Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture.Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie.Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

The Grid Book Hannah B Higgins,2009-01-23 Ten grids that changed the world: the emergence and evolution of the most prominent visual structure in Western culture. Emblematic of modernity, the grid is the underlying form of everything from skyscrapers and office cubicles to paintings by Mondrian and a piece of computer code. And yet, as Hannah Higgins makes clear in this engaging and evocative book, the grid has a history that long predates modernity; it is the most prominent visual structure in Western culture. In The Grid Book, Higgins examines the history of ten grids that changed the world: the brick, the tablet, the gridiron city plan, the map, musical notation, the ledger, the screen, moveable type, the manufactured box, and the net. Charting the evolution of each grid, from the Paleolithic brick of ancient Mesopotamia through the virtual connections of the Internet, Higgins demonstrates that once a grid is invented, it may bend, crumble, or shatter, but its organizing principle never disappears. The appearance of each grid was a watershed event. Brick, tablet, and city gridiron made possible sturdy housing, the standardization of language, and urban development. Maps, musical notation, financial ledgers, and moveable type promoted the organization of space, music, and time, international trade, and mass literacy. The screen of perspective painting heralded the science of the modern period, classical mechanics, and the screen arts, while the standardization of space made possible by the manufactured box suggested the purified box forms of industrial architecture and visual art. The net, the most ancient grid, made its first appearance in Stone Age Finland; today, the loose but clearly articulated networks of the World Wide Web suggest that we are in the middle of an emergent grid that is reshaping the world, as grids do, in its image.

Six Canonical Projects by Rem Koolhaas Ingrid Böck,2015-05-01 Rem Koolhaas (born in 1944) has been part of the international architecture avant-garde since the nineteen-seventies. His numerous worldwide awards include the Pritzker Prize in 2000 for his lifetime achievement.This book interprets his many buildings and projects for the first time through his own comprehensive theoretical oeuvre, comprising polemics manifestos, books about cultural studies such as Delirious New York, and so-called “design patents”. Rem Koolhaas developed an evolutionary design method that linked theory and practice, whereby an idea is applied to several projects and combined with others in different ways, so that it is continuously evolving. The book not only combines this architectural knowledge with the intellectual history of the concepts, but also reinterprets the function of the authors or the architects and their originality.

Doing Postgraduate Research in Australia Kate Stevens,Catherine Joanna Stevens,Christine Asmar,1999 Doing Postgraduate Research covers: negotiating the University system at postgraduate level, getting scholarships and travel funds, choosing a supervisor - finding a mentor, managing time and staying motivated, traditional and electronic research - using e-mail and internet, learning to teach, making an impact at local and overseas conferences, getting the thesis finished, getting published, and finding post-degree opportunities. This book will appeal both to supervisors and to research students who want to make the most of their postgraduate study in Australia and to plan for the future.

Deterritorialisations ... Mark Dorrian,Gillian Rose,2003 In recent years, landscape has become increasingly recognised as a topic of central importance to a wide variety of disciplines. To a large degree this recognition has been based upon an expanding appreciation of the political aspects of landscape, its ideological character and effects. *Landscapes and Politics* is an innovative cross-disciplinary volume of new writing which brings together, in a strategic and productive encounter, a broad variety of critical work currently being done in this field. With 28 papers and five photo essays. *Landscapes and Politics* presents material by scholars and practitioners from anthropology, archaeology, architecture, art history, cultural studies, English and American literature, film studies, fine art, geography, history, landscape architecture, philosophy, political science, and religious studies. As an important marker of current methodologies, research and practice across these different disciplinary areas *Landscapes and Politics* is an invaluable resource. It will be of interest to all those concerned with current discourses and debates on landscape and its representation.

Drawing Architecture ,2013-10-18 We are in the second decade of the 21st century and, as with most things, the distinction between digital and analogue has become tired and inappropriate. This is also true in the world of architectural drawing, which paradoxically is enjoying a renaissance supported by the graphic dexterity of the computer. This new fecundity has produced a contemporary glut of stunning architectural drawings and representations that could rival the most recent outpouring of architectural vision in the 1960s, 1970s and 1980s. Indeed, there is much to learn by comparing the then and the now. The contemporary drawing is often about its ability to describe the change, fluctuations and mutability of architecture in relation to the virtual/real 21st-century continuum of architectural space. Times have changed, and the status of the architectural drawing must change with them. This reassessment is well overdue, and this edition of AD will be the catalyst for such re-examination. Features the work of: Pascal Bronner, Bryan Cantley, Peter Cook, Perry Kulper, CJ Lim, Tom Noonan, Dan Slavinsky, Neil Spiller, Peter Wilson, Nancy Wolf, Lebbeus Woods and Mas Yendo. Contributors include: Nic Clear, Mark Garcia, Simon Herron and Mark Morris.

Drawing Parallels Ray Lucas, 2019-04-29 *Drawing Parallels* expands your understanding of the workings of architects by looking at their work from an alternative perspective. The book focuses on parallel projections such as axonometric, isometric, and oblique drawings. Ray Lucas argues that by retracing the marks made by architects, we can begin to engage more directly with their practice as it is only by redrawing the work that hidden aspects are revealed. The practice of drawing offers significantly different insights, not easily accessible through discourse analysis, critical theory, or observation. Using James Stirling, JJP Oud, Peter Eisenman, John Hejduk, and Cedric Price as case studies, Lucas highlights each architect's creative practices which he analyses with reference to Bergson's concepts of temporality and creativity, discussing the manner in which creative problems are explored and solved. The book also draws on a range of anthropological ideas including skilled practice and enchantment in order to explore why axonometrics are important to architecture and questions the degree to which the drawing convention influences the forms produced by architects. With 60 black-and-white images to illustrate design development, this book would be an essential read for academics and students of architecture with a particular interest in further understanding the inner workings of the architectural creative process.

We'll Show the World Jackie Ryan, 2018-04-26 How did one long and expensive party change a city forever? World Expo 88 was the largest, longest, and loudest of Australia's bicentennial events. A shiny 1980s amalgam of cultural precinct, shopping mall, theme park, travelogue, and rock concert, Expo 88 is commonly credited as the catalyst for Brisbane's 'coming of age'. So how did an elaborate and expensive party change a city forever? *We'll Show the World* explores the shifting social and political environment of Expo 88, shaped as much by Queensland's controversial premier Sir Joh Bjelke-Petersen as it was by those who reacted against him. It shows how something initially greeted with outrage, scepticism, and indifference came to mean so much to so many, how a state better known for eliciting insults enchanted much of the nation, and how, to Brisbane, Expo was personal.

The Literature of Waste S. Morrison, 2015-06-04 Tracing material and metaphoric waste through the Western canon, ranging from Beowulf to Samuel Beckett, Susan Signe Morrison disrupts traditional perceptions of waste to better understand how we theorize, manage, and are implicated in what is discarded and seen as garbage. Engaging a wide range of disciplines, Morrison addresses how the materiality of waste has been sedimented into a variety of toxic metaphors. If scholars can read waste as possessing dynamic agency, how might that change the ethics of refuse-ing and ostracizing wasted humans? A major contribution to the growing field of Waste Studies, this comparative and theoretically innovative book confronts the reader with the ethical urgency present in waste literature itself.

Delirious New York Rem Koolhaas, 2014-07-01 Since its original publication in 1978, *Delirious New York* has attained mythic status. Back in print in a newly designed edition, this influential cultural, architectural, and social history of New York is even more popular, selling out its first printing on publication. Rem Koolhaas's celebration and analysis of New York depicts the city as a metaphor for the incredible variety of human behavior. At the end of the nineteenth century, population, information, and technology explosions made Manhattan a laboratory for the invention and testing of a metropolitan lifestyle -- the culture of congestion -- and its architecture. Manhattan, he writes, is the 20th century's Rosetta Stone . . . occupied by architectural mutations (Central Park, the Skyscraper), utopian fragments (Rockefeller Center, the U.N. Building), and irrational phenomena (Radio City Music Hall). Koolhaas interprets and reinterprets the dynamic relationship between architecture and culture in a number of telling episodes of New York's history, including the imposition of the Manhattan grid, the creation of Coney Island, and the development of the skyscraper. *Delirious New York* is also packed with intriguing and fun facts and illustrated with witty watercolors and quirky archival drawings, photographs, postcards, and maps. The spirit of this visionary investigation of Manhattan equals the energy of the city itself.
