Japan's Reluctant Realism M. Green, 2001-05-17 In Japan's Reluctant Realism, Michael J. Green examines the adjustments of Japanese foreign policy in the decade since the end of the Cold War. Green presents case studies of China, the Korean peninsula, Russia and Central Asia, Southeast Asia, the international financial institutions, and multilateral forums (the United Nations, APEC, and the ARF). In each of these studies, Green considers Japanese objectives; the effectiveness of Japanese diplomacy in achieving those objectives; the domestic and exogenous pressures on policy-making; the degree of convergence or divergence with the United States in both strategy and implementation; and lessons for more effective US - Japan diplomatic cooperation in the future. As Green notes, its bilateral relationship with the United States is at the heart of Japan's foreign policy initiatives, and Japan therefore conducts foreign policy with one eye carefully on Washington. However, Green argues, it is time to recognize Japan as an independent actor in Northeast Asia, and to assess Japanese foreign policy in its own terms.

Military Industries of Japan Ushisaburō Kobayashi, Norimoto Masuda, 1922

The Information Revolution in Military Affairs in Asia E. Goldman, T. Mahnken, 2004-07-22 The contributors to this volume seek to explore the multi-dimensional (institutional, cultural, technological, and political) environments of several Asian states to determine the amenability of those host environments for the adoption/adaptation of the Revolution in Military Affairs (RMS).

Regionalism and Rivalry Jeffrey A. Frankel, Miles Kahler, 2007-12-01 As Japan's newfound economic power leads to increased political power, there is concern that Japan may be turning East Asia into a regional economic bloc to rival the U.S. and Europe. In Regionalism and Rivalry, leading economists and political scientists address this concern by looking at three central questions: Is Japan forming a trading bloc in Pacific Asia? Does Japan use foreign direct investment in Southeast Asia to achieve national goals? Does Japan possess the leadership qualities necessary for a nation assuming greater political responsibility in international affairs? The authors contend that although intraregional trade in East Asia is growing rapidly, a trade bloc is not necessarily forming. They show that the trade increase can be explained entirely by factors independent of discriminatory trading arrangements, such as the rapid growth of East Asian economies. Other chapters look in detail at cases of Japanese direct investment in Southeast Asia and find little evidence of attempts by Japan to use the power of its multinational corporations for political purposes. A third group of papers attempt to gauge Japan's leadership characteristics. They focus on Japan's technology ideology, its contributions to international public goods, international monetary cooperation, and economic liberalization in East Asia.

Encyclopedia of Modern U.S. Military Weapons Timothy M. Laur, Steven L. Llanos, 1998-07 An accessible encyclopedia of military weapons represents a collaboration with The Army, Navy, and Air Force Times, and covers each weapon system, its evolution, development, and combat experience.

Zero Fighter Martin Caidin, 1970 The agile, brilliant fighter planes and their masterly pilots blasted all oppositions from the air. The '... weren't just good--they were hell on wheels'. For a fatally long time the horrifying reports came in and were disbelieved. For that space zero fighter ruled the Pacific sky.

SIPRI Yearbook 1994 Stockholm International Peace Research Institute, 1994 The SIPRI Yearbook 1994 continues SIPRI's review of the latest developments in nuclear weapons, world military expenditure, the international arms trade and arms production, chemical and biological weapons, the proliferation of ballistic missile technology, armed conflicts in 1993, and nuclear and conventional arms control. It is the most complete and authoritative source available for up-to-date information in war studies, strategic studies, peace studies, and international relations.

"Rich Nation, Strong Army" Richard J. Samuels, 2018-08-06 Since World War II, Japan has become not only a model producer of high-tech consumer goods, but also-despite minimal spending on defense-a leader in innovative technology with both military and civilian uses. In the United States, nearly one in every three scientists and engineers was engaged in defense-related research and development at the end of the Cold War, but the relative strength of the American economy has declined in recent years. What is the relationship between what has happened in the two countries? And where did Japan's technological excellence come from? In an economic history that will arouse controversy on both sides of the Pacific, Richard J. Samuels finds a key to Japan's success in an ideology of technological development that advances national interests. From 1868 until 1945, the Japanese economy was fired by the development of technology to enhance national security; the rallying cry Rich Nation, Strong Army accompanied the expanded military spending and aggressive foreign policy that led to the disasters of the War in the Pacific. Postwar economic planners reversed the assumptions that had driven Japan's industrialization, Samuels shows, promoting instead the development of commercial technology and infrastructure. By valuing process improvements as much as product innovation, the modern Japanese system has built up the national capacity to innovate while ensuring that technological advances have been diffused broadly through industries such as aerospace that have both civilian and military applications. Struggling with the uncertainties of a post-Cold War economy, the United States has important lessons to learn from the way Japan has subordinated defense production yet emerged as one of the most technologically sophisticated nations in the world. The Japanese, like the Venetians and the Dutch before them, show us that butter is just as likely as guns to make a nation strong, but that nations cannot hope to be strong without an ideology of technological development that nourishes the entire national economy.

Advanced Transmission Studies John J. Coy, 1988 The NASA Lewis Research Center and the U.S. Army Aviation Systems Command share an interest in advancing the technology for helicopter propulsion systems. In particular, this paper presents highlights from that portion of the program in drive train technology and the related mechanical components. The major goals of the program are to increase life, reliability, and maintainability; reduce the weight, noise, and vibration; and maintain the relatively high mechanical efficiency of the gear train. The current activity emphasizes noise reduction technology and analytical code development followed by experimental verification. Selected significant advances in technology for transmissions are reviewed, including advanced configurations and new analytical tools. Finally, the plan for transmission research in the future is presented.

Tupolev Tu-16 Badger Yefim Gordon, Vladimir Rigmant, 2004-06-21 The establishment of NATO posed the need for the Soviet war machine to create a fast jet bomber capable of reaching targets throughout Western Europe and combatting the carrier task forces with which the US Navy could throw its weight around the world. The basic Tu-16 which first flew in the mid-1950s was developed into nearly 50 versions adopted for various roles, including nuclear-capable bombers, anti-shipping missile strike aircraft, torpedo-bombers and minelayers, numerous reconnaissance and ECM variants, assorted development aircraft for testing new engines, avionics and systems. The Tu-16 even found civil uses as a fast mailplane and a weather research/rainmaking aircraft! The Badger, as the bomber was known to the West, served as the basis for the Soviet Union's first jet airliner, the Tu-104. The nearly 1,500 Tu-16s built in the Soviet Union were an important factor in preventing all-out military confrontation between the East and the West. Since the mid-1950s and until the 1980s the Badger has been a regular picture on the pages of the Western press, snooping around Western naval groups every now and then. The type also had its share of 'hot' wars, getting its baptism of fire in the Six-Day War of 1967. Apart from three factories in the USSR, the Tu-16 was built under license in China as the H-6 and remains in service with the People's Liberation Army Air

Force. Other foreign users were Egypt, Indonesia and Iraq. All known versions are described and a full account is given of the Tu-16's operational career in the USSR and abroad during the Cold War and in the days after that when many of the surviving Badgers were used as target drones. The book features many previously unpublished photos and a detailed production list.

Inside Japan's Defense Michael W. Chinworth,1992 In Inside Japan's Defense, noted defense analyst Michael W. Chinworth relates the dramatic story of Japan's recent defense industrial development and identifies the Japanese strategy for the year 2000. In the process, he examines the pattern of defense policies and procurement that have led Japan to its present position as a near military power in the region, asks why and how the world's second largest economic power buys its weapons, and speculates on how patterns may change in the future. He also demonstrates why and how the United States has contributed to Japan's military growth through generous technology transfers and the protection of their bilateral security treaty. This important new book also contains lessons for a budget-conscious United States. Due to the new geopolitical balance and severe budget constraints, America of the 1990s faces the most radical restructuring of its defense posture since the end of World War II. The Japanese defense industry, on the other hand, has long operated in an austere economic and budgetary environment. Thus the Japanese are experienced at stretching every yen that goes into defense, and their defense community has already dealt with many of the problems just now facing American planners. According to Inside Japan's Defense, the Japanese have handled these problems very well. The issues covered in this book will be key topics of discussion during every future U.S. budget cycle.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved
