apology and reconciliation, psychological research on intergroup conflict, and philosophical reflections on memory and history. The history problem, he argues, is essentially a relational phenomenon caused when nations publicly showcase self-serving versions of the past at key ceremonies and events: Japan, South Korea, and China all focus on what happened to their own

citizens with little regard for foreign others. Saito goes on to explore the emergence of a cosmopolitan form of commemoration taking humanity, rather than nationality, as its primary frame of reference, an approach increasingly used by a transnational network of advocacy NGOs, victims of Japan's past wrongdoings, historians, and educators. When cosmopolitan commemoration is practiced as a collective endeavor by both perpetrators and victims, Saito argues, a resolution of the history problem—and eventual reconciliation—will finally become possible. The History Problem examines a vast corpus of historical material in both English and Japanese, offering provocative findings that challenge orthodox explanations. Written in clear and accessible prose, this uniquely interdisciplinary book will appeal to sociologists, political scientists, and historians researching collective memory, nationalism and cosmopolitanism, and international relations—and to anyone interested in the commemoration of historical wrongs. The Political Economy of the Abe Government and Abenomics Reforms Takeo Hoshi, Phillip Y. Lipscy, 2021-02-25 This volume seeks to explain the political economy of the Abe government and the so-called 'Abenomics' economic policies. The Abe government represents a major turning point in postwar Japanese political economy. In 2019, Abe became the longest serving Prime Minister in Japanese history. Abe's government stood out not only for its longevity, but also for its policies. Abe came to power promising to reinvigorate Japan's economy under the banner of Abenomics. He pursued a host of structural reforms and industrial promotions to increase Japan's potential growth rate. Abe also achieved important legislative victories in security policy. However, the government also faced significant controversies. The book will hold appeal to scholars and students specializing in the study of Japanese politics, comparative political economy, the politics of contemporary advanced democracies, macroeconomic policy, labor market reforms, corporate governance, gender equality, agricultural reforms, energy and climate change, and East Asian security.

Socio-Life Science and the COVID-19 Outbreak Makoto Yano, Fumihiko Matsuda, Anavaj Sakuntabhai, Shigeru Hirota, 2022 This open access book presents the first step towards building socio-life science, a field of science investigating humans in such a way that both social and life-scientific factors are integrated. Because humans are both living and social creatures, a human action can never be understood fully without knowing both the biological traits of a person and the social scientific environments in which he exists. With this consideration, the editors of this book have initiated a research project promoting a deeper and more integrated understanding of human behavior and human health. This book aims to show what can, and could be, achieved through our interdisciplinary project. One important product is the newly formed three-party collaboration between Pasteur Institut, Kyoto University, and the Research Institute of Economy, Trade and Industry. Covering many different fields, including medicine, epidemiology, anthropology, economics, sociology, demography, geography, and policy, researchers in these institutes, and many others, present their studies on the COVID-19 pandemic. Although based on different methodologies, the studies show the importance of behavioral change and governmental policy in the fight against a huge pandemic. The book explains the unique genome cohort-panel data that the project builds to study social and life scientific aspects of humans.

Beyond Paradigms Rudra Sil, Peter J. Katzenstein, 2010-08-31 While paradigm-bound research has generated powerful insights in international relations, it has fostered a tunnel vision that hinders progress and widens the chasm between theory and policy. In this important new book, Sil and Katzenstein draw upon recent scholarship to illustrate the benefits of a more pragmatic and eclectic style of research.

The Oxford Handbook of Japanese Politics Robert J. Pekkanen, Saadia Pekkanen, 2021-10-25 Book Abstract and Keywords: The study of Japanese

politics has flourished over the past several decades. This Handbook provides a state-of-the-field overview for students and researchers of Japanese. The volume also serves to introduce Japanese politics to readers less familiar with Japan. In addition, the volume has a theme of evaluating Japan's democracy. Taken as a whole, the volume provides a positive evaluation of the state of Japan's democracy. The volume is divided into two parts, roughly corresponding to domestic Japanese politics and Japan's international politics. Within the domestic politics part, there are four distinct sections: Domestic Political Actors and Institutions, covering the Japanese Constitution, electoral systems, prime minister, Diet, bureaucracy, judiciary, and local government; Political Parties and Coalitions, covering the Liberal Democratic Party, coalition government, Kōmeitō, and the political opposition; Policymaking and the Public, covering the policymaking process, public opinion, civil society, and populism; and, Political Economy and Social Policy, covering industrial, energy, social welfare, agricultural, monetary, and immigration policies, as well as social inequality. In the international relations part, there are four sections: International Relations Frameworks, covering grand strategy, international organizations, and international status; International Political Economy, covering trade, finance, foreign direct investment, the environment, economic regionalism, and the linkage between security and economics; International Security, covering remilitarization, global and regional security multilateralism, nuclear nonproliferation, naval power, space security, and cybersecurity; and, Foreign Relations covering Japan's relations with the United States, China, South Korea, ASEAN, India, the European Union, and Russia. Keywords: international relations, comparative politics, democracy, international order, alliances, space security, elections, Liberal Democratic Party, multilateralism, remilitarization, international organizations, populism, civil society, coalitions, political parties, trade, finance monetary policy, foreign direct investment, cybersecurity--

Agricultural Implications of the Fukushima Nuclear Accident (III) Tomoko M. Nakanishi, Martin O'Brien, Keitaro Tanoi, 2019-01-30 This open access book presents the findings from on-site research into radioactive cesium contamination in various agricultural systems affected by the Fukushima Daiichi Nuclear Power Plant accident in March 2011. This third volume in the series reports on studies undertaken at contaminated sites such as farmland, forests, and marine and freshwater environments, with a particular focus on livestock, wild plants and mushrooms, crops, and marine products in those environments. It also provides additional data collected in the subsequent years to show how the radioactivity levels in agricultural products and their growing environments have changed with time and the route by which radioactive materials entered agricultural products as well as their movement between different components (e.g., soil, water, and trees) within an environmental system (e.g., forests). The book covers various topics, including radioactivity testing of food products; decontamination trials for rice and livestock production; the state of contamination in, trees, mushrooms, and timber; the dynamics of radioactivity distribution in paddy fields and upland forests; damage incurred by the forestry and fishery industries; and the change in consumers' attitudes. Chapter 19 introduces a real-time radioisotope imaging system, a pioneering technique to visualize the movement of cesium in soil and in plants. This is the only book to provide systematic data on the actual change of radioactivity, and as such is of great value to all researchers who wish to understand the effect of radioactive fallout on agriculture. In addition, it helps the general public to better understand the issues of radio-contamination in the environment. The project is ongoing; the research groups from the Graduate School of Agricultural and Life Sciences of The University of Tokyo continue their work in the field to further evaluate the long-term effects of the Fukushima accident.

The Japanese Power Elite Albrecht Rothacher, 2016-07-27 This book attempts a coherent portrait of the heart of Japan's economic and political decision making. It presents the men occupying the core positions in Japan's ruling party, the central ministries, and in big business and its organizations. Elite career patterns, social origins, upbringing, university education, cognitive orientations and ways of life are reviewed, as are the interactions in the exclusive world of Japan's increasingly hereditary and bureaucratic class of power holders in conservative politics and big business.

Japan and the New Silk Road Nikolay Murashkin, 2020-02-07 This book presents a study of Japanese involvement in post-Soviet Central Asia since

the independence of these countries in 1991, examining the reasons for progress and stagnation in this multi-lateral relationship. Featuring interviews with decision-makers and experts from Japan, China, Kazakhstan, Uzbekistan, Azerbaijan, and the Philippines, this book argues that Japan's impact on Central Asia and its connectivity has been underappreciated. It demonstrates that Japan's infrastructural footprint in the New Silk Road significantly pre-dated China's Belt and Road Initiative, and that the financial and policy contribution driven by Japanese officials was of a similar order of magnitude. It also goes on to show that Japan was the first major power outside of post-Soviet Central Asia to articulate a dedicated Silk Road diplomacy vis-à-vis the region before the United States and China, and the first to sponsor pivotal assistance. Being the first detailed analytical account of the diplomatic impact made on the New Silk Road by various Japanese actors beyond formal diplomacy, this book will be useful to students and scholars of Japanese politics, as well as Asian politics and international politics more generally.

Japanese Public Opinion and the War on Terrorism Paul Midford, 2006-01-01

Towards Sustainable Society on Ubiquitous Networks Makoto Oya, Ryuya Uda, Chizuko Yasunobu, 2008-09-02 The massive growth of the Internet has made an enormous amount of information available to us. However, it is becoming very difficult for users to acquire an applicable one. Therefore, some techniques such as information filtering have been introduced to address this issue. Recommender systems filter information that is useful to a user from a large amount of information. Many e-commerce sites use recommender systems to filter specific information that users want out of an overload of information [2]. For example, Amazon.com is a good example of the success of recommender systems [1]. Over the past several years, a considerable amount of research has been conducted on recommendation systems. In general, the usefulness of the recommendation is measured based on its accuracy [3]. Although a high recommendation accuracy can indicate a user's favorite items, there is a fault in that only similar items will be recommended. Several studies have reported that users might not be satisfied with a recommendation even though it exhibits high recommendation accuracy [4]. For this reason, we consider that a recommendation having only accuracy is unsatisfactory. The serendipity of a recommendation is an important element when considering a user's long-term profits. A recommendation that brings serendipity to users would solve the problem of "user weariness" and would lead to exploitation of users' tastes. The viewpoint of the diversity of the recommendation as well as its accuracy should be required for future recommender systems.

The Japan-South Korea Identity Clash Brad Glosserman, Scott A. Snyder, 2015-05-26 Japan and South Korea are Western-style democracies with open-market economies committed to the rule of law. They are also U.S. allies. Yet despite their shared interests, shared values, and geographic proximity, divergent national identities have driven a wedge between them. Drawing on decades of expertise, Brad Glosserman and Scott A. Snyder investigate the roots of this split and its ongoing threat to the region and the world. Glosserman and Snyder isolate competing notions of national identity as the main obstacle to a productive partnership between Japan and South Korea. Through public opinion data, interviews, and years of observation, they show how fundamentally incompatible, rapidly changing conceptions of national identity in Japan and South Korea—and not struggles over power or structural issues—have complicated territorial claims and international policy. Despite changes in the governments of both countries and concerted efforts by leading political figures to encourage U.S.-ROK-Japan security cooperation, the Japan-South Korea relationship continues to be hobbled by history and its deep imprint on ideas of national identity. This book recommends bold, policy-oriented prescriptions for overcoming problems in Japan-South Korea relations and facilitating trilateral cooperation among these three Northeast Asian allies, recognizing the power of the public on issues of foreign policy, international relations, and the prospects for peace in Asia.

Post-2020 Climate Action Shinichiro Fujimori, Mikiko Kainuma, Toshihiko Masui, 2017-09-16 This book summarizes assessments of the Paris Agreement to provide an excellent introduction to this research field. The AIM/CGE (Asia-Pacific Integrated Modeling / Computable General Equilibrium)

model, which is the core of AIM modeling framework, is used for the assessment. The first part focuses on global issues, presenting both short-term (a few decades) and long-term (century scale) assessments in the context of the Agreement's ultimate climate goal. It also discusses policy implementation and climate risk. Part 2 is a collection of assessments of individual Asian countries, providing insights into the national situations and detailed analyses. It includes contributions from Asian countries as well as NIES (National Institute for Environmental Studies, Japan) members. The main conclusion is that many countries require changes to their energy systems change and societal transformation in order to meet emissions targets. Part 3 describes in detail the AIM/CGE model, which is used to evaluate the climate and energy policies by simulating the future economic and energy and environmental situation in the Asia-Pacific region. This section can be used as a standard text on CGE modelling in climate change mitigation.

Comparative Perspectives on Gender Equality in Japan and Norway Masako Ishii-Kuntz,Guro Korsnes Kristensen,Priscilla

Ringrose,2021-11-28 This book compares perspectives on gender equality in Norway and Japan, focusing on family, education, media, and sexuality and reproduction as seen through a gendered lens. What can we learn from a comparison between two countries that stand in significant contrast to each other with respect to gender equality? Norway and Japan differ in terms of historical, cultural and socioeconomic backgrounds. Most importantly, Japan lags far behind Norway when it comes to the World Economic Forum's Gender Gap Report. Rather than taking a narrow approach that takes as its starting point the assumption that Norway has so much 'more' to offer in terms of gender equality, the authors attempt to show that a comparative perspective of two countries in the West and East can be mutually beneficial to both contexts in the advancement of gender equality. The interdisciplinary team of researchers contributing to this book cover a range of contemporary topics in gender equality, including fatherhood and masculinity, teaching and learning in gender studies education, cultural depictions of gender, trans experiences and feminism. This unique collection is suitable for researchers and students of gender studies, sociology, anthropology, Japan studies and European studies.
