Mitsubishi Zero Peter C Smith, 2014-11-30 The Mitsubishi Zero is one of the great legendary fighter aircraft ever to have graced the skies. Symbolic of the might of Imperial Japan, she represented a peak of developmental prowess in the field of aviation during the early years of the Second World War. Engineered with manoeuvrability in mind, this light-weight, stripped-back aircraft had a performance that left her opponents totally outclassed. The dogfights she engaged in with the Chinese, British, Dutch and American warplanes in the 1941-42 period are the stuff of aviation legend. The Zero fighter had four major assets - agility, long-range, experienced and war-blooded pilots and, most importantly of all, a total inability of the Allies, particularly in the Pacific Theatre of operations, to believe that Japan could produce such a machine. Despite a whole series of eyewitness reports from China, where she had swept the skies clean of all opposition, western minds were closed, and remained so until the brutal facts imposed themselves on their biased mindsets. All aircraft designs are a compromise of course, and the Zero had faults as well as strengths, two of which were to finally doom her; one was her lack of armour protection and the other was the inability of the Japanese to match the overwhelming production strength and innovation of Allied aircraft construction. Even so, she remained a potent threat until the end of the war, not least in her final role, that of a Kamikaze aircraft, in which she created as much havoc on the sea as she had done earlier in the air.??Peter C. Smith takes the reader on a journey from inspired inception to the blazing termination of this unique aircraft, the first Naval fighter to be superior to land-based aircraft. It describes in detail the many victories that punctuated the early days of its operational career as well as the desperate dying days of the Second World War which witnessed her final demise. Smith also lists the preserved Zero aircraft on display today. This is a fast-paced and fascinating history of a fighter aircraft like no other.

A6M Zero Mitsubishi Robert Jackson, 2021-01-18 This detailed study of Japan's fearsome WWII fighter covers its legendary combat career along with color images and technical information. The quality of Japan's Mitsubishi A6M Zero shocked Allies Forces at the outbreak of the Pacific War. Armed with two 20mm cannon and two 7.7mm machine-guns, it was highly maneuverable and structurally very strong, despite being lightweight. When it first took flight in 1939, it was far superior to any other fighter in the skies. During the first months of the Pacific War, the Zeros carved out an impressive combat record. For example, in the battle for Java alone, they destroyed 550 Allied aircraft. But it eventually outclassed by American fighters such as the Grumman F6F Wildcat and Vought Corsair. In the latter months, many were fitted with bombs and expended in Kamikaze suicide attacks. This book provides a detailed overview of the design and combat career of a fighter that made history. Ideal for modelers and military history enthusiasts, it offers a wealth of technical information, photographs and color profiles.

A6M Zero-sen Aces 1940-42 Nicholas Millman, 2019-04-18 The Mitsubishi A6M Zero-sen was Japan's Spitfire. In continuous development and operational service from the time of the Sino-Japanese war in 1940 to the end of the Pacific War in 1945, it is held in almost mythical awe, similar to Britain's legendary fighter aircraft. At the time of its operational debut the fighter's design features offered the revolutionary combination of an all-round vision canopy, cannon armament and a jettisonable drop tank giving it phenomenal range. Together with the flying and tactical proficiency of superbly trained pilots, this made the Zero-sen a true strategic fighter, spearheading Japan's offensive in the Pacific. It was also the mount of a plethora of successful and flamboyant naval aces engaged in both sea and land campaigns. This volume covers the use of the A6M2 variant from its debut in China to the Solomons Campaign, and also tells the story of the A6M2 fighter aces of the 4th and Tainan Kokutai.

Wings of the Rising Sun Mark Chambers, 2018-11-29 In the Pacific War's early years, Japanese air power was dominant. The only way for the Allies to defeat their enemy was to know it. This made the task of maintaining productive intelligence gathering efforts on Japan imperative. Establishing Technical Air Intelligence Units in the Pacific Theatre and the Technical Air Intelligence Center in Washington DC, the Allies were able to begin to reveal the secrets of Japanese air power through extensive flight testing and evaluation of captured enemy aircraft and equipment. These provided an illuminating perspective on Japanese aircraft and aerial weapon design philosophy and manufacturing practice. Fully illustrated throughout with a wealth of previously unpublished photographs, Mark Chambers explores Allied efforts to evaluate the strengths and weaknesses of Japanese air power during the war years, and how this intelligence helped them achieve victory in the Pacific.

Imperial Japanese Navy Aces 1937-45 Henry Sakaida, 2012-10-20 The outcome of the Pacific War was heavily influenced by the results of naval

battles between the Imperial Japanese fleet and the US Navy. One of the key elements was Japan's large fighter component, which had gained experience over Manchuria, China and Mongolia in the late 1930s. Flying A5Ms, at least 21 pilots achieved 'acedom' securing air superiority for the invaders. Fighter Zero Mantelli - Brown - Kittel - Graf,2017-03-05 From the attack on Pearl Harbor to the last desperate defense in the face of massive Allied bombings and suicide attacks against the enemy squadrons, the Mitsubishi A6M Reisen (baptized Rei-sen, ie hunting zero with reference to the year 2600 calendar Japanese, 1940 AD) took part in almost all major actions of naval Japanese. Its fabulous maneuverability and its exceptional autonomy were legendary, and made the Zero symbol of air power of the Rising Sun, as to make it as famous as the Spitfire or Bf. 109. Zero earned fame with a series of brilliant victories against all allied aircraft in the first months of the war in the Pacific, and since he found difficulty Japanese Navy to commission another modern fighter capable of competing with the new Allied aircraft that appeared in the Pacific towards the end of 1942, the Mitsubishi A6M had to endure in large part the weight of the operations until the end of the conflict. For Japan, the Zero was, in fact, much more than an airplane, but the symbol of the Empire air power; for the Allies was much more of a relentless opponent but a nightmare, and at the same time a myth. For a long time were the virtues attributed largely imaginary, since its unique and indisputable qualities were exceptional maneuverability and an equally exceptional autonomy. The Mitsubishi A6M Zero was one of those planes that could not raise more mixed reviews, now ignored, feared now, finally, ridiculed, and then again taken into consideration, mythologized, analyzed critically, overrated, underrated, and so on seamless. When hostilities began with the outbreak of World War II, the Zero was considered the best fighter in the world based on aircraft carriers, because they associated an excellent maneuverability granted very extensive. In the first air combat, the Zero gained a legendary reputation, but in 1942 the new combat tactics enabled the Allied pilots to engage in duels more balanced terms.
