Japanese Battleships Robert Brown, 2016-10-10 This fully illustrated guide offers historical context and step-by-step instruction for building and modifying Japanese battleship models. This volume in the ShipCraft series covers the two related classes of Japanese 14in-gunned battleships, originally built during the First World War but subsequently reconstructed. These ships are famous for their towering forward superstructure, usually described as a pagoda bridge, that they featured when rebuilt. The Ise-class ships underwent further reconstruction during the Second World War to emerge as a unique hybrid of battleship and aircraft carrier to compensate for fleet carriers sunk earlier in the war. This lavishly illustrated guide takes readers through a brief history of the Fusō-class and Ise-class ships, highlighting differences between sisterships and changes in their appearance over their careers. It features color profiles of paint schemes as well as detailed line drawings and scale plans. The modelling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing, and provides hints on modifying and improving the basic kit. This volume also includes a photographic survey of selected high-quality models in a variety of scales and a section on further research references

The Japanese Battleship Nagato Dmitry Mironov, 2017-05-19 Nagato, named for Nagato Province, was a super-dreadnought battleship built for the Imperial Japanese Navy (IJN) during the 1910s. The lead ship of her class, she carried supplies for the survivors of the Great Kantō earthquake in 1923. The ship was modernized in 1934-36 with improvements to her armor and machinery and a rebuilt superstructure in the pagoda mast style. Nagato briefly participated in the Second Sino-Japanese War in 1937 and was the flagship of Admiral Isoroku Yamamoto during the attack on Pearl Harbor. She covered the withdrawal of the attacking ships and did not participate in the attack itself.

The Japanese Battleship Ise Carlo Cestra, 2018-01-23 Ise (whose name comes from an ancient Japanese province on Honshu, now part of Mie Prefecture) was the lead ship of the two-vessel Ise-class battleships of the Imperial Japanese Navy, which saw combat service during the Pacific War. Ise was laid down as battleship 5 at the Kawasaki Heavy Industries shipyard in Kobe on 10 May 1915, launched on 12 November 1916, completed on 15 December 1917, and assigned to the Kure Naval District. Completed too late for service in World War I, Ise patrolled off the Siberian coast and in northern waters in support of Japan's Siberian Intervention against the Bolshevik Red Army. From the mid-1920s through the late 1930s, Ise patrolled mostly off of the China coast. On 12 April 1922, she hosted a delegation which included Prince of Wales, the future King Edward VIII of the United Kingdom, and the future Lord Mountbatten. Ise-class battleships were fascinating ships and their story began in 1906 with the completion of HMS Dreadnought. The appearance of the all-big-gun turbine-powered Dreadnought rendered all existing battleships obsolete overnight, and in response the rest of the world's navies initiated massive construction programs. The world's major navies had gained an insurmountable lead in the number of dreadnoughts in service or under construction. Recognizing the futility of trying to compete in sheer numbers, the Japanese Navy adopted a quality before quantity approach, building fewer ships each of much greater capability than foreign designs. In 1911 the Japanese government passed the Emergency Naval Expansion bill which authorized the building of four battlecruisers and one battleship. The battleship was to be designed and built in Japan; this ship became the Fusō. There were a number of foreign designs to take into consideration when it came time to decide the main armament for the new ships. Britain Royal Navy's Orion class was armed with the 13.5 in. gun; the US Wyoming class with 12-12 in. guns; and the succeeding New York class with 10-14 in. weapons. Japan decided to leap over the competition and fit the

new ships with the 14 in. gun so Fuso-class would carry 12-14 in. weapons. Armament was not the only area where the Japanese battleship was intended to be superior to foreign designs: it was also to be at least 2 knots faster. Fuso was laid down on 11 March 1912 and she was the first battleship built in Japan using Japanese manufactured materials and weapons. Three sister ships were authorized, one of them laid down in November 1913, but financial difficulties prevented the laying down of the next two ships until 1915, which allowed time for some design improvements. The forecastle deck was shortened, the amidships turrets were grouped together and placed aft of the second funnel and the hull length was increased by 10 ft. to give more machinery space. The changes resulted in the two ships becoming known as the Improved Fuso or Ise class.

Yamato Class Battleships Steve Wiper, 2009-08-30 The Japanese Imperial Navy's impressive but ill-fated WWII battleships are examined in detail in this fully illustrated modeling guide. The volume in the ShipCraft series offers in-depth information about building and modifying model kits of WWII Japan's Yamato-class battleships. These were the largest warships of the Second World War and the largest battleships ever constructed. They also carried the largest naval artillery ever fitted to a warship. And yet, neither Yamato nor her sistership Musashi made much impact on the War. Musashi was sunk during the battle of Leyte Gulf while Yamato, deployed in a deliberate suicide attack on Allied forces at the battle of Okinawa, was finally sunk by US carrier-based aircraft. This lavishly illustrated volume takes the modeler through a brief history of the Yamato class, then provides step-by-step instruction for building a highly accurate model. Also included are hints on modifying and improving the basic kits and information on paint schemes. The strengths and weaknesses of available kits of the ships are reviewed, and the book concludes with a section on further research references.

Japanese Battleship Mirosaw Zbigniew Skwiot, 2011-01-01 The Imperial Japanese Navy of World War II was administered by the Ministry of the Navy of Japan and controlled by the Chief of the Imperial Japanese Navy General Staff and Imperial General Headquarters. This volume covers the early wartime battleships, with numerous photos, 3D artwork and line drawings.

Battleships Yamato and Musashi Janusz Skulski, 2017-05-18 Equipped with the largest guns and heaviest armour and with the greatest displacement of any ship ever built, the Yamato proved to be a formidable opponent to the US Pacific Fleet in the Second World War. The book contains a full description of the design and construction of the battleship including wartime modifications, and a career history followed by a substantial pictorial section with rare onboard views of Yamato and her sister ship Musashi, a comprehensive portfolio of more than 1,020 perspective line artworks, 350 colour 3D views, and 30 photographs. The wreck of Musashi has been recently discovered to great excitement in Japan, renewing interest in these iconic warships. Janusz Skulski's anatomies of three renowned ships of the 20th century Japanese navy are among the most comprehensive of the Anatomy series with hundreds of meticulously researched drawings of the ships. Since their first publication he has continued to research the ships and has now produce a more definitive anatomy than was possible then. He has teamed up with 3D artist Stefan Draminski who produces superb realistic renditions of the ships that bring a whole new level of detail to the portraits of the ships. This new editions is a genuine 'Super Anatomy' containing the most detailed renditions of these ships ever seen.

Japanese Battleship Kongo Waldemar Góralski, Grzegorz Nowak, 2015-04-02 Kongo, meaning indestructible, was the Imperial Japanese Navy's first super-dreadnought type battlecruiser, and the name-ship of her class, which also included the Hiei, Kirishima, and Haruna. She was upgraded to a battleship rating in the 1930s and served in several major naval operations during World War II before being sunk by enemy action in 1944. This modeling guide

provides a lavishly illustrated history of this impressive warship with numerous close-up and panoramic shots based on actual technical drawings. About the Series This brand-new series focuses on the construction of famous ships- battleships, carriers, cruisers, and submarines. With groundbreaking 3D imagery, each corner, angle, and dimension of the ship is viewable. With various close-up views, and each 3D image based on actual technical scale drawings and photographs, this is an exceptional reference tool. Information on the design, development and combat history of each vessel is also included, as well as numerous photographs and 1/350th scale drawings.

The Battle of Tsu-shima Between the Japanese and Russian Fleets, Fought on 27th May 1905 Vladimir Ivanovich Semenov, 1908

Japanese Battleships, 1897-1945 R. A. Burt, 2015-09-15 This unprecedented photographic collection contains 125 stunning black and white photographs of the battleships of the Imperial Japanese Navy. The remarkable images, some very rare, constitute an archive that is almost without equal in the West. The book begins with the launch of Japan's first contemporary battleship, Yashima, and concludes with the final destruction of the fleet in the Pacific in 1945. In between these two milestones, Japan constructed the third largest navy in the world. All of the fleet's dreadnoughts saw action in World War II but only the Nagato survived the conflict. She subsequently became a test target in the Bikini A-bomb tests in 1946.

The Japanese Battleship Musashi Carlo Cestra, 2017-03-19 Musashi battleship was the second ship of the Yamato class of Imperial Japanese Navy during the Second World War. She and her sister, Yamato, were the heaviest and most powerful battleships ever constructed, displacing 72800 tons at full load and armed with nine 46-cm Type 94 main guns. Musashi was commissioned in August 1942 and assigned to the 1st Battleship Division. In early 1943 the ship was transferred to Truk, which was the Empire of Japan's main base in the South Pacific. During this year she sortied several times with the fleet searching for American forces, without success. In 1944 she was used to transfer forces and equipment between Japan and various occupied islands. In early 1944 she was damaged by an American submarine attack and was forced to return to Japan for repairs. On this occasion she was strongly enhanced with anti-aircraft armament. She was present during the Battle of the Philippine Sea in June, but she didn't engage in combat with the American forces. On 24 October 1944, during the Battle of Leyte Gulf, after several hours of fighting, Musashi was sunk by a large number of torpedoes and bombs fired from American carrier-based aircraft. The wreck was located in March 2015 by the team of Microsoft cofounder Paul Allen, at a depth of about 1350 meters (4430 feet).

Titans of the Rising Sun , 2010-01-01 Titans of the Rising Sun is a detailed study of Japan's Yamato class superbattleships which participated in World War Two. This publication details the evolution of Japanese battleship development culminating with the construction of the largest battleships in history. Included in this volume are the naval battles in which the ships of this class participated along with an analysis of the eventual obsolescence of the battleship in favor of the aircraft carrier.

The Japanese Battleship Fuso Dmitry Mironov, 2017-03-19 The Battleship Fuso was laid down at Kure on 11 March 1912, launched on 28 March 1914, and joined the Navy on 8 November 1915. He was the second battleship bearing the name Fuso and he participated in the Sino-Japanese and Russo-Japanese war. The battleship Fuso was enrolled in the 1st division of the linear ships of the First fleet. Japan at this time was involved in the First World War, but the ship was tested and trained for combat in peacetime. The first long-range voyage of the new battleship was in Chinese waters in April 1917.

The Battle of Tsu-shima, 27 May, 1905 Vladimir Semenoff, 1907

Japanese Battleship Mirosław Skwiot, 2010-11-01

Russian Battleship vs Japanese Battleship Robert Forczyk, 2013-09-20 The first major clash between a European and Asian state in the modern era signalled the beginning of Japan's rise as a major power on the world stage. Watched by the rest of the world's superpowers, this incredibly violent war was disastrous for the Russians who, despite their superior numbers, were defeated by the Japanese underdogs in a spectacular fashion. The key technical elements of firepower, protection, maneuverability and communications for each side are covered in detail and accompanied by first-hand accounts and specially commissioned artwork to explain and illustrate this historically significant duel.

The Battleship Yamato Janusz Skulski, 1988 With the greatest displacement, biggest guns and heaviest armour, Yamato and her sister Musashi were the ultimate battleships. Everything about them was gigantic - each main armament turret, for example, had a total revolving weight of over 2500 tonnes - and they proved formidable opponents to the US Pacific Fleet.

The Japanese Battleship Kirishima 1940 Waldemar Goralski, 2019-12-27 The Brandenburg class battleships were the first blue water warships of the Kaiserliche Marine and can be categorized as the first German pre-dreadnought ships.

World War II Warships John Batchelor, 2006-01-01 This fleet of 28 accurately detailed ships includes the ill-fated PT-109, commanded by a young John F. Kennedy, a German U-boat, and the USS Missouri, the battleship on which the Japanese surrendered.

Capital Ships of the Imperial Japanese Navy 1868-1945 Hans Lengerer, Lars Ahlberg, 2014 87 photos, 202 figures and drawings, 60 tables, and 15 maps and tracks. Recognising the impossibility of improving upon the (in)famous 5:5:3 ratio of the Washington Naval Treaty when the expected naval race would begin as the treaty expired, the Imperial Japanese Navy resorted to a strategy of qualitative superiority to overcome the American quantitative edge. The IJN succeeded, after many studies and false starts, in creating the world's most heavily armed (nine 18.1 main guns in three triple turrets - the largest calibre ever mounted) and protected (410-mm thick VH belt armor, 660-mm thick front shields of the gun houses - the thickest armour plates ever mounted) battleships. With a displacement in excess of 70,000 tons their size was unprecedented but despite this restrictions resulted in defects, which otherwise might have been avoided; other defects were the result of techniques below the highest standard. Because the qualities of a battleship were generally measured by gun power, protection and mobility the authors have focused upon these items after giving a rough outline of the design and building processes. The result is probably the most detailed description based upon Japanese sources published outside Japan. Stimulated by Gustav Jensen's expanded dissertation *Japans Seemacht* and encouraged by Messrs. Erich Gröner and Prof. Jürgen Rohwer, Hans Lengerer began writing on the IJN in 1969. Over the years more than 50 articles have appeared in magazines like *Marine Rundschau*, *Marine Forum*, *Warship* and *Interconair Aviation e Marina*. After retirement from service in an executive organ, Lengerer continues to write books and articles using a considerable amount of time for his hobby. He is also the author of the privately published *Contributions to the History of Imperial Japanese Warships*, referred to in this book, and is presently working to revise and condense his 250,000-word manuscript *Development of Warship Construction in Japan* and to complete *A History of the Imperial Japanese Navy*. As hobby researcher at best, his writings depend heavily upon information supplied by other IJN fans; they come first therefore. Lars Ahlberg is on active duty with the Swedish Air Defence Regiment and is a military historian by avocation. He has written monographs about the IJN battleships of the Nagato class and the IJN aircraft carrier *Taihō*. His articles

have appeared in Sveriges Flotta, Warship International and Okrety Wojenne and for several years he has been the editor of Contributions to the History of Imperial Japanese Warships. Ahlberg has also co-authored two books about Swedish regiments: Kungl Hallands regementes historia 1962-2000 and Kasernerna på Galgberget.

The Japanese Battleship Kongo 1944: Aircraft Drawings. the Best Od Mariusz Lukasik Waldemar Góralski, 2021-03-23
The IJN battlecruiser Kongo was laid down on January 17, 1911 at Vickers, Sons & Co. at Barrow-in-Furness. The ship's hull was launched on May 18, 1912 and on August 16, 1913 the vessel entered service with the Imperial Japanese Navy. In the years after she had been launched the Kongo had undergone two major reconstructions, each having a deep impact on the ship's characteristics and her overall arrangement.
