Silver State Dreadnought Stephen M. Younger, 2018 Silver State Dreadnought is the story of a ship and the men who sailed in her. It covers the ship's life from its construction in 1912 to its sinking in 1948. It covers its activity in World War I, during which it was based in Queenstown, Ireland as protection for American convoys bringing troops to Europe. The book also looks at the naval reduction treaties of the 1920s and the ship's reconstruction in 1928 with the latest in naval technology.--Provided by publisher.

The First Team John Lundstrom, 2013-04-11 Hailed as one of the finest examples of aviation research, this comprehensive 1984 study presents a detailed and scrupulously accurate operational history of carrier-based air warfare. From the earliest operations in the Pacific through the decisive Battle of Midway, it offers a narrative account of how ace fighter pilots like Jimmy Thach and Butch O'Hare and their skilled VF squadron mates - called the first team - amassed a remarkable combat record in the face of desperate odds. Tapping both American and Japanese sources, historian John B. Lundstrom reconstructs every significant action and places these extraordinary fighters within the context of overall carrier operations. He writes from the viewpoint of the pilots themselves, after interviewing some fifty airmen from each side, to give readers intimate details of some of the most exciting aerial engagements of the war. At the same time he assesses the role the fighter squadrons played in key actions and shows how innovations in fighter tactics and gunnery techniques were a primary reason for the reversal of American fortunes. After more than twenty years in print, the book remains the definitive account and is being published in paperback for the first time to reach an even larger audience.

Imperial Biologists Hideo Mohri, 2019-03-26 This book sheds light on a little-known aspect of the Imperial family of Japan: For three generations, members of the family have devoted themselves to biological research. Emperor Showa (Hirohito) was an expert on hydrozoans and slime molds. His son, Emperor Akihito, is an ichthyologist specializing in gobioid fishes, and his research is highly respected in the field. Prince Akishino, Emperor Akihito's son, is known for his research on giant catfish and the domestication of fowl, while Prince Hitachi, Emperor Akihito's brother, has conducted research on cancer in animals. The book shows how they became interested in biology, how seriously they were committed to their research, what their main scientific contributions are, and how their achievements are valued by experts at home and abroad. To commemorate the 60-year reign of Emperor Showa and his longtime devotion to

biology, the International Prize for Biology was founded in 1985. The prize seeks to recognize and encourage researches in basic biology. A list of winners and a summary of their research are presented in the last part of the book. The author, an eminent biologist who has given lectures to the Imperial Family, explains their research and tells the fascinating story of biology and the Imperial Family of Japan. The book is a valuable resource, not only for biology students and researchers, but also for historians and anyone interested in science and the Royal and Imperial families.

The Encyclopedia of Indonesia in the Pacific War, 2009-12-14 Written by an international team of researchers the Encyclopedia of Indonesia in the Pacific War presents a well-balanced view on the political, socio-economic and cultural developments in Indonesia in and around the complex period of Second World War. Choice's Outstanding Academic Title 2010.

Shattered Sword Jonathan Parshall, Anthony Tully, 2011 Many consider the Battle of Midway to have turned the tide of the Pacific War. It is without question one of the most famous battles in history. Now, for the first time since Gordon W. Prange's bestselling *Miracle at Midway*, Jonathan Parshall and Anthony Tully offer a new interpretation of this great naval engagement. Unlike previous accounts, *Shattered Sword* makes extensive use of Japanese primary sources. It also corrects the many errors of Mitsuo Fuchida's *Midway: The Battle That Doomed Japan*, an uncritical reliance upon which has tainted every previous Western account. It thus forces a major, potentially controversial reevaluation of the great battle. The authors examine the battle in detail and effortlessly place it within the context of the Imperial Navy's doctrine and technology. With a foreword by leading WWII naval historian John Lundstrom, *Shattered Sword* will become an indispensable part of any military buff's library. Winner of the 2005 John Lyman Book Award for the Best Book in U.S. Naval History and cited by *Proceedings* as one of its Notable Naval Books for 2005.

Classic Warships Peter Mavrikis, 2015-12-15 In this high-interest book, readers look inside the world of classic warships. Through vivid diagrams that come alive on the pages and fascinating facts about pre-1900 warships such as the HMS Victory and the CSS Alabama, readers learn all about life on the high seas and battles between countries and even against pirates. This information-rich, visually dynamic text gives readers a deep understanding about how classic warships tamed the open seas. From wooden vessels from the 1500s to triple-decker and ironclad ships from the 1800s, these ships explored and patrolled newfound areas and engaged in some of the most epic sea battles in history.

Japan and Britain after 1859 Olive Checkland, 2003-08-29 In the years following Japan's long period of self-imposed isolation from the world, Japan developed a new relationship with the West, and especially with Britain, where relations grew to be particularly close. The Japanese, embarrassed by their perceived comparative backwardness, looked to the West to learn modern industrial techniques, including the design and engineering skills which underpinned them. At the same time, taking great pride in their own culture, they exhibited and sold high quality products of traditional Japanese craftsmanship in the West, stimulating a thirst for, and appreciation of, Japanese arts and crafts. This book examines the two-way bridge-building cultural exchange which took place between Japan and Britain in the years after 1859 and into the early years of the twentieth century. Topics covered include architecture, industrial design, prints, painting and photographs, together with a consideration of Japanese government policy, the Japan-Britain Exhibition of 1910, and commercial spin-offs. In addition, there are case studies of key individuals who were particularly influential in fostering British-Japanese cultural bridges in this period.

Intra-Asian Trade and the World Market A.J.H. Latham, Heita Kawakatsu, 2006-04-18 Intra-Asian trade is a major theme of recent writing on Asian economic history. From the second half of the nineteenth century, intra-Asian trade flows linked Asia into an integrated economic system, with reciprocal benefits for all participants. But although this was a network from which all gained, there was also considerable inter-Asian competition between Asian producers for these Asian markets, and those of the wider world. This collection presents captivating snap-shots of trade in specific commodities, alongside chapters comprehensively covering the region. The book covers: China's relative backwardness, Japanese copper exports, Japan's fur trade, Siam's luxury rice trade, Korea, Japanese shipbuilding, the silk trade, the refined sugar trade, competition in the rice trade, the Japanese cotton textile trade to Africa, multilateral settlements in Asia, the cotton textile trade to Britain, and the growth of the palm oil industry in Malaysia and Indonesia. The opening of Asia, especially in Japan and China, liberated the creative forces of the market within the new intra-Asian economy. Filling a particular gap in the literature on intra-Asian trade prior to the twentieth century, this is an insightful study that makes a considerable contribution to our knowledge of the Asian trade both prior to, and after, the arrival of colonial states. It will be of great interest to historians and economists focusing on Asia.

The Word Rhythm Dictionary Timothy Polashek, 2014-04-18 This new kind of dictionary reflects the use of "rhythm rhymes" by rappers, poets, and songwriters of today. Users can look up words to find collections of words that have the same rhythm as the original and are useable in ways that are familiar to us in everything from vers libre poetry to the lyrics and music of Bob Dylan and hip hop groups.

The Imperial Japanese Navy in the Pacific War Mark Stille, 2014-11-20 An highly illustrated examination of the key ships, tactics and operations of the Imperial Japanese Navy in the War in the Pacific in World War II. The Imperial Japanese Navy (IJN) was the third most powerful navy in the world at the start of World War II, and came to dominate the Pacific in the early months of the war. This was a remarkable turnaround for a navy that only began to modernize in 1868, although defeats inflicted on the Russians and Chinese in successive wars at the turn of the century gave a sense of the threat the IJN was to pose. Bringing together for the first time material previously published in Osprey series books, and with the addition of new writing making use of the most recent research, this book details the Japanese ships which fought in the Pacific and examines the principles on which they were designed, how they were armed, when and where they were deployed and how effective they were in battle. The Imperial Japanese Navy in the Pacific War provides a history of the IJN's deployment and engagements, analysis of the evolution of strategy and tactics, and finally addresses the question of whether it truly was a modern navy, fully prepared for the rigors of combat in the Pacific. Illustrated throughout with photographs and detailed colour artworks, this is a valuable reference source for Pacific War enthusiasts and historians alike.

Thunder Below! Eugene B. Fluckey, 2013-04-01 The thunderous roar of exploding depth charges was a familiar and comforting sound to the crew members of the USS Barb, who frequently found themselves somewhere between enemy fire and Davy Jones's locker. Under the leadership of her fearless

skipper, Captain Gene Fluckey, the Barb sank the greatest tonnage of any American sub in World War II. At the same time, the Barb did far more than merely sink ships-she changed forever the way submarines stalk and kill their prey. This is a gripping adventure chock-full of you-are-there moments. Fluckey has drawn on logs, reports, letters, interviews, and a recently discovered illegal diary kept by one of his torpedomen. And in a fascinating twist, he uses archival documents from the Japanese Navy to give its version of events. The unique story of the Barb begins with its men, who had the confidence to become unbeatable. Each team helped develop innovative ideas, new tactics, and new strategies. All strove for personal excellence, and success became contagious. Instead of lying in wait under the waves, the USS Barb pursued enemy ships on the surface, attacking in the swift and precise style of torpedo boats. She was the first sub to use rocket missiles and to creep up on enemy convoys at night, joining the flank escort line from astern, darting in and out as she sank ships up the column. Surface-cruising, diving only to escape, Luckey Fluckey relentlessly patrolled the Pacific, driving his boat and crew to their limits. There can be no greater contrast to modern warfare's long-distance, videogame style of battle than the exploits of the captain and crew of the USS Barb, where they sub, out of ammunition, actually rammed an enemy ship until it sank. *Thunder Below!* is a first-rate, true-life, inspirational story of the courage and heroism of ordinary men under fire.

CubeSat Handbook Chantal Cappelletti, Simone Battistini, Benjamin K. Malphrus, 2020-09-25 CubeSat Handbook: From Mission Design to Operations is the first book solely devoted to the design, manufacturing, and in-orbit operations of CubeSats. Beginning with an historical overview from CubeSat co-inventors Robert Twiggs and Jordi Puig-Suari, the book is divided into 6 parts with contributions from international experts in the area of small satellites and CubeSats. It covers topics such as standard interfaces, on-board & ground software, industry standards in terms of control algorithms and sub-systems, systems engineering, standards for AITV (assembly, integration, testing and validation) activities, and launch regulations. This comprehensive resource provides all the information needed for engineers and developers in industry and academia to successfully design and launch a CubeSat mission. Provides an overview on all aspects that a CubeSat developer needs to analyze during mission design and its realization Features practical examples on how to design and deal with possible issues during a CubeSat mission Covers new developments and technologies, including ThinSats and PocketQubeSats

Hawaii Under the Rising Sun John J. Stephan, 2001-10-31 “This lively, provocative study challenges the widely held belief that the Japanese did not intend to invade the Hawaiian Islands.” —Choice “A disquieting book, which shatters several historical illusions that have almost come to be accepted as facts. It will remind historians how complex and ambiguous history really is.” —American Historical Review
