Measure and Construction of the Japanese House Heino Engel, 2020-08-11 A remarkable classic work on traditional Japanese architecture and its general integrative quality, the order of space and form, the flexibility of partitions and room functions and other important or unique qualities. The author describes in detail, and with numerous architectural plans and drawings, the influence of the anatomy of the Japanese human body on traditional units of measurement and on house construction. This work is not simply a description of the features of the Japanese house, but an invitation to probe the possibilities of utilizing this architectural achievement of the Japanese ...in modern living and building, according to the author, who further believes that the unique features of the Japanese house are better suited to serve as a pattern for contemporary housing than any other form of residential structure.

*Measure and Construction of the Japanese House* Heino Engel, 2020-08-11 A remarkable classic work on traditional Japanese architecture, and how the style and features can serve as a model for

contemporary residential buildings. With incredible detail (as well as numerous architectural plans and drawings), author and architect Heino Engel describes everything from room functions and the flexibility of partitions to the influence of human anatomy on Japanese units of measure. Rather than exploring why the traditional Japanese house is built the way it is, Engel delves into the practical information: what the Japanese house is and how it is built. This book is not simply a description of the features of the Japanese house, but an invitation to probe the possibilities of utilizing this architectural achievement of the Japanese...in modern living and building, according to the author, who further believes that the unique details of the Japanese house are better suited as a pattern for contemporary housing than any other form of residential structure. With a new foreword by architect and professor Mira Locher, Fellow of the American Institute of Architects, this updated hardcover edition brings this popular work to modern readers--in hopes that they may find ideas to adopt into their own home.

**Building the Japanese House Today** Peggy Landers Rao, Len Brackett, 2005-10 The traditional

Japanese house is universally admired for its clean lines, intricate joinery, and unparalleled woodworking. The authors of this elegant volume, Peggy Landers Rao and Len Brackett, show how a classic Japanese- style house can be built to offer the warmth and comfort that modern homeowners require. Len Brackett, rigorously trained in traditional architecture in Kyoto, has spent decades adapting the ancient Japanese design aesthetic to Western needs. He builds traditional live-on-the-floor houses, as well as versions that accommodate furniture. Both types provide the essential features expected in today's new homes - central heating, insulation, weather stripping, thermal glazing, streamlined kitchens, computerized lighting systems, and the latest electronics. The book's primary focus is on a single guesthouse in California, but pictures of other adaptations of the traditional Japanese house in America exemplify various points. Architects will find reference charts of the prescribed set of proportions and dimensions normally passed down through a strict system of apprenticeship. anticipating shrinkage of various woods. A remarkable tool used to lay out precise joints is described in detail. Various sources are given for materials, including where to find a

contemporary version of the distinctive, traditional earthen plaster.

Region-Building in Southern Africa Chris Saunders,Gwinyayi Albert Dzinesa,Dawn Nagar,2013-07-04 How successful have Southern African states been in dealing with the major issues that have faced the region in recent years? What could be done to produce more cohesive and effective region-building in Southern Africa? In this original and wide-ranging volume, which draws on

an interdisciplinary team of mainly African and African-based specialists, the key political, socio-economic, and security challenges facing Southern Africa today are addressed. These include the various issues confronting the Southern African Development Community (SADC) and its institutions; such as HIV/AIDS, migration and xenophobia, land-grabbing and climate change; and the role of the main external actors involved with the region, including the United Nations, the European Union, the United States, and China. The book also looks at the Southern African Customs Union and Southern African Development Finance Institutions, including the Development Bank of Southern Africa and Industrial Development Corporation, and issues of gender and peacebuilding. In doing so, the book goes to the heart of analyzing the effectiveness of SADC and other regional organisation, suggesting how region-building in Southern Africa may be compared with similar attempts elsewhere in Africa and other parts of the world.

*The Book of Tea* Kakuzo Okakura, 2012 This is the extended and annotated edition including \* an extensive annotation of more than 10.000 words about the history and basics of Buddhism, written by

Thomas William Rhys Davids *The Book of Tea* by Okakura Kakuzo (1906), is a long essay linking the role of tea (Teaism) to the aesthetic and cultural aspects of Japanese life. Addressed to a western audience, it was originally written in English and is one of the great English Tea classics. Okakura had been taught at a young age to speak English and was proficient at communicating his thoughts to the Western mind. In his book, he discusses such topics as Zen and Taoism, but also the secular aspects of tea and Japanese life. The book emphasizes how Teaism taught the Japanese many things; most importantly, simplicity. Kakuzo argues that this tea-induced simplicity affected art and architecture, and he was a long-time student of the visual arts. He ends the book with a chapter on Tea Masters, and spends some time talking about Sen no Rikyū and his contribution to the Japanese Tea Ceremony.
